

CONTENTS

	Preface	ix
✓ 1	Vegetation succession: past and present perceptions J. MILES <i>Institute of Terrestrial Ecology, Banchory Research Station, Hill of Brathens, Glassel, Banchory, Kincardineshire, AB3 4BY, UK</i>	1
2	Modelling successional processes in ecosystems M. B. USHER <i>Department of Biology, University of York, Heslington, York, YO1 5DD, UK</i>	31
3	Contributions of plant population dynamics to understanding early succession A. M. MORTIMER <i>Department of Botany, University of Liverpool, P.O. Box 147, Liverpool, L69 3BX, UK</i>	57
4	Some generalizing ideas about colonization and succession in green plants and fungi P. J. GRUBB <i>Botany School, University of Cambridge, Downing Street, Cambridge, CB2 3EA, UK</i>	81
5	Seed characteristics in relation to succession M. FENNER <i>Department of Biology, The University, Southampton, SO9 5NH, UK</i>	103
6	Mating systems and colonizing success in plants A. H. D. BROWN and J. J. BURDON <i>Division of Plant Industry, CSIRO, P.O. Box 1600, Canberra, ACT 2601, Australia</i>	115
✓ 7	Features of colonizing animals: phenotypes and genotypes P. A. PARSONS <i>Department of Genetics and Human Variation, La Trobe University, Bundoora, Victoria, 3083 Australia</i>	133
✓ 8	Colonization of ephemeral habitats I. HANSKI <i>Department of Zoology, University of Helsinki, P. Rautatiekatu 13, SF-00100 Helsinki 10, Finland</i>	155
✓ 9	Colonization and speciation H. L. CARSON <i>Department of Genetics, University of Hawaii, 1960 East-West Road, Honolulu, Hawaii 96822, USA</i>	187

10	Colonization, succession and resource availability: ecosystem-level interactions	207
	P. M. VITOUSEK and L. R. WALKER <i>Department of Biological Sciences, Stanford University, Stanford, California 94305, USA</i>	
11	Are there assembly rules for successional communities?	225
	J. H. LAWTON <i>Department of Biology, University of York, Heslington, York, YO1 5DD, UK</i>	
12	Experimental studies on the evolution of niche in successional plant populations:	245
	F. A. BAZZAZ <i>Department of Organismic and Evolutionary Biology, Harvard University, Cambridge, Massachusetts 02138, USA</i>	
13	Genetic change during succession in plants	273
	A. J. GRAY <i>Institute of Terrestrial Ecology, Furzebrook Research Station, Wareham, Dorset, BH20 5AS, UK</i>	
14	Herbivores and plant succession	295
	P. J. EDWARDS and M. P. GILLMAN <i>Department of Biology, The University, Southampton, SO9 5NH, UK</i>	
15	Secondary succession: patterns and strategies	315
	V. K. BROWN and T. R. E. SOUTHWOOD* <i>Imperial College at Silwood Park, Ascot, Berkshire, SL5 7PY, UK and</i> * <i>Department of Zoology, University of Oxford, South Parks Road, Oxford, UK</i>	
16	Change and persistence in some marine communities	339
	J. H. CONNELL <i>Department of Biological Sciences, University of California, Santa Barbara, California 93106, USA</i>	
17	Are communities ever stable?	353
	M. H. WILLIAMSON <i>Department of Biology, University of York, Heslington, York, YO1 5DD, UK</i>	
18	Invasions of forest communities during the Holocene: beech and hemlock in the Great Lakes region	373
	M. B. DAVIS <i>Department of Ecology and Behavioral Biology, University of Minnesota, 318 Church Street S.E., Minneapolis, Minnesota, 55455, USA</i>	

Contents

vii

- 19 The spatial context of regeneration in a neotropical forest 395
S. P. HUBBELL and R. B. FOSTER **Department of Zoology,
University of Iowa, Iowa City, Iowa 52242, USA and
Department of Botany, Field Museum of Natural History,
Chicago, Illinois 60605, USA*
- 20 Dominant and subordinate components of plant communities:
implications for succession, stability and diversity 413
J. P. GRIME *NERC Unit of Comparative Plant Ecology,
Department of Botany, The University, Sheffield, S10 2TN, UK*
- 21 What makes a community invasible? 429
M. J. CRAWLEY *Imperial College at Silwood Park, Ascot,
Berkshire, SL5 7PY, UK*
- Author Index 455
- Subject Index 467
