

# Contents

<b>Preface</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Notes . . . . .	18
<b>2 Scalar Conservation Laws</b>	<b>23</b>
2.1 Entropy Conditions . . . . .	24
2.2 The Riemann Problem . . . . .	30
2.3 Front Tracking . . . . .	36
2.4 Existence and Uniqueness . . . . .	44
2.5 Notes . . . . .	56
<b>3 A Short Course in Difference Methods</b>	<b>63</b>
3.1 Conservative Methods . . . . .	63
3.2 Error Estimates . . . . .	81
3.3 A Priori Error Estimates . . . . .	92
3.4 Measure-Valued Solutions . . . . .	99
3.5 Notes . . . . .	112
<b>4 Multidimensional Scalar Conservation Laws</b>	<b>117</b>
4.1 Dimensional Splitting Methods . . . . .	117
4.2 Dimensional Splitting and Front Tracking . . . . .	126
4.3 Convergence Rates . . . . .	134
4.4 Operator Splitting: Diffusion . . . . .	146

4.5	Operator Splitting: Source . . . . .	153
4.6	Notes . . . . .	157
<b>5</b>	<b>The Riemann Problem for Systems</b>	<b>163</b>
5.1	Hyperbolicity and Some Examples . . . . .	164
5.2	Rarefaction Waves . . . . .	168
5.3	The Hugoniot Locus: The Shock Curves . . . . .	174
5.4	The Entropy Condition . . . . .	180
5.5	The Solution of the Riemann Problem . . . . .	188
5.6	Notes . . . . .	200
<b>6</b>	<b>Existence of Solutions of the Cauchy Problem for Systems</b>	<b>205</b>
6.1	Front Tracking for Systems . . . . .	206
6.2	Convergence . . . . .	218
6.3	Notes . . . . .	229
<b>7</b>	<b>Well-Posedness of the Cauchy Problem for Systems</b>	<b>233</b>
7.1	Stability . . . . .	238
7.2	Uniqueness . . . . .	265
7.3	Notes . . . . .	285
<b>A</b>	<b>Total Variation, Compactness, etc.</b>	<b>287</b>
A.1	Notes . . . . .	298
<b>B</b>	<b>The Method of Vanishing Viscosity</b>	<b>299</b>
B.1	Notes . . . . .	312
<b>C</b>	<b>Answers and Hints</b>	<b>315</b>
	<b>References</b>	<b>349</b>
	<b>Index</b>	<b>359</b>
