Foreword (W. SCHIRMER)	1432	Stop 12: Museum at Eberdingen-Hochdorf, Kr. Ludwigsburg, Baden-Württemberg (J. BIEL)	1481
Introduction (B. FRENZEL)	1433	Stop 13: A palaeolithic site in Middle Pleistocene travertines of Stuttgart-Münster (E. WAGNER)	1485
Glacial-interglacial sequences in eastern Germany		Stop 14: Holocene history of the river Danube in the vicinity of Ulm: Human impact versus climatic change (B. FRENZEL)	1487
Stop 1: The warm-climate period of Neumark-Nord, Geiseltal (D. MANIA & M. THOMAE)	1434	The Riss valley longitudinal section (D. ELLWANGER)	1491
Stop 2: Bilzingsleben (Northern Thuringia) (D. MANIA)	1439	Stop 15: Gravel pit near Baltringen	1491
Stop 3: Loess sequence in the former brickyard Körner/Thuringia (A. WÄTZEL)	1441	Stop 16: Riß type locality, gravel pit Scholterhaus to the north of Biberach	1491
Stop 4: Weimar-Ehringsdorf – Travertine quarry (D. SCHÄFER)	1444	Stop 17: Sequence of Würmian deposits near Wattenweiler, Riß valley (Oberes Rißtal), south of the Riß type locality	1492
Stop 5: Main River – example for valley bottom development (W. SCHIRMER)	1447	Stop 18: Würm Supermaximum at Ingoldingen, gravel pit a & b	1492
Middle and Upper Pleistocene hominid occupation in the Neuwied Basin (Rhineland) (S. GAUDZINSKI, M. STREET & E. TURNER)		Stop 19: Viewpoint “Äußere Jungendmoräne”, main moraine ridge of the Rheingletscher, near Ingoldingen/Steinhausen	1492
Stop 6: The Kärlich clay pit	1449	Rhein glacier basin	
Stop 7: Middle Palaeolithic sites from the Penultimate and Last Glacial in the Neuwied Basin	1452	Stop 20: Is the Eemian interglacial the equivalent of the Riß/Würm warm period? The Krumbach site (B. FRENZEL)	1492
Late Middle Pleistocene volcano sites	1455	Stop 21: Glacial basin of Hoßkirch (D. ELLWANGER & W. BLUDAU)	1496
Stop 8: Upper Pleistocene volcano sites	1462	Stop 22: Deckenschotterplateau of Höchsten/ Heiligenberg, fluvial, glacial and lacustrine deposits of the Deckenschotter complex of the Rheingletscher (D. ELLWANGER)	1496
Stop 9: Evidence for late Allerød ecology and human activities conserved by Laacher See tephra: Miesenheim 2, Miesenheim 3, Miesenheim 4, Thür, Bassenheim, Ochtendung, Polch, Kobern and Nickenich	1469	Stop 23: Settlement and landscape change in the Neolithic and Bronze Age times of the Southwest German Alpine Foreland (H. SCHLICHATHERLE)	1497
Interglacials and man in southwestern Germany		Glacial-interglacial sequences in eastern France	
Stop 10: Upper Quaternary stratigraphy and river development in the Oberrheingraben area. Museum Darmstadt (B. FRENZEL)	1475	Stop 24: The Grande Pile peat bog and its paleoclimatic environment (G. SERET)	1504
Stop 11: The Palaeolithic site of Mauer (L. ZÖLLER & G. A. WAGNER)	1478		

Stop 25: The Jura range (Besançon-Les Echets): The internal morainic complex (H. RICHARD, M. CAMPY, M. MAGNY & P. PÉTREQUIN)	1507	Stop 32: The significance of the present role of <i>Pinus sylvestris</i> in Margeride and throughout the upper basin of the Loire (M. REILLE)	1524
Stop 26: The lake of Chalain (H. RICHARD, M. CAMPY, M. MAGNY & P. PÉTREQUIN)	1508	Stop 33: Brameloup. The last glaciation and vegetation history in Aubrac from the Würm Pleniglacial to the present (J.-L. DE BEAULIEU, A. DE GOER DE HERVE & M. REILLE)	1526
Stop 27: Lake of Onoz (H. RICHARD, M. CAMPY, M. MAGNY & P. PÉTREQUIN)	1509	Late Pliocene to Early Pleistocene evolution of Languedoc environments (P. AMBERT, S. LEROY, P. ROIRON & J. P. SUC)	1530
Stop 28: Les Echets peat-bog and the eastern Lyon region (J.-L. DE BEAULIEU, P. MANDIER & M. REILLE)	1511	Stop 34: Millau travertine sequences	1530
Stop 29: Lac de St-FRONT (V. ANDRIEU, E. BONIFAY, M. REILLE, A. RIHOUIATH & N. THOUVENY)	1513	Stop 35: Late Pliocene pollen and leaf floras from the Bernasso paleolake	1535
Stop 30: Lac du Bouchet (J.-L. DE BEAULIEU, E. BONIFAY, M. REILLE & N. THOUVENY)	1518	Stop 36: Saint-Macaire, a Lower Pleistocene glacial phase in the Languedoc coastal plain	1538
Stop 31: Praclaux maar (J.-L. DE BEAULIEU, M. REILLE & N. THOUVENY)	1522	General conclusions (B. FRENZEL)	1541
		Addresses	1543
