<b>Preface</b>	xiii

## Part I INTRODUCTION

<b>1 Natural Disturbance and Patch Dynamics: An Introduction</b>	
P. S. WHITE AND S. T. A. PICKETT	
I. The Dynamics of Biological Systems	3
II. Definitions: Patch Dynamics, Perturbation, and Disturbance	4
III. Natural Disturbance: The Patch Dynamics Perspective	9

## Part II PATCH DYNAMICS IN NATURE

<b>2 Disturbance Regimes in Temperate Forests</b>	
JAMES R. RUNKLE	
I. Introduction	17
II. Components of a Disturbance Regime for Forests	18
III. Natural Disturbance Regimes for Specific Temperate Forests	24
IV. Artificial Disturbance Regimes	31
V. Summary	32
Recommended Readings	33
<b>3 Stand Dynamics in Chilean <i>Nothofagus</i> Forests</b>	
THOMAS T. VEBLEN	
I. Introduction	35
II. The Chilean Lake District	36
III. Patch Dynamics	39
IV. Conclusions	49
Recommended Readings	51

## **4 Treefalls, Regrowth, and Community Structure in Tropical Forests**

NICHOLAS V. L. BROKAW

I. Introduction	53
II. Treefall Regimes	54
III. Regeneration Behavior	60
IV. Regrowth	64
V. Community Structure	66
VI. Conclusions	68

## **5 Gap Processes and Large-Scale Disturbances in Sand Prairies**

ORIE L. LOUCKS, MARY L. PLUMB-MENTJES, AND DEBORAH ROGERS

I. Introduction	72
II. Perspectives on Grassland Disturbances	73
III. A Southwestern Wisconsin Case Study: The Spring Green Sand Prairie	74
IV. Discussion: Disturbance Scale, Return Times, and Predictability in Grasslands	81
Recommended Readings	82

## **6 Shrubland Fire Regimes and Their Evolutionary Consequences**

NORMAN L. CHRISTENSEN

I. Introduction	86
II. Fire Regimes and Their Control	86
III. Environmental Responses to Burning	89
IV. Plant Adaptations to Fire in Shrublands	93
V. Community Responses to Burning	97

## **7 Disturbance and Patch Dynamics on Rocky Intertidal Shores**

WAYNE P. SOUSA

I. Introduction	101
II. Kinds of Open Space Produced by Disturbance	104
III. Characteristics of the Disturbance Regime	104
IV. Modes of Patch Colonization	112
V. Responses of Mobile Consumers to Patch Characteristics	116
VI. Within-Patch Dynamics	119
VII. Regional Persistence of Fugitive Species	121
VIII. Concluding Remarks	123
Recommended Readings	124

**8 Disturbance and Patch Dynamics of Subtidal Marine Animals on Hard Substrata**

JOSEPH H. CONNELL AND MICHAEL J. KEOUGH

I. Introduction	125
II. Examples of the Patch Dynamics of Subtidal Communities	131
III. Discussion	147

**9 Disturbance and Vertebrates: An Integrative Perspective**

JAMES R. KARR AND KATHRYN E. FREEMARK

I. Introduction	153
II. The Complexity of Disturbances in Vertebrate Communities: An Example from the Everglades	154
III. Disturbance as Considered by Ecologists	155
IV. Disturbance and Vertebrate Adaptations	156
V. Study of Vertebrate Adaptations in the Context of Disturbance	163
VI. Synthesis	166
Recommended Readings	168

**10 Vertebrate Responses to Environmental Patchiness in Arid and Semiarid Ecosystems**

JOHN A. WIENS

I. Introduction	169
II. Patchiness in Arid Environments	170
III. Environmental Patchiness and Individuals	172
IV. Patches and Populations	181
V. Patches and Community Structure	184
VI. Vertebrates as Patch Producers	187
VII. Habitat Fragmentation	189
VIII. Concluding Caution	192

**Part III ADAPTATIONS OF PLANTS AND ANIMALS IN A PATCH DYNAMIC SETTING**

**11 The Response of Woody Plants to Disturbance: Patterns of Establishment and Growth**

CHARLES D. CANHAM AND P. L. MARKS

I. Introduction	197
II. Natural Disturbance and Resource Availability	198
III. Establishment of Woody Plants Following Disturbance	199
IV. Growth and Resource Use by Woody Plants Following Disturbance	205
V. Discussion	213
Recommended Readings	216

<b>12</b>	<b>Responses of Forest Herbs to Canopy Gaps</b>	
	B. S. COLLINS, K. P. DUNNE, AND S. T. A. PICKETT	
	I. Introduction	218
	II. Gap Environment	219
	III. Responses to the Environment	223
	IV. Herb Responses to Gaps	227
	V. Constraints on Herb Responses	231
	VI. Conclusions	232
	Recommended Readings	234
<b>13</b>	<b>Adaptations of Insects to Disturbance</b>	
	TIMOTHY D. SCHOWALTER	
	I. Introduction	235
	II. Factors Influencing Insect Responses to Disturbance	236
	III. Insect Propagation of Disturbance Effects	243
	IV. Insects as Regulators of Ecosystem Productivity	248
	V. Conclusions	251
	Recommended Readings	252
<b>14</b>	<b>Within-Patch Dynamics of Life Histories, Populations, and Interactions: Selection over Time in Small Spaces</b>	
	JOHN N. THOMPSON	
	I. Introduction	253
	II. Within-Patch Dynamics, Life Histories, and Selection	254
	III. Ecological Genetics of Within-Patch Structure and Dynamics	259
	IV. Ecological Genetics and the Within-Patch Dynamics of Interactions	261
	V. Conclusions	264
<b>15</b>	<b>Animal Population Genetics and Disturbance: The Effects of Local Extinctions and Recolonizations on Heterozygosity and Fitness</b>	
	ROBERT C. VRIJENHOEK	
	I. Introduction	266
	II. Natural Disturbance and Genetic Drift	267
	III. Genetic Drift and Heterozygosity	269
	IV. Heterozygosity and Fitness	270
	V. Natural Disturbances and <i>Poeciliopsis</i> Populations	275
	VI. Breeding Systems and Patch Dynamics	281
	VII. Local Fitness and Competition	282
	VIII. Long-Term Processes: The Shifting Balance	284
	Recommended Readings	285

## **16 Plant Population Genetics and Evolution in Disturbed Environments**

KEVIN RICE AND SUBODH JAIN

I. Introduction	287
II. Linking Population Ecology to Population Genetic Theory	289
III. Genetics of Colonizing Plant Species	294
IV. Models of Genetic Variation in Patchily Distributed Species	296
V. Genetic Variation: Observation in Plant Populations	299
VI. Variation, Selection, and Adaptation	301
VII. Summary	302
Recommended Readings	303

### **Part IV IMPLICATIONS OF PATCH DYNAMICS FOR THE ORGANIZATION OF COMMUNITIES AND THE FUNCTIONING OF ECOSYSTEMS**

## **17 Disturbance-Mediated Coexistence of Species**

JULIE SLOAN DENSLOW

I. Introduction	307
II. Patches and Landscapes	308
III. Characteristics of Disturbances	310
IV. Ecosystem Resilience	316
V. The Role of Propagule Dispersal in Community Structure	319
VI. Conclusions	321

## **18 Community Turnover and Ecosystem Nutrient Dynamics**

PETER M. VITOUSEK

I. Introduction	325
II. Nutrient Cycling within a Patch	327
III. Patch Size and Nutrient Dynamics	332
IV. Effects on Watershed-Level Nutrient Dynamics	332

## **19 Natural Disturbance and Ecosystem Energetics**

DOUGLAS G. SPRUGEL

I. Introduction	335
II. Ecosystem Changes during Stand Development	337
III. Conclusion—Disturbance, Energetics, and Resource Management	349
IV. Summary	351
Recommended Readings	352

**20 Modeling Forest Landscapes and the Role of Disturbance in Ecosystems and Communities**

H. H. SHUGART AND S. W. SEAGLE

- |   |     |
|---|-----|
| I. Introduction                               | 353 |
| II. Forest Dynamics Models                    | 356 |
| III. Gap Models                               | 357 |
| IV. A Model of Animal Response to Disturbance | 363 |
| V. Concluding Remarks                         | 368 |

**Part V SYNTHESIS****21 Patch Dynamics: A Synthesis**

S. T. A. PICKETT AND P. S. WHITE

- |                                     |     |
|-------------------------------------|-----|
| I. Introduction                     | 371 |
| II. The Importance of Disturbance   | 372 |
| III. Toward a Theory of Disturbance | 374 |
| IV. Conclusion                      | 383 |

**Bibliography**
