

Contents

<i>Preface</i>	v
Introduction: Mycorrhizal symbiosis	1

PART 1: KINDS OF MYCORRHIZA

Section 1: Vesicular-arbuscular Mycorrhiza

1 The symbionts	15
2 The development of infection and anatomy of vesicular-arbuscular mycorrhizas	32
3 Carbon metabolism and growth	64
4 Mineral nutrition	77

Section 2: Ectomycorrhiza

5 The symbionts	104
6 Structure of ectomycorrhiza	117
7 Growth physiology of ectomycorrhizal fungi	145
8 Production of metabolites by ectomycorrhizal fungi	170
9 Growth and carbon metabolism of ectomycorrhizal plants	183
10 Physiology of ectomycorrhizas. Nutrient uptake	201
11 Ectendomycorrhizas in conifers	231

Section 3: Mycorrhiza in Ericales

12 Ericoid mycorrhizas	237
13 Arbutoid and monotropoid mycorrhizas	257

Section 4: Orchid Mycorrhizas

14 Orchid mycorrhizas	268
-----------------------	-----

PART 2: ESSAYS ON MYCORRHIZAL SUBJECTS

15	The causal anatomy of ectomycorrhizas	299
16	Translocation in mycorrhizal fungi	317
17	Transfer of metabolites between symbionts in mycorrhizal associations	339
18	Specificity and recognition in symbiotic systems	357
19	Ecological aspects of mycorrhizal symbiosis	387
	<i>References</i>	409
	<i>Index</i>	463
