BASIC SCIENCE, SECTION I

Sub-cellular mechanisms of cardiac mechano-electric coupling

| | |
|---|-----------|
| 1. Evolutionary origins of stretch-activated ion channels | <i>3</i> |
| Boris Martinac and Anna Kloda | |
| 2. Stretch-activated channels in the heart | <i>11</i> |
| Frederick Sachs | |
| 3. The mechano-gated K_{2P} channel TREK-1 in the cardiovascular system | <i>19</i> |
| Eric Honoré and Amanda Patel | |
| 4. Cell volume-sensitive ion channels and transporters in cardiac myocytes | <i>27</i> |
| Clive M. Baumgarten, Wu Deng and Frank J. Raucchi, Jr | |
| 5. Non-sarcolemmal stretch-activated channels | <i>35</i> |
| Gentaro Iribe and Peter Kohl | |
| 6. Pacemaker, potassium, calcium, sodium: stretch modulation of the voltage-gated channels | <i>42</i> |
| Catherine E. Morris | |
| 7. Role of caveolae in stretch-sensing: implications for mechano-electric coupling | <i>50</i> |
| Sarah Calaghan | |

| | |
|--|-----------|
| 8. The membrane/cytoskeleton interface and stretch-activated channels | <i>57</i> |
| Thomas M. Suchyna and Frederick Sachs | |
| 9. Cardiomyocyte stretch-sensing | <i>66</i> |
| Michiel Helmes and Henk Granzier | |
| 10. The response of cardiac muscle to stretch: calcium and force | <i>74</i> |
| John Jeremy Rice and Donald M. Bers | |
| 11. Stretch effects on second messengers | <i>81</i> |
| Jean-Luc Balligand and Chantal Dessy | |
| 12. Functional implications of myocyte architecture | <i>87</i> |
| Kevin Kit Parker | |

BASIC SCIENCE, SECTION II

Cellular manifestations of cardiac mechano-electric coupling

| | |
|--|------------|
| 13. Mechanical modulation of pacemaker electrophysiology | <i>95</i> |
| Patricia J. Cooper and Ursula Ravens | |
| 14. Mechano-electric coupling in working cardiomyocytes: diastolic and systolic effects | <i>103</i> |
| Michael R. Franz | |
| 15. Mechano-sensitivity of pulmonary vein cells: implications for atrial arrhythmogenesis | <i>110</i> |
| Chang Ahn Seol, Won Tae Kim, Jae Boum Youm, Yung E. Earm and Chae Hun Leem | |

| | | | |
|---|-----|---|-----|
| 16. Heterogeneity of sarcomere length and function as a cause of arrhythmogenic calcium waves | 117 | 26. Mechanical triggers of long-term ventricular electrical remodelling | 187 |
| Henk E.D.J. ter Keurs, Ni Diao, Nathan P. Deis, Mei L. Zhang, Yoshinao Sugai, Guy Price, Yuji Wakayama, Yutaka Kagaya, Yoshinao Shinozaki, Penelope A. Boyden, Masahito Miura and Bruno D.M. Stuyvers | | Darwin Jeyaraj and David S. Rosenbaum | |
| 17. Cellular mechanisms of arrhythmogenic cardiac alternans | 125 | 27. Mechanisms of mechanical pre- and postconditioning | 193 |
| Kenneth R. Laurita | | Asger Granfeldt, Rong Jiang, Weiwei Shi and Jakob Vinten-Johansen | |
| 18. Remodelling of gap junctions in ventricular myocardium, effects of cell-to-cell adhesion, mediators of hypertrophy and mechanical forces | 132 | TRANSLATIONAL SCIENCE, SECTION IV | |
| André G. Kléber and Jeffrey E. Saffitz | | Integrated model systems to study specific cases of cardiac MEC and arrhythmias | |
| 19. The origin of fibroblasts, extracellular matrix and potential contributions to cardiac mechano-electric coupling | 138 | 28. Mechano-electric coupling in chronic atrial fibrillation | 203 |
| Troy A. Baudino and Thomas K. Borg | | Ulrich Schotten | |
| 20. Advantages and pitfalls of cell cultures as model systems to study cardiac mechano-electric coupling | 143 | 29. Mechanically induced pulmonary vein ectopy: insight from animal models | 212 |
| Leslie Tung and Susan A. Thompson | | Omer Berenfeld | |
| BASIC SCIENCE, SECTION III | | 30. Regional variation in mechano-electric coupling: the right ventricle | 217 |
| Multi-cellular manifestations of mechano-electric coupling | | Ed White, David Benoist and Olivier Bernus | |
| 21. Activation sequence of cardiac muscle in simplified experimental models: relevance for cardiac mechano-electric coupling | 153 | 31. Mechanical induction of arrhythmia in the <i>ex situ</i> heart: insight into <i>Commotio cordis</i> | 223 |
| Vladimir S. Markhasin, Alexander Balakin, Yuri Protsenko and Olga Solovyova | | Frank Bode and Michael R. Franz | |
| 22. Mechanical triggers and facilitators of ventricular tachy-arrhythmias | 160 | 32. Arrhythmias in murine models of the mechanically impaired heart | 227 |
| T. Alexander Quinn and Peter Kohl | | Larissa Fabritz and Paulus Kirchhof | |
| 23. Acute stretch effects on atrial electrophysiology | 168 | 33. Studying cardiac mechano-sensitivity in man | 234 |
| Michael R. Franz and Frank Bode | | Flavia Ravelli and Michela Masè | |
| 24. Stretch effects on potassium accumulation and alternans in pathological myocardium | 173 | 34. Mathematical models of cardiac structure and function: mechanistic insights from models of heart failure | 241 |
| Christian Bollensdorff and Max J. Lab | | Vicky Y. Wang, Martyn P. Nash, Ian J. LeGrice, Alistair A. Young, Bruce H. Smaill and Peter J. Hunter | |
| 25. The effects of wall stretch on ventricular conduction and refractoriness in the whole heart | 180 | 35. Mathematical models of human atrial mechano-electrical coupling and arrhythmias | 251 |
| Robert W. Mills, Adam T. Wright, Sanjiv M. Narayan and Andrew D. McCulloch | | Elizabeth M. Cherry | |
| | | 36. Mathematical models of ventricular mechano-electric coupling and arrhythmia | 258 |
| | | Natalia A. Trayanova, Viatcheslav Gurev, Jason Constantino and Yuxuan Hu | |

CLINICAL RELEVANCE, SECTION V

Pathophysiology of cardiac mechano-electric coupling: general aspects

37. **Load dependence of ventricular repolarization** 269
Peter Taggart and Peter Sutton
38. **Is the U wave in the electrocardiogram a mechano-electrical phenomenon?** 274
Rainer Schimpf and Martin Borggrefe
39. **Mechanical modulation of cardiac function: role of the pericardium** 281
John V. Tyberg
40. **Mechanically induced electrical remodelling in human atrium** 290
Geoffrey Lee, Prashanthan Sanders, Joseph B. Morton and Jonathan M. Kalman
41. **Drug effects and atrial fibrillation: potential and limitations** 298
Jurren M. van Opstal, Yuri Blaauw and Harry J. G.M. Crijns
42. **Stretch as a mechanism linking short- and long-term electrical remodelling in the ventricles** 305
Eugene A. Sosunov, Evgeny P. Anyukhovskiy and Michael R. Rosen
43. **Volume and pressure overload and ventricular arrhythmogenesis** 313
Michiel J. Janse and Ruben Coronel
44. **Stretch effects on fibrillation dynamics** 318
Masatoshi Yamazaki and Jérôme Kalifa

CLINICAL RELEVANCE, SECTION VI

Pathophysiology of cardiac mechano-electric coupling: specific cases

45. **Commotio Cordis: sudden death from blows to the chest wall** 325
Mark S. Link
46. **Repolarization changes in the synchronously and dyssynchronously contracting failing heart** 330
Takeshi Aiba and Gordon F. Tomaselli
47. **Ventricular arrhythmias in heart failure: link to haemodynamic load** 340
Steven N. Singh and Pamela Karasik

48. **Mechanical heterogeneity and after contractions as trigger for Torsades de Pointes** 345
Annerie M.E. Moers and Paul G.A. Volders
49. **Stretch-induced arrhythmias in ischaemia** 352
Ruben Coronel, Natalia A. Trayanova, Xiao Jie and Michael J. Janse

CLINICAL RELEVANCE, SECTION VII

Mechano-electric coupling as a mechanism involved in therapeutic interventions

50. **Anti-arrhythmic effects of acute mechanical stimulation** 361
Tommaso Pellis and Peter Kohl
51. **Termination of arrhythmias by haemodynamic unloading** 369
Peter Taggart and Peter Sutton
52. **Mechanical modulation of defibrillation and resuscitation efficacy** 374
Derek J. Dossall, Harish Doppalapudi and Raymond E. Ideker
53. **Anti- and proarrhythmic effects of cardiac assist device implantation** 381
Paul J. Joudrey, Roger J. Hajjar and Fadi G. Akar
54. **Anti- and proarrhythmic effects of cardiac resynchronisation therapy** 387
Nico H.L. Kuijpers and Frits W. Prinzen

CLINICAL RELEVANCE, SECTION VIII

Evidence for mechano-electric coupling from clinical trials

55. **Evidence for mechano-electric coupling from clinical trials on AF** 395
Matthias Hammwöhner and Andreas Goette
56. **Evidence for mechano-electric coupling from clinical trials on heart failure** 402
Paulus Kirchhof and Günter Breithardt
57. **Mechano-electric coupling and the pathogenesis of arrhythmogenic right ventricular cardiomyopathy** 407
Hayden Huang, Angeliki Asimaki, Frank Marcus and Jeffrey E. Saffitz

| | | | |
|--|-----|---|-----|
| 58. Evidence for mechano-electric coupling from clinical trials on cardiac resynchronisation therapy | 412 | 62. Distributions of myocyte stress, strain and work in normal and infarcted ventricles | 442 |
| Nico R.L. Van de Veire and Jeroen J. Bax | | Elliot J. Howard and Jeffrey H. Omens | |
| 59. Mechano-electric coupling in patients treated with ventricular assist devices: insights from individual cases and clinical trials | 420 | 63. Evolving concepts in measuring ventricular strain in canine and human hearts: non-invasive imaging | 450 |
| Cesare M. Terracciano, Michael Ibrahim, Manoraj Navaratnarajah and Magdi H. Yacoub | | Elisa E. Konofagou and Jean Provost | |
| OUTLOOK, SECTION IX | | 64. Evolving concepts in measuring ventricular strain in the human heart: impedance measurements | 456 |
| Novel directions in cardiac mechano-electric coupling | | Douglas A. Hettrick | |
| 60. Measuring strain of structural proteins <i>in vivo</i> in real time | 431 | 65. Mechano-sensitive channel blockers: a new class of antiarrhythmic drugs? | 462 |
| Fanjie Meng and Frederick Sachs | | Ed White | |
| 61. Roles of cardiac SAC beyond mechano-electric coupling: stretch-enhanced force generation and muscular dystrophy | 435 | Index | 469 |
| David G. Allen and Marie L. Ward | | | |
