| | |
|--|-------------|
| Contributors | vii |
| Preface | xiii |
| | |
| SECTION 1 <i>Agrobacterium</i>-Mediated Transformation | |
| | |
| Chapter 1 Host Factors Involved in Genetic Transformation of Plant Cells by <i>Agrobacterium</i> | 3 |
| BENOÎT LACROIX, ADI ZALTSMAN, AND VITALY CITOVSKY | |
| Chapter 2 Genomics of <i>Agrobacterium</i>-Plant Interaction: An Approach to Refine the Plant Transformation Technology | 31 |
| AJITH ANAND, ZARIR E. VAGHCHHIPAWALA, AND KIRANKUMAR S. MYSORE | |
| | |
| SECTION 2 Other Transformation Technologies | |
| | |
| Chapter 3 Particle Bombardment: An Established Weapon in the Arsenal of Plant Biotechnologists | 53 |
| THEODORE M. KLEIN | |
| Chapter 4 A Novel Gene Delivery System in Plants with Calcium Alginate Micro-Beads | 73 |
| NAOKI WADA, SHIN'ICHIRO KAJIYAMA, NARUEMON KHEMKLADNGOEN, AND KIICHI FUKUI | |
| Chapter 5 Pollen Transformation Technologies | 83 |
| TATIANA RESCH AND ALISHER TOURAEV | |
| Chapter 6 Intragenic Vectors and Marker-Free Transformation: Tools for a Greener Biotechnology | 93 |
| CAIUS M. ROMMENS, ANTHONY CONNER, HUA YAN, AND ZAC HANLEY | |
| Chapter 7 Visualizing Transgene Expression | 109 |
| JOHN J. FINER | |

| | | |
|---|---|------------|
| SECTION 3 Vectors, Promoters, and Other Tools for Plant Transformation | | |
| Chapter 8 | Current State and Perspective of Binary Vectors and Superbinary Vectors | 123 |
| | TOSHIYUKI KOMORI AND TOSHIHIKO KOMARI | |
| Chapter 9 | Novel Dual Binary Vectors (pCLEAN) for Plant Transformation | 139 |
| | PHILIPPE VAIN | |
| Chapter 10 | pORE Modular Vectors for Plant Transformation | 149 |
| | DWAYNE D. HEGEDUS | |
| Chapter 11 | pANIC: A Versatile Set of Gateway-Compatible Vectors for Gene Overexpression and RNAi-Mediated Down-Regulation in Monocots | 161 |
| | DAVID G.J. MANN, PETER R. LAFAYETTE, LAURA L. ABERCROMBIE, WAYNE A. PARROTT, AND C. NEAL STEWART, JR. | |
| SECTION 4 Transgene Integration, Stability, Methylation, Silencing | | |
| Chapter 12 | Understanding and Avoiding Transgene Silencing | 171 |
| | MICHAEL W. GRAHAM, STEPHEN R. MUDGE, PETER R. STERNES, AND ROBERT G. BIRCH | |
| Chapter 13 | Site-Specific Recombination for Precise and “Clean” Transgene Integration in Plant Genome | 197 |
| | VIBHA SRIVASTAVA AND DAVID W. OW | |
| SECTION 5 Selection Systems, Marker-Free Transformation | | |
| Chapter 14 | Selectable Marker Genes: Types and Interactions | 213 |
| | BRIAN MIKI, ASHRAF ABDEEN, YUZUKI MANABE, SOUAD EL OUAKFAOUI, DOUGLAS A. JOHNSON, LORETA GUDYNAITE-SAVITCH, MING HU, AND PHIL MACDONALD | |
| Chapter 15 | Transformation Methods for Obtaining Marker-Free Genetically Modified Plants | 229 |
| | JAN G. SCHAART, FRANS A. KRENS, ANNE-MARIE A. WOLTERS, AND RICHARD G.F. VISSER | |
| Chapter 16 | Intellectual Property Aspects of Plant Transformation | 243 |
| | JIM M. DUNWELL | |
| Index | | 271 |
| Color Plate between pages 82 and 83 | | |
