About the Arne Ryde Foundation ix

Preface xi

Acknowledgments xv

- 1 The First Two Phases of General Equilibrium Theory 1**
  - 1.1 Introduction 1
  - 1.2 The Arrow-Debreu Model: Assumptions and Notation 2
  - 1.3 First Phase, or Rational General Equilibrium Theory 8
  - 1.4 Second Phase, or Modern General Equilibrium Theory 11
  - 1.5 Limitations of Modern General Equilibrium Theory 13
  - 1.6 Limitations of the Absolute Perspective 16
  - 1.7 Notes and Comments 17
  
- 2 The Equilibrium Manifold and the Natural Projection 21**
  - 2.1 Introduction 21
  - 2.2 Equilibrium Manifold 21
  - 2.3 Mathematical Parenthesis: Smooth Maps and Related Concepts 23
  - 2.4 Smooth Manifold Structure of the Equilibrium Manifold 28
  - 2.5 Natural Projection 30
  - 2.6 Structure of the Equilibrium Manifold over the Set of Regular Economies 32
  - 2.7 Genericity of Regular Economies 38
  - 2.8 Economies with a Large Number of Equilibria 39
  - 2.9 Conclusion 43
  - 2.10 Notes and Comments 44
  
- 3 The Set of No-Trade Equilibria 45**
  - 3.1 No-Trade Equilibria 45
  - 3.2 Structure of the Set of No-Trade Equilibria 46

3.3	The Two Theorems of Welfare Economics Revisited	51
3.4	Notes and Comments	53
<b>4</b>	<b>The Global Structure of the Equilibrium Manifold</b>	<b>55</b>
4.1	Some Mathematical Concepts	56
4.2	Linear Fibers of the Equilibrium Manifold	59
4.3	Global Properties of the Equilibrium Manifold	63
4.4	Coordinates for the Equilibrium Manifold	65
4.5	Applications of the Coordinate Systems	70
4.6	Application to the Natural Projection	73
4.7	Regular Equilibria and Their Genericity	76
4.8	Application to Some Properties of Equilibria	79
4.9	Conclusion	84
4.10	Notes and Comments	85
<b>5</b>	<b>The Equilibrium Equation and Its Geometric Interpretation</b>	<b>89</b>
5.1	Introduction	89
5.2	Geometric Formulation of the Equilibrium Equation	90
5.3	Geometric Interpretation	92
5.4	Structure of the Section Manifold $B(r)$	97
5.5	Another Useful Diffeomorphism Involving the Section Manifold	97
5.6	Indirect Utility Functions	99
5.7	Section Manifold and Indirect Utilities: Special Case $(\ell, m) = (2, 2)$	104
5.8	Section Manifold and Indirect Utilities: General Case	107
5.9	Geometric Equilibrium Manifold	112
5.10	Application of the Geometric Approach to Genericity	113
5.11	Global Properties of the Geometric Equilibria	116
5.12	Number and Determinateness of Equilibria	122
5.13	Conclusion	123
5.14	Notes and Comments	123
<b>6</b>	<b>Economies with Price-Dependent Utility Functions</b>	<b>125</b>
6.1	Introduction	125
6.2	Consumer's Theory with Price-Dependent Utility Functions	126
6.3	Equilibrium Manifold	132
6.4	Natural Projection	133
6.5	Conclusion	136
6.6	Notes and Comments	137

<b>7</b>	<b>Out-of-Equilibrium Price Dynamics</b>	<b>139</b>
7.1	Introduction	139
7.2	Structure of the Exchange Process	140
7.3	Scenario: Endogenous Money Creation	141
7.4	Alternative Scenario: Fiat Money, Bid and Selling Prices Endogenously Determined	142
7.5	<i>D</i> -Dynamics (Discrete Time)	143
7.6	<i>C</i> -Dynamics (Continuous Time)	144
7.7	Classes of <i>C</i> -Stable Equilibria	146
7.8	Pathconnectedness of the Set of Extended <i>C</i> -Stable Equilibria	149
7.9	Conclusion	152
7.10	Notes and Comments	153
<b>8</b>	<b>Economic Fluctuations and the Arrow-Debreu Model</b>	<b>155</b>
8.1	Introduction	155
8.2	Intertemporal Arrow-Debreu Model	157
8.3	Long-Run Equilibria: Fully Unrestricted Case	162
8.4	Long-Run Equilibria: Fully Restricted Case	167
8.5	Long-Run Equilibria: General Case	169
8.6	Conclusion	180
8.7	Notes and Comments	181
<b>9</b>	<b>The Temporary Equilibrium Model</b>	<b>183</b>
9.1	Introduction	183
9.2	General Two-Period Model with Financial Assets	184
9.3	The Temporary Equilibrium Model	189
9.4	Properties of Temporary Equilibria	192
9.5	Conclusion	197
9.6	Notes and Comments	197
	<b>Appendix: The Set of Pareto Optima and Its Parameterizations</b>	<b>199</b>
A.1	Sets of Feasible Utility Levels	199
A.2	Classical Optimization Problem for Pareto Optima	202
A.3	The Map $R_k(r, \cdot) : \mathcal{U}_k(r) \rightarrow X^{k+1}$	204
A.4	Set of Pareto Optima and Feasible Utility Levels	207
A.5	Structure of $\mathcal{U}_k(r)$	208
A.6	Application to the Set of Pareto Optima $P(r)$	209
A.7	Making Total Resources Variable: The Set $\mathcal{U}_k$	210
A.8	Set of Pareto Optima $P(r)$ and Boundary of the Set $\mathcal{U}_m(r)$	210

A.9	Parameterization by Welfare Weights	211
A.10	Notes and Comments	214
	References	215
	Index	223
