

# CONTENTS

---

## **Part 1. Continuous Image Characterization**

- |   |    |
|---|----|
| 1. Mathematical Characterization of Continuous Images | 3  |
| 2. Psychophysical Properties of Vision                | 25 |
| 3. Photometry and Colorimetry                         | 50 |

## **Part 2. Digital Image Characterization**

- |   |     |
|---|-----|
| 4. Image Sampling and Reconstruction                | 93  |
| 5. Mathematical Characterization of Discrete Images | 121 |
| 6. Image Quantization                               | 140 |
| 7. Sampled Image Quality Measures                   | 162 |

## **Part 3. Discrete Two-Dimensional Linear Processing**

- |  |     |
|--|-----|
| 8. Linear Operators                              | 201 |
| 9. Superposition Operator                        | 214 |
| 10. Two-Dimensional Unitary Transforms           | 232 |
| 11. Two-Dimensional Linear Processing Techniques | 279 |

## **Part 4. Image Enhancement and Restoration**

- |  |     |
|--|-----|
| 12. Image Enhancement                                | 307 |
| 13. Image Restoration Models                         | 345 |
| 14. Algebraic Spatial Image Restoration Techniques   | 378 |
| 15. Specialized Spatial Image Restoration Techniques | 426 |
| 16. Luminance, Color, and Spectral Image Restoration | 447 |

## **Part 5. Image Analysis**

- |                                      |     |
|--------------------------------------|-----|
| 17. Image Feature Extraction         | 471 |
| 18. Symbolic Image Description       | 514 |
| 19. Image Detection and Registration | 551 |
| 20. Image Understanding Systems      | 568 |

**Part 6. Image Coding**

21. Analog Processing Image Coding	591
22. Digital Point Processing Image Coding	616
23. Digital Spatial Processing Image Coding	662
24. Image Coding Performance Analysis	710

**Appendix**

1. Selected References	733
2. Color Coordinate Conversion	736
3. Statistical Source Coding	741
