

CONTENTS

About the Author	vi
Chapter 1 Introduction and Review of Univariate General Linear Models	1
Chapter 2 Specifying the Structure of Multivariate General Linear Models	27
Chapter 3 Estimating the Parameters of the Multivariate General Linear Model	41
Chapter 4 Partitioning the SSCP, Measures of Strength of Association, and Test Statistics	59
Chapter 5 Testing Hypotheses in the Multivariate General Linear Model	103
Chapter 6 Coding the Design Matrix and Multivariate Analysis of Variance	131
Chapter 7 The Eigenvalue Solution to the Multivariate Linear Model: Canonical Correlation and Multivariate Test Statistics	169
References	207
Index	211
