Topic: Virtual Worlds ..................................................................................42
Sobieraj, Krämer: What makes a virtual face attractive? – On the impact of physical attractiveness in virtual contexts .................................................................42
Tudor, Pöschl, Döring: Nonverbal behavior of virtual humans: Representing emotions in CAVE automatic virtual environments ..................................................42
Hoffmann, Krämer: How users perceive robots and screen animations in cognitive tasks and emotional conversations .......................................................... 43
Klatt, Hoffmann, Haferkamp, Lam-chi, Krämer: It is just a matter of view - The influence of point of view on the perception of virtual group discussions ............. 44
Engelmann, Dingel: The impact of situational circumstances on the decision of virtual groups .......................................................... 44

**Topic: Media, Gender, and Personality** .................................................. 46

Haupenthal, Schwab: Sex, sex roles, hormones, personality and reading preferences .......................................................................................... 46
Helfgen, Schwab, Königstorfer: Hand(i/y)cap? - Mobile phone usage as sexual signaling .......................................................................................... 46
Blumer, Döring: Are we the same online? Personality and transsituational consistency on the Internet ........................................................................ 47

**Topic: Children and Adolescents** ............................................................... 48

Batinic: Parent-adolescent communication quality and the relationship between adolescents' internet use and psychosocial problems .................................. 48
Völkel, Ohler: Understanding pictures as one of the first competences in symbol use .......................................................................................... 48
Grunow, Schwab, Unz: Why do they watch ...? A uses and gratifications-perspective on selection of scientific TV- programs among teenagers ......................... 49

**Topic: Methods** .................................................................................. 50
Schreier, Odag: In support of a qualitative turn in media psychology .............. 50
Holtz: Analyzing internet forums: Exploring a new data source for social scientific research ........................................................................ 52

**Topic: Media and Cognition** ............................................................... 53

Eimler, Krämer, Schramm: What's on a blog reader's mind? - A study on person perception and the evaluation of text quality .................................................. 53
Winter, Krämer, Neubaum, Appel: Lost in the Web? – The effect of information complexity and cognitive abilities on the selection of online science articles ........................................ 53
Bacherte, Scheider, Retzbach: Distracted by dynamic measures? Real-time response measurement or camera observation do not impair affective and cognitive information .................................................................. 54

**Topic: Social Networks** ............................................................... 55
Reinecke, Trepte: Self-disclosure in the Social Web: A three-wave panel study on the effects of social network site use on online self-disclosure .............................................. 55
Ganster, Krämer, Walther: The impact of user comments posted on commercial Facebook profiles with particular focus on processes of social identification .............. 55
Moser: The individual identity status as a predictor for modes and motives of participation on Social Network Sites ........................................................................ 56
Neubaum, Krämer, Fromm: Persuasion 2.0: Does the human touch frame of private HIV-weblogs persuade recipients to show a preventive health behavior? .... 57
Bordin-Sandmeyer, Schwab, Unz: Courtship 2.0 – Who's creative is good, awhile .......................................................................................... 58

**Topic: Media and Violence** ............................................................... 59

Bartsch: Meaningful violence? The role of perceived meaningfulness in individuals'
experience of media violence .................................................................59

Melzer, Pfannkuchen: Violent game lovers are lacking the critical view: Aspects of media literacy and the preference for violent video games .................................................................59

Stodt: Cyberbullying: What helps to stay calm and confident in a teasing situation? .................................................................60

Porsch, Pieschl: "Victim, bully or both, that is the question!" Cyber-bullying among German secondary school students in 2009 and 2010 ........................................................................61

Polzer: Bringing light into the victim/aggressor problem of cyberbullying .................................................................61

Poster Presentations: Motivation, Emotion, and the Media .................................................................63

Bagdasaryan, Ovchar, Odağ: Culture and emotion: A study of differences in emotion displays between English and German football fans .................................................................63

Eigenfeld, Binder, Odağ: Qualitative study of underlying motivations of selecting negative media content........................................................................63

Küster: Active usage vs. passive reception: Differences in media enjoyment, cognitive and physiological effects of violent entertainment ........................................................................64

Küster: Measuring cyberemotions: How do bodily responses relate to the digital world? ........................................................................65

Pehrs: Music modulates the emotional reaction on kissing scenes ........................................................................65

Poster Presentations: Media and Cognition .................................................................67

Galpin: Assessing young children's cognitive, emotional and behavioural engagement with interactive media ........................................................................67

Münzer, Malone: Facilitating effects of dynamic visualizations for low ability individuals and novices ........................................................................67

Retzbach, Schneider, Maier: Digital signage as internal corporate media: A good way to transfer knowledge? ........................................................................68

Schreder: Computer self-efficacy in the use of digital technologies ........................................................................69

Stengel, Rahnke, Vogel, Maier: A comparison of journalistic depiction and recipients' perception of news factors – The case of the Congo crisis ........................................................................69

Poster Presentations: Digital Media and Video Games .................................................................71

Breuer, Scharkow, Quandt: Tunnel vision or spectator mode? - The effects of watching versus playing a violent video game on immersion and perceived violence ........................................................................71

Pauls: Clinical relevance of internet and video game addiction – a nationwide study surveying German health professionals ........................................................................71

Pöschl, Jung-Böhmcker, Döring: Virtual training for fear of public speaking – Design of an audience for immersive virtual environments ........................................................................72

Riethmüller, Boos: You did that well! :) The effects of smileys and evaluative language in positive, specific e-mail feedback ........................................................................73

Vujovic, Tsankova, Kappas, Küster: Avatars in a "nonymous" vs. anonymous online setting ........................................................................73

Story Net: Sympathy for the Devil? Norm Violations and Antihero Narratives .................................................................75

Raney, Janicke, Schmid, Shafer: Considering the appeal of antihero narratives: Toward a theoretical framework ........................................................................75

Maleckar, Giles, Zawisza: Cognitive and emotional components of readers' engagement with story characters ........................................................................75

Hastall, Bilandzic: Violations of social norms in narratives: A content-analysis approach to identify moral patterns in popular television programs ........................................................................76
Rothmund, Baumert: The self in the story – Can negative moral self-evaluations be triggered by narrative fiction? .......................... 78
Appel, Richter, Calio: Stories can influence your self-concept: Transportation as a moderator ......................................................... 78

Suckfüll: Film as process - Events, patterns, effects ............................................. 80
Sukalla, Bilandzic, Busselle, Yan: Delineating narrative engagement .................. 80
Kalch, Bilandzic: The effectiveness of narrative public service announcements embedded in narrative television programs .................. 81

Klimmt: Role of interactivity in involvement with interactive stories .................. 82
Bacherie, Hardt, Marker, Matuschek, Maxheim, Shariat: All’s well that ends well? An experimental study on the function of movie ending types for enjoyment ...... 82
Valtin, Liebold, Pietschmann, Ohler: When situation models fail: The cognitive and emotional processing of “Mystery” in TV series and films .................. 83

de Graaf: The interplay of story outcome and identification in narrative persuasion .... 85
Schlemmer, Weigl, Unz: The story-setting-effect in the light of construal-level-theory .......................... 85
Janicke, Raney: The role of transportation in the enjoyment of and narrative persuasion with 3D entertainment ............................................. 86

Vogel: Who wants to have a good cry? Exploring viewer characteristics and gratifications obtained from sad films ............................................. 87
Batenburg, Das: ‘I know how you feel’: Effects of cognitive and emotional sharing of negative experiences in online support groups .......................... 88
Khoo: Coping catharsis: The therapeutic effects of cinematic human drama ........ 88

Frey: Functions and effects of... what? Definitional attributes of ‘narrative’ and their implications for modeling narrative comprehension and experience, its functions and effects ............................................. 90
Herrmann: Conceptions of recipients and their consequences for text and reception ........................................................................ 90
van Leeuwen: A review of literature: Individual factors associated with narrative engageability, narrative engagement and persuasiveness of narratives 92
