The Cambridge Encyclopedia of Language is organized in 11 parts, comprising 65 thematic sections. Each section is a self-contained presentation of a major theme in language study, with cross-references included to related sections and topics.			
<b>Preface to the first edition</b>	vi		
<b>Preface to the second edition</b>	vii		
<b>I Popular ideas about language</b>	<b>1</b>		
Widely held linguistic beliefs and attitudes, and the basic functions of language.			
<b>1 The prescriptive tradition</b>	<b>2</b>		
Popular notions of linguistic authority and correctness; purism and language change; the role of linguistic description.			
<b>2 The equality of languages</b>	<b>6</b>		
Myths about primitive languages and language superiority.			
<b>3 The magic of language</b>	<b>8</b>		
Linguistic superstitions and verbal taboos; the mystical power of proper names.			
<b>4 The functions of language</b>	<b>10</b>		
The many cultural, social, and personal roles which language performs.			
<b>5 Language and thought</b>	<b>14</b>		
The complex relationship between language and thinking; the notion of language relativity.			
<b>II Language and identity</b>	<b>17</b>		
The many ways in which language expresses a person's individuality or social identity.			
<b>6 Physical identity</b>	<b>18</b>		
The relationship between language and age, sex, physical type, and physical condition; voiceprints; male vs female speech.			
<b>7 Psychological identity</b>	<b>22</b>		
The relationship between language and personality, intelligence, and other psychological factors.			
<b>8 Geographical identity</b>	<b>24</b>		
The regional background of a speaker; accents, dialects, linguistic areas, and the study of dialectology.			
<b>9 Ethnic and national identity</b>	<b>34</b>		
Language, ethnicity, and nationalism; the problem of minority languages and dialects.			
<b>10 Social identity</b>	<b>38</b>		
Language and social stratification, class, status, role, solidarity, and distance; the problem of sexism; borrowings.			
<b>11 Contextual identity</b>	<b>50</b>		
Situationally determined varieties of speech and writing; restricted and secret language; verbal play and art; word games.			
<b>12 Stylistic identity and literature</b>	<b>68</b>		
The concept of style; authorship identity and forensic linguistics; literary language in poetry, drama, and prose.			
<b>III The structure of language</b>	<b>83</b>		
The dimensions of language analysis that underlie all forms of language, whether spoken, written, or signed.			
<b>13 Linguistic levels</b>	<b>84</b>		
The relationship between the main components of language analysis; models of linguistic structure.			
<b>14 Typology and universals</b>	<b>86</b>		
Analysing the structural similarities and differences among the languages of the world.			
<b>15 The statistical structure of language</b>	<b>90</b>		
The study of the statistical regularities found in language; the frequency of sounds, letters, and words.			
<b>16 Grammar</b>	<b>92</b>		
Syntax and morphology; the structure of words, phrases, clauses, and sentences.			
<b>17 Semantics</b>	<b>104</b>		
The study of meaning in language; the semantic analysis of words and sentences.			
<b>18 Dictionaries</b>	<b>112</b>		
The use and evaluation of dictionaries; the past, present, and future of lexicography.			
<b>19 Names</b>	<b>116</b>		
Patterns and trends in the use of personal names; place names and their history.			
<b>20 Discourse and text</b>	<b>120</b>		
The study of stretches of spoken and written language above the sentence; the nature of conversation; analysing textual structure.			
<b>21 Pragmatics</b>	<b>124</b>		
The factors that govern our choice of language in social interaction; speech acts and their analysis; effect of the Internet.			
<b>IV The medium of language: speaking and listening</b>	<b>129</b>		
The study of the auditory-vocal channel of communication; the production, transmission, and reception of speech.			
<b>22 The anatomy and physiology of speech</b>	<b>130</b>		
The vocal tract and vocal organs; the nature of articulation.			
<b>23 The acoustics of speech</b>	<b>138</b>		
The nature of sound waves and the way they transmit speech; the sound spectrograph and its use in speech sound analysis.			
<b>24 The instrumental analysis of speech</b>	<b>144</b>		
Some of the techniques used in the analysis of speech acoustics and physiology.			
<b>25 Speech reception</b>	<b>148</b>		
The ear, and the process of hearing; speech perception and its investigation.			
<b>26 Speech interaction with machines</b>	<b>155</b>		
The principles and practice of automatic speech recognition and speech synthesis.			
<b>27 The sounds of speech</b>	<b>160</b>		
Phonetics; the description of vowels and consonants; kinds of phonetic transcription.			
<b>28 The linguistic use of sound</b>	<b>168</b>		
Phonology; phonemes, distinctive features, and other models; comparing the sound systems of languages.			
<b>29 Suprasegmentals</b>	<b>177</b>		
The prosody of speech; the structure of intonation; tone languages; the relationship between speech and music.			
<b>30 Sound symbolism</b>	<b>182</b>		
The relationship between sounds and meaning; the role of onomatopoeia.			
<b>V The medium of language: writing and reading</b>	<b>185</b>		
The study of the development and functions of written language, in all its forms.			
<b>31 Written and spoken language</b>	<b>186</b>		
The relationship between speech and writing; how sound is portrayed in written language.			
<b>32 Graphic expression</b>	<b>190</b>		
The physical substance of written language; types of graphic expression; handwriting, print, typing, and electronic forms.			
<b>33 Graphology</b>	<b>204</b>		
The writing system of a language; the history of writing; the alphabet; spelling, punctuation, and other contrasts; systems of shorthand.			
<b>34 The process of reading and writing</b>	<b>218</b>		
Psychological accounts of the process of reading, writing, and spelling; spelling regularity and spelling reform.			
<b>VI The medium of language: signing and seeing</b>	<b>229</b>		
The development and use of deaf sign languages.			

35	Sign language	230	<b>IX The languages of the world</b>	<b>293</b>	59	World languages	367	
	Popular fallacies about sign language; the development and use of signs by the deaf.		The range of languages in past or present use – numbers, speakers, sources; identifying and explaining linguistic change.			The international use of languages; official languages; World English and its varieties.		
36	Sign language structure	232	47	How many languages?	294	60	Multilingualism	372
	The way signs are used to convey grammatical contrasts; American Sign Language.			Identifying, counting, and classifying the languages of the world			Causes and extent of bilingual attitudes and practice; language maintenance and shift; language switching.	
37	Types of sign language	234	48	How many speakers?	296	61	Language planning	376
	The range of contrived sign languages; finger spelling, cued speech, and other systems.			Determining how many people speak a language; the world's most widely used languages and families.			Government policies about language selection and use; bilingual educational programmes; endangered languages.	
<b>VII</b>	<b>Child language acquisition</b>	<b>237</b>	49	The origins of language	298	62	Foreign language learning and teaching	388
	The study of the way children learn to understand and speak their mother tongue – methods, theories, and findings; later language learning in school.			Myths and experiments about the origins of language; wolf children; humans and primates; the evidence of palaeontology.			The role and status of foreign languages in school and society; theories of language learning, and methods of language teaching; language materials and laboratories.	
38	Investigating children's language	238	50	Families of languages	302	63	Language for special purposes	398
	Techniques for finding out about child language; speech production and comprehension; theories of language acquisition.			Discovering the history of languages; comparative philology; the language families of the world.			The development of special varieties of language in science, medicine, religion, the law, the press, advertising, broadcasting, and the Internet; the related problems of intelligibility and change.	
39	The first year	246	51	The Indo-European family	306	<b>XI</b>	<b>Language and communication</b>	<b>419</b>
	The development of infant vocalization; early speech perception and interaction.			The history of Indo-European languages, where they are spoken, and how they are classified.			The relationship between language and other systems of human and non-human communication, and the scientific study of language.	
40	Phonological development	250	52	Other families	314	64	Language and other communication systems	420
	The acquisition of the sound system; the learning of vowels, consonants, and intonation.			The distribution, family grouping, and use of the world's languages (other than Indo-European).			Language defined; chimpanzee communication; semiotics; communication by non-linguistic sound, face, gesture, and touch.	
41	Grammatical development	252	53	Language isolates	336	65	Linguistics	428
	The acquisition of grammar; growth in sentence length and complexity.			Languages which cannot be related to any of the major families.			The history of ideas in language study; domains and personalities in 20th-century linguistics; linguistic methods; natural language processing.	
42	Semantic development	254	54	Language change	338	<b>Appendices</b>	<b>439</b>	
	The acquisition of vocabulary; first words and their content; distinguishing the meanings of words.			The identification of change in sounds, grammar, and vocabulary; glottochronology; explanations for language change.		<b>I</b>	<b>Glossary</b>	<b>440</b>
43	Pragmatic development	256	55	Pidgins and creoles	344	<b>II</b>	<b>Special symbols and abbreviations used in the encyclopedia</b>	<b>462</b>
	The acquisition of conversational skills; the language of twins.			The origins, distribution, and present-day use of the world's pidgins and creoles.		<b>III</b>	<b>Table of the world's languages</b>	<b>465</b>
44	Language development in school	258	<b>X</b>	<b>Language in the world</b>	<b>351</b>	<b>IV</b>	<b>Further reading</b>	<b>484</b>
	The study of language in school; later oral development; learning to read and write.			The problems of communication posed by the diversity of the world's languages and varieties, and the search for solutions.		<b>V</b>	<b>References</b>	<b>489</b>
<b>VIII</b>	<b>Language, brain, and disability</b>	<b>267</b>	56	The language barrier	352	<b>VI</b>	<b>Index of languages, families, dialects, and scripts</b>	<b>494</b>
	The neurological basis of language, and the range of physical or psychological problems that can give rise to disabilities in spoken, written, or signed language.			The problems caused by foreign languages in the field of international communication; language and the business world.		<b>VII</b>	<b>Index of authors and personalities</b>	<b>498</b>
45	Language and the brain	268	57	Translating and interpreting	354	<b>VIII</b>	<b>Index of topics</b>	<b>501</b>
	Brain structure and function; hemispheric dominance and localization; slips of the tongue and critical periods.			The principles and practice of translating and interpreting; the role of machine translation.			<b>Acknowledgements</b>	<b>514</b>
46	Language disability	274	58	Artificial languages	362			
	Incidence, causation, and classification; deafness, aphasia, dyslexia, dysgraphia; disorders of voice, articulation, and fluency; language delay; alternative communication systems and aids.			The history of artificial languages, and the present-day position; Esperanto, Basic English, and other systems.
