

Brief Contents

Preface	xxiii	
Chapter 1	Introduction	1
Chapter 2	Matrix Algebra	9
Chapter 3	Probability and Distribution Theory	61
Chapter 4	Statistical Inference	97
Chapter 5	Computation and Optimization	164
Chapter 6	The Classical Multiple Linear Regression Model: Specification and Estimation	210
Chapter 7	Inference and Prediction	271
Chapter 8	Functional Form, Nonlinearity, and Specification	316
Chapter 9	Large-Sample Results and Alternative Estimators for the Classical Regression Model	350
Chapter 10	Nonlinear Regression Models	416
Chapter 11	Nonspherical Disturbances, Generalized Regression, and GMM Estimation	455
Chapter 12	Heteroscedasticity	499
Chapter 13	Autocorrelated Disturbances	525
Chapter 14	Models for Panel Data	557
Chapter 15	Systems of Regression Equations	590
Chapter 16	Simultaneous Equations Models	652
Chapter 17	Regressions with Lagged Variables	712
Chapter 18	Time-Series Models	748
Chapter 19	Models with Discrete Dependent Variables	811
Chapter 20	Limited Dependent Variable and Duration Models	896
Appendix A	Data Sets Used in Applications	953
Appendix B	Statistical Tables	957
