

CONTENTS

PREFACE, ix

1 INTRODUCTION, 1

- 1.1 Population regulation of herbivores, 1
- 1.2 Plant and animal demography, 2
 - 1.2.1 Herbivore feeding and plant demography, 4
 - 1.2.2 Plant attributes and animal demography, 5
 - 1.2.3 Plant–herbivore dynamics, 6
 - 1.2.4 Community dynamics, 8
- 1.3 The types of herbivorous animals, 9
- 1.4 Herbivore impact in natural ecosystems, 9
- 1.5 Indirect effects of herbivores in ecosystems, 17
 - 1.5.1 Habitat structure, 17
 - 1.5.2 Nutrient cycling, 18
 - 1.5.3 Soil structure, 20

2 PLANT POPULATIONS, 21

- 2.1 Plant demography, 21
 - 2.1.1 Density dependence and size plasticity, 25
 - 2.1.2 Determining r , 27
- 2.2 Herbivores and the death rate of established plants, 31
 - 2.2.1 Plant survivorship curves, 34
 - 2.2.2 Longevity, 37
 - 2.2.3 The frequency of herbivore attack, 39
 - 2.2.4 Death rate and stress, 39
- 2.3 Herbivores and plant growth rate, 40
 - 2.3.1 Leaf feeding, 41
 - 2.3.2 Herbivores and grass growth, 42
 - 2.3.3 Defoliation and root growth in grasses, 44
 - 2.3.4 Defoliation and net production in grasses, 45
 - 2.3.5 Herbivores and the growth of woody plants, 46
 - 2.3.6 Plant shape, 49
 - 2.3.7 Plant size distributions, 50
- 2.4 Herbivores and plant fecundity, 52
 - 2.4.1 Defoliation and fecundity, 55
 - 2.4.2 Root feeding and fecundity, 60
 - 2.4.3 Defloration and fecundity, 62
 - 2.4.4 Flowering time, 65
 - 2.4.5 Seed size, 67
 - 2.4.6 Mast fruiting, 67
 - 2.4.7 Fecundity and plant size variance, 69
- 2.5 Seed predators and the dynamics of the seed bank, 70
 - 2.5.1 Seed Bank, 75
 - 2.5.2 Seed dispersal, 76
- 2.6 Herbivores and seedling establishment, 79

- 2.6.1 Germination microsites, 80
- 2.6.2 Seedling predation, 83
- 2.6.3 Seed size and establishment, 84
- 2.7 Plant compensation, 86
 - 2.7.1 Reduced competition, 88
 - 2.7.2 Timing and compensation, 91
 - 2.7.3 Increased unit leaf rate, 92
 - 2.7.4 Mobilizing stored carbohydrate, 96
 - 2.7.5 Refoliation, 99
 - 2.7.6 Distribution of photosynthate, 103
 - 2.7.7 Reduced death rate of plant parts, 106
 - 2.7.8 The prevalence and importance of plant compensation, 108
- 3 ANIMAL POPULATIONS, 111**
 - 3.1 Functional responses, 111
 - 3.1.1 The feeding rate of individuals, 111
 - 3.1.2 Feeding rate and plant density, 114
 - 3.1.3 Feeding rate and food quality, 118
 - 3.1.4 Availability, 121
 - 3.1.5 Feeding rate and herbivore density, 123
 - 3.2 Numerical responses, 126
 - 3.2.1 Animal growth and food, 128
 - 3.2.2 Development rate and food, 132
 - 3.2.3 Fecundity and food, 134
 - 3.2.4 Mortality and food, 138
 - 3.2.5 Phenology and numerical responses, 141
 - 3.2.6 Age structure and numerical responses, 142
 - 3.3 Immigration, emigration and food, 144
 - 3.3.1 Emigration, 144
 - 3.3.2 Plant patterns and herbivore dispersal, 149
 - 3.3.3 Spatial patterns of herbivore feeding, 151
 - 3.4 Monophagy and polyphagy, 153
 - 3.4.1 Advantages of polyphagy, 155
 - 3.4.2 Advantages of monophagy, 156
 - 3.5 Selection and preference, 157
 - 3.5.1 Habitat selection, 157
 - 3.5.2 Detecting feeding preferences, 160
 - 3.5.3 Food selection by vertebrate herbivores, 164
 - 3.5.4 Host plant selection by invertebrate herbivores, 169
 - 3.5.5 Within-plant microhabitat selection, 176
 - 3.5.6 Switching, 178
 - 3.6 Food quality, 180
 - 3.6.1 The gut microflora, 182
 - 3.6.2 Nitrogen, 184
 - 3.6.3 Leaf age and food quality, 186
 - 3.6.4 Plant stress and food quality, 187
 - 3.6.5 Food quality and fertilizer application, 187
 - 3.6.6 Diet supplementation, 190
 - 3.6.7 The effect of herbivore feeding on food quality, 191
 - 3.7 Plant defences against herbivores, 194

- 3.7.1 Surface defences, 194
- 3.7.2 Chemical defences, 195
- 3.7.3 Protection by animals, 200
- 3.7.4 Facultative defences, 201
- 3.7.5 Polymorphism in chemical defences, 204
- 3.7.6 Life history and chemical defences, 206
- 3.7.7 The costs of chemical defence, 207
- 3.7.8 Plant chemicals and herbivore defence, 208
- 3.7.9 Defensive chemicals and plant fitness, 208
- 3.7.10 Detoxification of chemical defences by herbivores, 209

4 PLANT–HERBIVORE DYNAMICS, 211

- 4.1 Plant populations, 214
- 4.2 Herbivore populations, 222
 - 4.2.1 Stable herbivore populations, 224
 - 4.2.2 Eruptive populations, 227
 - 4.2.3 Outbreak populations of herbivorous insects, 229
 - 4.2.4 Population cycles, 233
 - 4.2.5 The dynamics of exploited herbivore populations, 241
- 4.3 Population models, 247
 - 4.3.1 Lotka-Volterra: The basic model, 248
 - 4.3.2 Resource-limited plants, 249
 - 4.3.3 Herbivore functional responses, 255
 - 4.3.4 Herbivore numerical responses, 260
 - 4.3.5 Plant compensation, 266
 - 4.3.6 Impaired plant regrowth, 268
 - 4.3.7 Pattern of herbivore attack, 270
 - 4.3.8 Ineffective herbivore dispersal, 276
 - 4.3.9 Herbivore numbers not food limited, 278
 - 4.3.10 The role of predators, 280
 - 4.3.11 Annual plants, 283
 - 4.3.12 Annual plants with a seed bank, 287

5 COMMUNITY DYNAMICS, 290

- 5.1 Herbivores and plant-species richness, 290
 - 5.1.1 Direct effects, 290
 - 5.1.2 Indirect effects, 291
 - 5.1.3 Alternative host plants and plant diversity, 293
- 5.2 Herbivores and plant community structure, 294
 - 5.2.1 Overgrazing, 299
 - 5.2.2 Undergrazing, 301
 - 5.2.3 Grazing versus mowing, 302
- 5.3 Herbivores and plant succession, 303
- 5.4 Resource concentration and associational resistance, 307
 - 5.4.1 The resource concentration hypothesis, 309
 - 5.4.2 The enemies hypothesis, 310
 - 5.4.3 The microclimate hypothesis, 311
- 5.5 Herbivore guilds, 312
 - 5.5.1 Species–area effects, 314
 - 5.5.2 Plant architecture, 314

5.5.3	Plant longevity, 316
5.5.4	Time and size of herbivore guilds, 316
5.5.5	Taxonomic isolation, 318
5.6	Interspecific dynamics of herbivores, 319
5.6.1	Competition, 319
5.6.2	Amensalism, 320
5.6.3	Commensalism, 322
5.7	Coexistence and competitive exclusion amongst herbivores, 323
5.7.1	Coexistence and resource partitioning, 325
5.7.2	Coexistence and habitat separation, 327
5.8	Predators, parasites and diseases in community dynamics, 329
6	CONCLUSIONS
6.1	Plant–herbivore interactions, 332
6.2	Plant population dynamics, 334
6.3	Herbivore population dynamics, 337
6.4	Spatial distribution, 338
6.5	Seasonal factors, 338
6.6	Cycles, 339
6.7	Harvesting, 340
6.8	Monophagy and polyphagy, 340
6.9	Diversity of plants and herbivores, 341
6.10	Intraspecific variability, 343
6.11	Herbivores and plant succession, 343
	Epilogue, 345
