

Table of contents

	PREFACE	
I	CLIMATE	I
	Desert types	I
	Rainfall	6
	Temperature	7
	Aridity	9
	Wind	10
	Microclimates	11
2	SOILS	13
	Desert soils	13
	Alluvial deposits	13
	Dunes	16
	Semi-desert soils	20
3	DESERTS IN THE PAST	22
	Geomorphology	22
	Palaeoclimates	26
4	MAN-MADE DESERTS OF THE WORLD	29
	The origin of savanna	29
	Shifting cultivation	33
	Forest peoples	38
	Pastoralism	41

5	THE EXPANDING SAHARA—A CASE HISTORY	44
	Climate, past and present	44
	Fossil evidence	47
	Historical evidence	50
6	VEGETATION AND POTENTIAL	55
	Vegetation types	55
	Drought-evading plants	57
	Xerophytic plants	60
	Utilization of desert plants	63
	Food gathering cultures	64
	Exploitation of raw materials	66
	Oasis cultivation	68
7	ANIMAL PROBLEMS OF ARIDITY	70
	Behavioural adaptations: circadian rhythms	71
	Phenology	74
	Similarities between plants and animals	75
	Reduction in transpiration	77
	Respiratory adaptations	79
	Excretory adaptations	83
	Water uptake	85
8	THERMAL PROBLEMS OF ANIMALS	89
	Behavioural thermoregulation	89
	Emergency mechanisms	91
	Hyperthermia	93
	Adaptations for life in sand	94
	Adaptive coloration	97
9	ADAPTATIONS AND EXPLOITATION OF LARGER MAMMALS	100
	Camels	100
	Antelopes and asses	104
	Cattle, sheep and goats	106
	Marsupials	107
	Evaporative cooling	107
	Carnivores	109
	Exploitation of desert mammals	110
10	BIOLOGY OF MAN IN THE DESERT	113
	Indigenous animals as human food	113
	Water and electrolytes	115
	Circulatory adjustments	116

	Physiological adaptations	117
	Acclimatization	119
	Pigmentation	119
	Technological adaptations	120
11	AGRICULTURAL PESTS	123
	Locusts and grasshoppers	123
	Termites	129
	Other agricultural pests	130
	Human influence on the ecology of pests	131
	Locust control	132
	Prevention of termite damage	134
	Alternative methods of pest control	134
12	PATHOGENIC AND VENOMOUS ORGANISMS	136
	Plant pathogens	136
	Epizootics among mammals	137
	Diseases of man	139
	Medical problems of development projects	142
	Arthropods poisonous to man	143
	Venomous reptiles	145
	Chemical defence	148
13	THE DESERT COMPLEX AND ITS RATIONAL EXPLOITATION	151
	Pastoralism	151
	Nomadism	153
	Preservation of wild life	156
	Game ranching	156
	Dryland farming	157
	Agricultural crops	158
	Irrigation	161
	Water desalination	163
	Hydroponics	164
	Dune stabilization	164
	Changing the climate	165
	Land reclamation	165
	Mineral resources	166
	Industry and tourism	167
	Multiple land use	168
14	EPILOGUE	169
	BIBLIOGRAPHY	172
	INDEX	178
