Acknowledgements ix

Chapter 1 The issues addressed

1. The problem 1
2. What this book says 3
3. Scope and some definitions 9

Chapter 2 Is soil erosion really a problem?

1. Conflicting views 12
2. How do we judge? 15
3. Social elements in soil erosion 32

Chapter 3 A review of techniques and policies

1. A distinction between techniques and policies 38
2. The techniques themselves 40
3. A review of conservation policies 43

Chapter 4 Why do policies usually fail?

1. Introduction 50
2. The classic or colonial approach to erosion and conservation 53
3. Foreign aid and conservation programmes 61
4. Some explanations for failure, and some reassessments 64
5. Policy implications: from black boxes to systems of black boxes 72

Chapter 5 A new approach – with new problems

1. Two paradigms 79
2. The integration of social factors 81
3. The state, government and administration 83
4. The expression of class interests in erosion and conservation 89
5. New problems 95
6. Family planning and soil conservation programmes – a comparison 98

Chapter 6 Understanding why soil erosion occurs

1. Land use and political economy: a scheme 107

Chapter 7 The exploitation of natural resources and labour

1. Introduction 117
2. Land uses, social relations of production and exchange 117
3. Land users and the world economic system 119
4. Marginalisation, proletarianisation and incorporation 124
5. Spatial marginalisation, private property and the commons 129
6. Steep slopes, history and soil erosion 133

Chapter 8 The other side of the coin

1. Introduction 138
2. Large enterprises using land 139
3. Accumulation and degradation 143

Chapter 9 What now?

1. Overall prospects for soil conservation 147
2. Strategic choices 149
3. Practical pessimism 154
