

# Contents

<i>Preface</i>	iii
<i>Contributors</i>	ix
1 Standard Electrode Potentials: Units, Conventions, and Methods of Determination, <i>Roger Parsons</i>	1
2 The Single Electrode Potential: Its Significance and Calculation, <i>Roger Parsons</i>	13
3 Hydrogen, <i>Philip N. Ross</i>	39
4 Oxygen, <i>James P. Hoare</i>	49
5 The Halogens	67
I. Fluorine, <i>Anselm T. Kuhn and Colin L. Rice</i>	67
II. Chlorine, <i>Torquato Mussini and Paolo Longhi</i>	70
III. Bromine, <i>Torquato Mussini and Paolo Longhi</i>	78
IV. Iodine and Astatine, <i>Pier Giorgio Desideri, Luciano Lepri, and Daniela Heimler</i>	84
6 Sulfur, Selenium, Tellurium, and Polonium, <i>Stephan I. Zhdanov</i>	93
7 Nitrogen, Phosphorus, Arsenic, Antimony, and Bismuth	127
I. Nitrogen, <i>Joseph T. Maloy</i>	127
II. Phosphorus, <i>K. S. V. Santhanam</i>	139
III. Arsenic, <i>K. S. V. Santhanam and N. S. Sundaresan</i>	162
IV. Antimony, <i>Vello Past</i>	172
V. Bismuth, <i>B. Lovreček, I. Mekjavić, and M. Metikoš-Huković</i>	180
8 Carbon, Silicon, Germanium, Tin, and Lead, <i>Zbigniew Galus</i>	189
9 Gallium, Indium, and Thallium, <i>V. V. Losev</i>	237

10	Zinc, Cadmium, and Mercury	249
	I. Zinc, <i>Ralph J. Brodd and John Werth</i>	249
	II. Cadmium, <i>Yutaka Okinaka</i>	257
	III. Mercury, <i>Jan Balej</i>	265
11	Copper, Silver, and Gold	287
	I. Copper, <i>Ugo Bertocci and Donald D. Wagman</i>	287
	II. Silver, <i>G. V. Zhutaeva and N. A. Shumilova</i>	294
	III. Gold, <i>Gerhard M. Schmid</i>	313
12	Nickel, Palladium, and Platinum	321
	I. Nickel, <i>Alejandro J. Arvia and Dionisio Posadas</i>	321
	II. Palladium and Platinum, <i>Francisco Colom</i>	339
13	Cobalt, Rhodium, and Iridium	367
	I. Cobalt, <i>Nobufumi Maki and Nobuyuki Tanaka</i>	367
	II. Rhodium and Iridium, <i>Francisco Colom</i>	382
14	Iron, Ruthenium, and Osmium	391
	I. Iron, <i>Konrad E. Heuster and W. J. Lorenz</i>	391
	II. Ruthenium and Osmium, <i>Francisco Colom</i>	413
15	Manganese, Technetium, and Rhenium	429
	I. Manganese, <i>James C. Hunter and Akiya Kozawa</i>	429
	II. Technetium and Rhenium, <i>Robert J. Magee and Harry Blutstein</i>	439
16	Chromium, Molybdenum, and Tungsten	453
	I. Chromium, <i>Katsumi Niki</i>	453
	II. Molybdenum, <i>Nicholas Stolica</i>	462
	III. Tungsten, <i>Alexander T. Vas'ko</i>	484
17	Vanadium, Niobium, and Tantalum	507
	I. Vanadium, <i>Yecheskel Israel and Louis Meites</i>	507
	II. Niobium and Tantalum, <i>H. V. K. Udupa, V. K. Venkatesan, and M. Krishnan</i>	526
18	Titanium, Zirconium, and Hafnium	539
	I. Titanium, <i>William J. James and James W. Johnson</i>	539
	II. Zirconium and Hafnium, <i>Dennis G. Tuck</i>	547
19	Boron, Aluminum, and Scandium	555
	I. Boron, <i>Su-Moon Park</i>	555
	II. Aluminum, <i>Georges G. Perrault</i>	566
	III. Scandium, <i>Su-Moon Park</i>	580
20	Yttrium, Lanthanum, and the Lanthanide Elements, <i>Lester R. Morss</i>	587

<i>Contents</i>	vii
21 <i>The Actinides, L. Martinot and J. Fuger</i>	631
22 <i>Beryllium, Magnesium, Calcium, Strontium, Barium, and Radium</i>	675
I. <i>Beryllium, Richard E. Panzer</i>	675
II. <i>Magnesium, Georges G. Perrault</i>	687
III. <i>Calcium, Strontium, Barium, and Radium, Shinobu Toshima</i>	700
23 <i>Lithium, Sodium, Potassium, Rubidium, Cesium, and Francium, Hiroyasu Tachikawa</i>	727
24 <i>Inert Gases, Bruno Jaselskis</i>	763
<i>Appendix: Synopsis of Standard Potentials</i>	787
<i>Author Index</i>	803
<i>Subject Index</i>	829
