CONTENTS

SUPPLEMENT

A Window into the Reproductive Era Research

Guest Editors

Paolo Emanuele Levi Setti and Irene Cetin

PREFACE

Preface: A window into the reproductive era research

P. E. Levi Setti

S223

PAPERS

Gynecological fertility-sparing surgery

D. Vitobello, G. Siesto, C. Bulletti, A. Accardi and P. E. Levi Setti

S224

Robotics in reproductive surgery: Strengths and limitations

M. Catenacci, R. L. Flyckt and T. Falcone

S232

Surgical measures for endometriosis-related infertility: A plea for research

E. Somigliana, L. Benaglia, P. Viganò, M. Candiani, P. Vercellini and L. Fedele

S238

Benefit and risk of application of European tissue management regulation in ART

G. Scaravelli

S243

New culture devices in ART

L. Rienzi, G. Vajta and F. Ubaldi

S248

Which morphological scoring system is relevant in human embryo development?

M. Montag, J. Liebenthron and M. Köster

S252

Contents continued from outside back cover

- A review of the promises and pitfalls of oocyte and embryo metabolomics**
L. Nel-Themaat and Z. P. Nagy **S257**
- Non-invasive imaging of human embryos to predict developmental competence**
R. A. Reijo Pera **S264**
- Is the polar body approach best for pre-implantation genetic screening?**
J. D. A. Delhanty **S268**
- How endometrial secretomics can help in predicting implantation**
O. Berlanga, H. B. Bradshaw, F. Vilella-Mitjana, T. Garrido-Gómez and C. Simón **S271**

ABSTRACTS

- Abstracts to be presented at SSIF 2011 September Conference** **S276**
