Preface	v
1 Introduction	1
What Are Manifolds?	1
Why Study Manifolds?	4
2 Topological Spaces	19
Topologies	19
Convergence and Continuity	26
Hausdorff Spaces	31
Bases and Countability	33
Manifolds	38
Problems	45
3 New Spaces from Old	49
Subspaces	49
Product Spaces	60
Disjoint Union Spaces	64
Quotient Spaces	65
Adjunction Spaces	73
Topological Groups and Group Actions	77
Problems	81
4 Connectedness and Compactness	85
Connectedness	86
Compactness	94
Local Compactness	104
Paracompactness	109
Proper Maps	118
Problems	122

5	Cell Complexes	127
	Cell Complexes and CW Complexes	127
	Topological Properties of CW Complexes	135
	Classification of 1-Dimensional Manifolds	143
	Simplicial Complexes	147
	Problems	155
6	Compact Surfaces	159
	Surfaces	159
	Connected Sums of Surfaces	164
	Polygonal Presentations of Surfaces	166
	The Classification Theorem	173
	The Euler Characteristic	178
	Orientability	180
	Problems	181
7	Homotopy and the Fundamental Group	183
	Homotopy	184
	The Fundamental Group	186
	Homomorphisms Induced by Continuous Maps	197
	Homotopy Equivalence	200
	Higher Homotopy Groups	208
	Categories and Functors	209
	Problems	214
8	The Circle	217
	Lifting Properties of the Circle	218
	The Fundamental Group of the Circle	224
	Degree Theory for the Circle	227
	Problems	230
9	Some Group Theory	233
	Free Products	233
	Free Groups	239
	Presentations of Groups	241
	Free Abelian Groups	244
	Problems	248
10	The Seifert–Van Kampen Theorem	251
	Statement of the Theorem	251
	Applications	255
	Fundamental Groups of Compact Surfaces	264
	Proof of the Seifert–Van Kampen Theorem	268
	Problems	273

11	Covering Maps	277
	Definitions and Basic Properties	278
	The General Lifting Problem	283
	The Monodromy Action	287
	Covering Homomorphisms	294
	The Universal Covering Space	297
	Problems	302
12	Group Actions and Covering Maps	307
	The Automorphism Group of a Covering	308
	Quotients by Group Actions	311
	The Classification Theorem	315
	Proper Group Actions	318
	Problems	334
13	Homology	339
	Singular Homology Groups	340
	Homotopy Invariance	347
	Homology and the Fundamental Group	351
	The Mayer–Vietoris Theorem	355
	Homology of Spheres	364
	Homology of CW Complexes	369
	Cohomology	374
	Problems	379
	Appendix A: Review of Set Theory	381
	Basic Concepts	381
	Cartesian Products, Relations, and Functions	384
	Number Systems and Cardinality	390
	Indexed Families	391
	Appendix B: Review of Metric Spaces	395
	Euclidean Spaces	395
	Metrics	396
	Continuity and Convergence	398
	Appendix C: Review of Group Theory	401
	Basic Definitions	401
	Cosets and Quotient Groups	403
	Cyclic Groups	405
	References	407
	Notation Index	409
	Subject Index	413
