Table of contents

Contributors vii
Preface ix

1. Conscious and unconscious aspects of working memory 1
   Amanda L. Gilchrist and Nelson Cowan

2. Markers of awareness? EEG potentials evoked by faint and masked events, with special reference to the “attentional blink” 37
   Rolf Verleger

3. In search for auditory object representations 71
   István Winkler

4. Representation of regularities in visual stimulation: Event-related potentials reveal the automatic acquisition 107
   István Czigler

5. Auditory learning in the developing brain 133
   Minna Huotilainen and Tuomas Teinonen

6. Neurocomputational models of perceptual organization 147
   Susan L. Denham, Salvador Dura-Bernal, Martin Coath and Emili Balaguer-Ballester

7. Are you listening? Language outside the focus of attention 179
   Yury Shtyrov and Friedemann Pulvermüller

8. Unconscious memory representations underlying music-syntactic processing and processing of auditory oddballs 209
   Stefan Koelsch
9. On the psychophysiology of aesthetics: Automatic and controlled processes of aesthetic appreciation

Thomas Jacobsen

Appendix: Using electrophysiology to study unconscious memory representations

Alexandra Bendixen
