Volume 1-4

Volume 1	Volume 3
Regional field trips	Field trips in Berlin and environs
Foreword..... 5	Foreword 1065
1: West Scandinavian Traverse (MICHAEL WALTHER) 11	B1: Pre-Tertiary in the surroundings of Berlin (W. STACKEBRAND, H. BEER, D. GÖLLNITZ & J. WASTERNAK) 1067
2: Southwest Scandinavian Traverse (FRIEDRICH GRUBE)..... 69	B2: Rüdersdorf – classical type locality for Muschelkalk (Middle Triassic) and glacial deformation (K.-B. JUBITZ & H.-J. STREICHAN)..... 1070
3: Baltic Traverse (JÜRGEN EHLERS) 119	B3: Older Pleistocene deposits and structures in the Weichselian glacial area east of Berlin (M. HANNEMANN) 1071
4: Polish Traverse (STEFAN KOZARSKI) 189	B4: Middle and Late Pleistocene and Holocene sequences in the open-cast pit of Schöningen / Niedersachsen (B. URBAN, H. THIEME, D. MANIA & T. VAN KOLFSCHOTEN)..... 1075
5: Czech-Slovakian Traverse (KLAUS-DIETER JÄGER) 239	B5: Travertine complex and fauna at Bilzingsleben (D. MANIA) 1078
6: Carpathian Traverse (ARNT BRONGER) 295	B6: Middle and Late Pleistocene of the Elbe-Mulde area (W. KNOTH, S. WANSA & R. WIMMER) 1079
7: Eastern Alps Traverse (DIRK VAN HUSEN)..... 381	B7: Quaternary of the southern Leipzig basin – stratigraphy, archaeology and diapirism in the open-cast pits of Zwenkau and Profen (F. W. JUNGE, K. HOFFMANN, T. WEBER & A. RUDOLPH) 1087
8: Weser-Bodensee Traverse (ARNO SEMMEL) 435	B8: Fold arch of Muskau (M. KUPETZ) 1091
9: Rhein Traverse (WOLFGANG SCHIRMER) 475	B9: Open-cast pits of Jänschwalde (LAUBAG) and Oberspreewald (W. NOWEL et al., LAUBAG Senftenberg)..... 1094
10: Central Upland Margin Traverse (WOLFGANG BOENIGK) 559	B10: Holstein Interglacial around Eisenhüttenstadt (R. SCHULZ) 1098
Volume 2	B11: Quaternary of Rüdersdorf and OTTO TORELL (A. G. CEPEK, D. HELLWIG & R. ZWIRNER) 1103
Field trips on special topics	B12: Eemian basin of Schönfeld (R. STRIEGLER & U. STRIEGLER) 1107
11: Lowland Traverse (KLAUS-DIETER MEYER) 607	B13: The classical investigation area of the northern German glaciation around Eberswalde-Chorin (J. MARCINEK) 1111
12: Alpine Traverse (MAX MAISCH) 655	
13: Mammal Traverse. Quaternary vertebrate faunas in Central Europe (WIGHART VON KOENIGSWALD) 707	
14: Nordic and Alpine Glacierizations in Germany (KARL ALBERT HABBE)..... 747	
15: Palaeolithic sites in the Rheinland (GERHARD BOSINSKI) 829	
16: North Sea Coast (HANSJÖRG STREIF) 1001	

B14: Glacial and late glacial genesis of the landscape N Berlin (P. GÄRTNER)	1114	B31: Water supply for Berlin (Lakes Müggel and Tegel) (B. EMSHOFF, A. MÜLLER, C. SOMMER-VON JARMERSTED, J. THIERBACH & J. WURL)	1177
B15: Weichselian glacial basins and periglacial valleys NE of Berlin (B. NITZ)	1119	B32: Hydrography of the Teupitz-Köris Lake District (O. MIETZ, J. MARCINEK & H. VIETINGHOFF) .	1177
B16: Ice-marginal deposits and dunes NE of Berlin (N. SCHLAAK)	1122	B33: Salified places of the Nuthe basin south of Berlin (H.-D. KRAUSCH & W. SCHIRRMESTER)	1179
B17: Origin and anthropogenic modification of the Oderbruch region (F. BROSE)	1123	B34: Geoecology in the young moraine area SW of Berlin (O. BLUMENSTEIN)	1179
B18: Märkische Schweiz – Strausberg Lake District (J. MARCINEK, O. MIETZ & H. VIETINGHOFF) .	1129	B35: Sewage farming in the north-east of Berlin – ecological problems (G. GINZEL)	1183
B19: Glacigenic landscape south of Potsdam (M. PAWLITZKY)	1132	B36: The Schorfheide-Chorin biosphere reserve (M. WALTHER)	1185
B20: Landscape development in the terminal area of the Brandenburg stage (Weichselian) south of Potsdam (M. BÖSE, A. BRANDE, M. MÜLLER & V. ROWINSKY)	1132	B37: Municipal waste disposal and waste-water load in the Berlin area (K.-J. THOMÉ-KOZMINSKY)	1189
B21: Glacigenic landscape of western Brandenburg (R. WEISSE)	1134	B38: Natural potential and land use – a section across the eastern marginal areas of Berlin to the Oder Marsh (L. ZAUMSEIL)	1193
B22: Quaternary morphology of the Berlin landscape (H. KALLENBACH)	1142	B39: Map set of nature resources of the glacial area of Chorin (D. KOPP & A. KONOPATZKY)	1194
B23: Eolian landforms in the central Baruth Urstromtal (ice-marginal valley) (W. M. DE BOER)	1146	B40: Glacial landscapes used as military training area – Döberitz near Berlin (H. BARSCH & K. GRUNEWALD)	1197
B24: Eolian landforms in the Berlin area (D. JÄKEL)	1149	B41: Landscape evolution of the Saale moraines in the Northern Fläming after military training use (F. SCHRADER)	1199
B25: Landscape and soil development in north-eastern Brandenburg (R. SCHMIDT, W. HIEROLD & B. STROHBACH) .	1151	B42: Prehistoric survey of Berlin (K. GOLDMANN)	1201
B26: Soils and landforms of the Barnim and adjacent areas (S. BUSSEMER)	1154	B43: Morphology, foundation soil and historic-genetic building development in Berlin (G. SCHULZ)	1203
B27: Typical soils of Berlin (F. ALAILY, M. FACKLAM-MONIAK, C. HOFFMANN, M. RENGER & L. SCHLENTHER)	1158	B44: GeoForschungsZentrum (GFZ, geo research center) Telegrafenberg (J. F. W. NEGENDANK)	1206
B28: Vegetation and soils of Berlin – changes during human settling activities (H. SUKOPP)	1163	B45: Northern glaciation in Brandenburg (J. MARCINEK with contributions by F. BROSE, S. BUSSEMER, P. GÄRTNER, M. HANNEMANN, W. NOWEL & N. SCHLAAK)	1208
B29: Fen development north of Berlin (T. TIMMERMANN)	1165		
B30: Berlin's lakes (H.-J. PACHUR & B. WÜNNEMANN)	1167		

Volume 4

Exkursionen in Berlin und Umland

Vorwort	1240	B14: Glaziale und spätglaziale Landschaftsformung N Berlin (P. GÄRTNER)	1292
B1: Prätertiär in der Umgebung von Berlin (W. STACKEBRAND, H. BEER, D. GÖLLNITZ & J. WASTERNAK)	1241	B15: Weichselglaziale Becken und periglaziale Talentwicklung NE von Berlin (B. NITZ)	1297
B2: Rüdersdorf – klassische Typlokalität für Muschelkalk (Trias) und glazigene Deformation (K.-B. JUBITZ & H.-J. STREICHAN)	1244	B16: Eisrandsedimente und Dünen im Nordosten von Berlin (N. SCHLAAK)	1300
B3: Ältere pleistozäne Ablagerungen und Strukturen im Jungmoränengebiet östlich von Berlin (M. HANNEMANN)	1249	B17: Genese und anthropogene Überformung des Oderbruchs (F. BROSE)	1302
B4: Mittel- und jungpleistozäne und holozäne Abfolgen im Tagebau Schöningen (Niedersachsen) – Archäologie, Geologie, Biostratigraphie (B. URBAN, H. THIEME, D. MANIA & T. VAN KOLFSCHOTEN)	1253	B18: Märkische Schweiz – Strausberger Seengebiet (J. MARCINEK, O. MIETZ & H. VIETINGHOFF) .	1308
B5: Travertinkomplex und Fauna von Bilzingsleben (D. MANIA)	1256	B19: Glaziallandschaft südlich Podsdam (M. PAWLITZKY)	1311
B6: Mittel- und Jungpleistozän im Elbe-Mulde-Gebiet (W. KNOTH, S. WANSA & R. WIMMER)	1257	B20: Landschaftsentwicklung im Randbereich des Brandenburger Stadiums (Weichsel-Glazial) südlich von Potsdam (M. BÖSE, A. BRANDE, M. MÜLLER & V. ROWINSKY)	1313
B7: Das Quartär der südlichen Leipziger Tieflandsbucht – Stratigraphie, Archäologie und Diapirismus in den Tagebauen Zwenkau und Profen (F. W. JUNGE, K. HOFFMANN, T. WEBER & A. RUDOLPH)	1265	B21: Glaziallandschaft im Westen Brandenburgs (R. WEISSE)	1315
B8: Der Muskauer Faltenbogen (M. KUPETZ)	1269	B22: Quartärmorphologie der Berliner Landschaft (H. KALLENBACH)	1323
B9: Tagebau Jänschwalde der Lausitzer Braunkohle Aktiengesellschaft (LAUBAG) und Oberspreewald (W. NOWEL et coll., LAUBAG Senftenberg) .	1272	B23: Äolische Landschaftsformen im mittleren Baruther Urstromtal (Brandenburg, Deutschland) (W. M. DE BOER)	1327
B10: Das Holsteininterglazial rund um Eisenhüttenstadt (R. SCHULZ)	1276	B24: Äolische Formen im Raum Berlin (D. JÄKEL)	1330
B11: Das Quartär von Rüdersdorf und OTTO TORELL (A. G. CEPEK, D. HELLWIG & R. ZWIRNER)	1281	B25: Landschafts- und Bodengene- se in Nordost-Brandenburg (R. SCHMIDT, W. HIEROLD & B. STROHBACH) .	1332
B12: Eem-Becken von Schönfeld (R. STRIEGLER & U. STRIEGLER)	1285	B26: Böden und Landschaftsformen des Barnims und angrenzender Bereiche (S. BUSSEMER)	1336
B13: Das klassische Gebiet der norddeutschen Glazialforschung um Eberswalde-Chorin (J. MARCINEK)	1289	B27: Typische Böden Berlins (F. ALAILY, M. FACKLAM-MONIAK, C. HOFFMANN, M. RENGER & L. SCHLENTHER)	1340
		B28: Vegetation und Böden in Berlin – Veränderungen während der menschlichen Siedlungstätigkeit (H. SUKOPP)	1346
		B29: Moorentwicklung nördlich von Berlin (T. TIMMERMANN)	1347

B30: Berliner Seen (H.-J. PACHUR & B. WÜNNEMANN)	1350	B38: Naturraum und Landnutzung – ein Landschaftsprofil durch das östliche Randgebiet von Berlin bis zum Oderbruch (Kreis Märkisch Oderland) (L. ZAUMSEIL)	1386
B31: Wasserversorgung der Stadt Berlin (Müggelsee, Tegeler See) (B. EMSHOFF, A. MÜLLER, C. SOMMER-VON JARMERSTED, J. THIERBACH & J. WURL)	1359	B39: Kartierungswerk Naturraumerkundung in der Glaziallandschaft von Chorin (D. KOPP & A. KONOPATZKY)	1388
B32: Hydrogeographie des Teupitz-Köriser Seengebiets (O. MIETZ, J. MARCINEK & H. VIETINGHOFF)	1366	B40: Glaziale Landschaften unter militärischer Nutzung – Truppenübungsplatz Döberitz bei Berlin (H. BARSCH & K. GRUNEWALD)	1390
B33: Versalzungsstellen der Nuthe-Niederung südlich von Berlin (H.-D. KRAUSCH & W. SCHIRRMEISTER)	1368	B41: Landschaftsentwicklung der Altmoränen des Nördlichen Fläming nach militärischer Nutzung (F. SCHRADER)	1392
B34: Geoökologie im Jungmoränengebiet südwestlich von Berlin (O. BLUMENSTEIN)	1370	B42: Prähistorische Übersichtsexkursion Berlin (K. GOLDMANN)	1395
B35: Rieselfelder im Nordosten Berlins – ökologische Probleme (G. GINZEL)	1374	B43: Morphologie, Baugrund und die historisch-genetische Bebauung Berlins (G. SCHULZ)	1397
B36: Das Schorfheide-Chorin Biosphärenreservat (M. WALTHER)	1376	B44: Telegrafenberg – GeoForschungsZentrum (J. F. W. NEGEDANK)	1399
B37: Mülldeponien und Abwasserproblematik im Berliner Raum (K.-J. THOMÉ-KOZMINSKY)	1381	B45: Nördliche Inlandvergletscherung in Brandenburg (J. MARCINEK mit Beiträgen von: F. BROSE, S. BUSSEMER, P. GÄRTNER, M. HANNEMANN, W. NOWEL & N. SCHLAAK)	1402

Contents

<p>Summary 15</p> <p>1st Day: July 20 15</p> <p>2nd Day: July 21 (J. MANGERUD & E. LARSEN)</p> <p>Stops 1–3: Shorelines on the islands of Vigra and Valderøy, W of Ålesund 15</p> <p>Stop 4: The Skjonghelleren cave – Early to Late Weichselian stadial and interstadial sediments 16</p> <p>Stop 5: Coring lake Lerstadvatn 16</p> <p>Stop 6: The Skorgenese gravel pit 16</p> <p>Stop 7: Vestrefjorden – DeGeer type moraines 16</p> <p>Stop 8: The Hamnsundhelleren cave 16</p> <p>Stop 9: Shellbearing till 16</p> <p>Stop 10: Slettebakkjønn 17</p> <p>3rd Day: July 22</p> <p>Stop 11: Magerholm – View of the “Sunnmøre Alps” 17</p> <p>Stop 12: Sykkylven 17</p> <p>Stop 13: Hellesylt – Geiranger 17</p> <p>Stop 14: Dalsnibba, 1,465 m a. s. l. 17</p> <p>Stop 15: Grotli mountain 17</p> <p>4th Day: July 23 (O. F. BERGERSEN, S. HALDORSEN & M. THORESEN)</p> <p>Stop 16 18</p> <p>Stop 17: Randverk 18</p> <p>Stop 18: Lalm 18</p> <p>Stop 19: Stenseng 19</p> <p>Stop 20: Hauglia – “Mammoth pit” 19</p> <p>5th Day: July 24 (O. F. BERGERSEN, S. HALDORSEN & M. THORESEN)</p> <p>Stop 21: Sorperoa 19</p> <p>Stop 22: Favang 19</p>	<p>6th Day: July 25 (S. S. PEDERSEN & K. S. PETERSEN)</p> <p>W-Denmark: Late Quaternary stratigraphy and geomorphology 20</p> <p>Stop 23: Hirtshals – Coastal profile with Older Yoldia Clay 21</p> <p>Stop 24: Lønstrup Klint – Glaciotectonic imbricated fan in coastal cliff section 21</p> <p>Stop 25: Skarrehege – mo-clay pit with glaciotectonic deformation and local geological museum Skarrehege 23</p> <p>Stop 26: Hanklit – Coastal cross section through glaciotectonic composite ridge system 23</p> <p>7th Day: July 26 (S. S. PEDERSEN & K. S. PETERSEN)</p> <p>Stop 27: Bovbjerg – Coastal cliff with cross section of the Main Stationary Line 24</p> <p>Stop 28: Dollerup Bakker and Hald Sø – Tunnelvalley and topmost part of the Alheden sandur cone 26</p> <p>8th Day: July 27</p> <p>Stop 29: Morsum – The cliff section (R. KÖSTER) 28</p> <p>Stop 30: Braderup – Early Pleistocene (F. GRUBE) 29</p> <p>Stop 31: Kampen – Kliffende (R. KÖSTER) 30</p> <p>9th Day: July 28 (M. WALTHER)</p> <p>Some general remarks about the Weichselian development of the landscape of the northern parts of Schleswig-Holstein 31</p> <p>Stop 32: The Arenholz esker and maximal Weichselian ice-cover in the northern parts of Schleswig-Holstein 36</p> <p>Stop 33: Litho-, morpho- and pedostratigraphical investigations in the sand pit of Margarethenwall near Schleswig 38</p> <p>Stop 34: Cliff section of Weseby – Weichselian sandur and special sedimentation features 41</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Stop 35: Lateglacial and Holocene aeolian dynamics of the landscape west of Owschlag	44	Stop 44: The Glowe cliff / NW-Jasmund	54
10th Day: July 29		Stop 45 : The Kleiner Klüsser cliff, SE of Wittow	56
Stop 36: The Heiligenhafen cliff (H.-J. STEPHAN)	46	13th Day: August 1 (W. SCHUMACHER)	
Stop 37: Kalkberg Mountain Segeberg (P. ROSS)	47	The Pleistocene deposits of the Isle of Usedom	58
Stop 38: Sinkhole district of Stipsdorf (H.-J. STEPHAN & P. ROSS)	48	Stop 46: Koserow – Pleistocene lithology and lithostratigraphy along the cliff section of the Isle of Usedom	60
11th Day: July 30		Stop 47: Ückeritz – Pleistocene lithology and defomation structures; Holocene coast development	61
Introduction (N. RÜHBERG & U. STRAHL)	49	Stop 48: Kamminke – Holocene coast development, sea level changes, climatic fluctuations	61
Stop 39: The western part of the cliff of the Isle of Poel (N. RÜHBERG)	49	14th Day: August 2 (M. WALTHER)	
Stop 40: The push-moraine complex of the Kühlung (northern slope) (N. RÜHBERG)	52	Stop 49: Gr. Rummelsberg – Weichselian stratigraphy and glacial series (sandur, endmoraines and drumlins) of the Pommeranian Stage in the surroundings of Joachimsthal and Parstein lake	61
Stop 41: The church of Bad Doberan (N. RÜHBERG)	52	Stop 50: Pehlitz Laake – Late Weichselian and Early Holocene lake sedimentation in lake Parstein and its surrounding lakes	61
Stop 42: The cliff section of Stoltera (U. STRAHL)	52	References	62
12th Day: July 31 (W. PANZIG)			
Stop 43: The Jasmund cliff N of Saßnitz – an outline	53
