

# CONTENTS

## *Chapter 1*

ECOLOGY AS A SCIENCE .....	1
----------------------------	---

## *Chapter 2*

ECOLOGY OF INDIVIDUAL ORGANISMS .....	6
Tolerance Range .....	6
When Conditions Change .....	7
Limiting Factors and the Environmental Complex .....	10
Energy Balance .....	11
Animal Behavior .....	17
Proximate and Ultimate Factors .....	18
Habitat Selection .....	19
Important Abiotic Factors .....	22
Ecological Indicators .....	44
Dispersal and Range Expansion .....	45

## *Chapter 3*

POPULATION ECOLOGY .....	51
Birth and Death .....	51
Population Growth .....	55
Population Density and Population Regulation .....	65
Organization in Populations .....	77
Evolution .....	84
Predator-Prey Relations .....	90
Health and Disease .....	100
Interspecific Competition .....	103
Extinction .....	115

## Chapter 4

COMMUNITY AND ECOSYSTEM ECOLOGY: INTERACTIONS AND ORGANIZATION.....	120
Types of Interactions .....	120
Energy in Ecosystems.....	122
Biogeochemistry .....	138
Organization of Communities and Ecosystems.....	149
Ecological Diversity.....	164

## Chapter 5

COMMUNITY AND ECOSYSTEM ECOLOGY: COMMUNITY CHANGE AND THE NATURAL LANDSCAPE.....	175
Community Change.....	175
Landscape and the Biome System.....	198
Aquatic Ecosystems .....	220
Paleoecology and History of the Biomes.....	234

## Chapter 6

THE PRACTICAL ECOLOGIST.....	247
Pollution .....	247
Food Production and Organic Farming .....	263
Energy .....	266
Population.....	269
Natural Areas and Their Preservation .....	273
Land Use.....	277
Spaceship Earth.....	280
Glossary .....	283
Index .....	289
