|--|-----------|
| Preface  | ix        |
| <b>1 An Introduction to the Theory of Investment</b>                     | <b>1</b>  |
| 1.1 Introduction   | 1         |
| 1.2 Investment decisions in a perfect capital market                     | 2         |
| 1.3 Investment decisions in an imperfect capital market                  | 11        |
| 1.4 Defining a continuous discount rate                                  | 17        |
| Appendix: The proof of Puu's theorem and the derivation of an algorithm  | 18        |
| <b>2 The Theory of Non-renewable Resources</b>                           | <b>22</b> |
| 2.1 Introduction   | 22        |
| 2.2 A formal model   | 24        |
| 2.3 Some simple and some intuitive solutions                             | 27        |
| 2.4 A more formal analysis   | 37        |
| 2.5 Monopoly   | 40        |
| 2.6 Summary  | 44        |
| <b>3 The Exploitation of Renewable Resources</b>                         | <b>46</b> |
| 3.1 Introduction   | 46        |
| 3.2 The bang-bang control renewable resource model                       | 47        |
| 3.3 The problem of the commons   | 56        |
| 3.4 Coase's theorem: an illustration                                     | 63        |
| Appendix: The renewable resource model and the price mechanism over time | 65        |
| <b>4 The Optimal Rotation Period</b>                                     | <b>73</b> |
| 4.1 Introduction   | 73        |
| 4.2 The Faustmann-Pressler-Ohlin theorem                                 | 74        |
| 4.3 Comparative statics  | 80        |
| 4.4 The assessment of the value of forest land                           | 85        |
| 4.5 The social optimality of the FPO rotation period                     | 87        |
| 4.6 The FPO rotation period compared with other periods                  | 89        |

|          |  |     |
|----------|--|-----|
| <b>5</b> | <b>A Further Analysis of the Optimal Rotation Period</b>   | 95  |
| 5.1      | Introduction   | 95  |
| 5.2      | The effects of taxes on the rotation period  | 95  |
| 5.3      | The effects of a once and for all change in the<br>biotechnology                                       | 100 |
| 5.4      | The effects of regular improvements in<br>biotechnology  | 102 |
| 5.5      | A slightly more general setting  | 107 |
| 5.6      | Concluding comments  | 110 |
| <b>6</b> | <b>The Linear and Non-linear Forest and the Supply of Wood</b>   | 112 |
| 6.1      | Introduction   | 112 |
| 6.2      | A general age class model  | 112 |
| 6.3      | The linear forest  | 114 |
| 6.4      | The solution, and some of its properties   | 118 |
| 6.5      | The non-linear forest and the supply function for<br>roundwood   | 121 |
| 6.6      | The effects of taxes   | 130 |
| 6.7      | The cost function and initial endowments   | 133 |
| <b>7</b> | <b>The Behaviour of the Self-employed Forest Farmer, and<br/>the Forest Industry as a Forest Owner</b> | 140 |
| 7.1      | Introduction   | 140 |
| 7.2      | The modelling of the behaviour of the self-employed<br>forest farmer                                   | 141 |
| 7.3      | Income constraints and the backward bending supply<br>curve  | 147 |
| 7.4      | Taxation and the supply of roundwood   | 149 |
| 7.5      | The forest industry as a forest owner  | 150 |
| <b>8</b> | <b>The Roundwood Market under Perfect and Imperfect<br/>Market Conditions</b>                          | 161 |
| 8.1      | Introduction   | 161 |
| 8.2      | Aggregate demand and aggregate supply  | 162 |
| 8.3      | General equilibrium: a few comments  | 165 |
| 8.4      | A monopsonistic roundwood market   | 166 |
| 8.5      | Price discrimination under monopsony   | 169 |
| 8.6      | A bargaining approach to the pricing of wood in<br>Sweden  | 173 |
| <b>9</b> | <b>An Econometric Analysis of Aggregate Demand for and<br/>Supply of Wood in Sweden</b>                | 187 |
| 9.1      | Introduction   | 187 |
| 9.2      | The institutional setting  | 187 |

|           |   |            |
|-----------|---|------------|
| 9.3       | The demand for and supply of wood and the partial multimarket equilibrium       | 188        |
| 9.4       | Previous studies  | 191        |
| 9.5       | The empirical model and the empirical results                                   | 192        |
| 9.6       | Discussion  | 201        |
| 9.7       | Concluding comments   | 203        |
| <b>10</b> | <b>Welfare Theory and the Optimal Pricing of Natural Resources</b>              | <b>205</b> |
| 10.1      | Introduction  | 205        |
| 10.2      | Pareto optimal states   | 205        |
| 10.3      | Optimal pricing of non-renewable and renewable resources                        | 207        |
| 10.4      | Optimal pricing rules when there are several regenerating resources             | 211        |
| 10.5      | Multiple use considerations   | 214        |
|           | Appendix: Complete first order conditions for some of the maximization problems | 217        |
| <b>11</b> | <b>Cost-Benefit Rules for Natural Resources</b>                                 | <b>220</b> |
| 11.1      | Introduction  | 220        |
| 11.2      | The model   | 221        |
| 11.3      | General equilibrium cost-benefit rules  | 230        |
| 11.4      | Multiple use of forest lands  | 240        |
| 11.5      | Socially optimal cutting rules in unemployment situations                       | 246        |
| 11.6      | Cutting rules in excess demand situations                                       | 254        |
| 11.7      | Concluding remarks  | 256        |
|           | Appendix: An indirect utility function approach                                 | 256        |
| <b>12</b> | <b>The Properties of the Timber Supply Function in a Risky World</b>            | <b>260</b> |
| 12.1      | Introduction  | 260        |
| 12.2      | The stochastic tree   | 261        |
| 12.3      | The maximization of expected utility and the risk averse forest owner           | 264        |
| 12.4      | The model and the results   | 268        |
| 12.5      | Concluding comments   | 275        |
|           | Appendix: Proofs of claims  | 275        |
|           | <b>Bibliography</b>   | <b>280</b> |
|           | <b>Index</b>  | <b>288</b> |
