

CONTENTS

1. THE STRUCTURAL BIOLOGY OF THE FGF19 SUBFAMILY..... 1

Andrew Beenken and Moosa Mohammadi

Abstract.....	1
Introduction: An Overview of FGF-FGFR Signaling.....	2
HS Modulates FGF Signaling through Multiple Mechanisms.....	3
Paracrine FGFs Mediate a Mesenchymal-Epithelial Signaling Loop within Tissues	5
Endocrine FGFs Regulate Key Metabolic Processes in a Klotho-Dependent Fashion	7
The Molecular Basis for the FGF19 Subfamily's Klotho Coreceptor Requirement.....	14
Structural Basis for the Specificity and Affinity of Endocrine FGFs' Binding to FGFR	16
Characterization of the Binding of FGF23 To αKlotho	17
Pharmacological Impact of Structural Insights into FGF19 Subfamily.....	18
Conclusion	18

2. KLOTHO AND β KLOTHO 25

Makoto Kuro-o

Abstract.....	25
Introduction	25
Phenotypes of <i>KLOTHO</i>^{-/-} mice	26
Klotho Protein Function.....	29
Phosphate Homeostasis	30
A Potential Link between Phosphate and Aging	31
Secreted Klotho	32
βKlotho.....	33
KLPH	35
Nuclear Receptor Regulation of Endocrine FGFs	35
Conclusion	36

3. FGF23 AND SYNDROMES OF ABNORMAL RENAL PHOSPHATE HANDLING	41
Clemens Bergwitz and Harald Jüppner	
Abstract.....	41
Introduction.....	42
Autosomal Dominant Hypophosphatemic Rickets (ADHR, OMIM 193100).....	42
Other Disorders of Renal Phosphate Excretion	48
Inherited Hypophosphatemic Disorders other than ADHR	49
Hyperphosphatemic Disorders	54
Conclusion	57
4. EVIDENCE FOR FGF23 INVOLVEMENT IN A BONE-KIDNEY AXIS REGULATING BONE MINERALIZATION AND SYSTEMIC PHOSPHATE AND VITAMIN D HOMEOSTASIS.....	65
Aline Martin and L. Darryl Quarles	
Abstract.....	65
Introduction.....	65
Evolving Insights into Skeletal Functions.....	67
Genetic Disorders Define FGF23 Function.....	70
Physiological Functions of FGF23.....	72
Conclusion	78
5. FGF23, KLOTHO AND VITAMIN D INTERACTIONS: WHAT HAVE WE LEARNED FROM IN VIVO MOUSE GENETICS STUDIES?	84
M. Shawkat Razzaque	
Abstract.....	84
Introduction.....	84
FGF23.....	85
FGF23 and CKD	85
Klotho.....	86
FGF23 Signaling.....	86
In Vivo Importance of Klotho in FGF23 Function	87
Vitamin D and FGF23-Klotho Axis	87
Conclusion	88
6. FGF23 AND THE PARATHYROID	92
Justin Silver and Tally Naveh-Many	
Abstract.....	92
Introduction.....	92
Effect of FGF23 on the Parathyroid.....	93
Expression of Klotho in the Parathyroid	93

Functional Effect of FGF23 on PTH Expression	94
FGF23 Activates MAPK in the Parathyroid	94
FGF23 Acts on Bovine Parathyroid Cells to Decrease PTH and Increase 25(OH) Vitamin D 1α Hydroxylase Expression	95
FGF23 Decreases Serum PTH Levels in Transgenic Mice Expressing the Human PTH Gene	95
FGF23 in Chronic Kidney Disease (CKD).....	95
The Mechanism of the Resistance to FGF23 in the Parathyroid.....	95
The Mechanism of the Increased FGF23 Levels in CKD.....	96
Conclusion	97

7. REGULATION OF ION CHANNELS BY SECRETED KLOTHO..... 100

Chou-Long Huang

Abstract.....	100
Introduction.....	100
Homology with the Family 1 Glycosidases and the Glucuronidase Activity of Klotho	101
Sialidase Activity and Regulation of Ion Channels by Secreted Klotho	101
Control of the Resident Time of Membrane Glycoproteins via Galectin-N-Glycan Interaction	103
Regulation of Ion Channels by Secreted Klotho via other Mechanisms.....	104
Role of Regulation of TRPV5 by Secreted Klotho in the Overall Anti-Aging Function of Klotho	104
Conclusion and Future Perspectives	105

8. FGF23 IN CHRONIC KIDNEY DISEASE..... 107

Patricia Wahl and Myles Wolf

Abstract.....	107
Introduction: Burden of Chronic Kidney Disease.....	107
Overview of Normal Mineral Metabolism and Its Disorders in CKD.....	110
Disordered Phosphorus Metabolism and Adverse Clinical Outcomes	116
Conclusion	121

9. SECRETED KLOTHO AND CHRONIC KIDNEY DISEASE 126

Ming Chang Hu, Makoto Kuro-o and Orson W. Moe

Abstract.....	126
Introduction	126
Kidney: The Major Site for Klotho Synthesis	127
Chronic Kidney Disease: A State of Klotho Deficiency	129
Role of Klotho Deficiency in Progression and Complications of CKD	136
Mechanisms of How Secreted Klotho Preserves Kidney Function and Ameliorates Complications in CKD.....	141
Value of Measuring Klotho in CKD	143
Potential Strategies to Increase Klotho Protein	145
Conclusion and Perspectives.....	149

10. FGF23 AS A NOVEL THERAPEUTIC TARGET158

Takashi Shimada and Seiji Fukumoto

Abstract.....	158
Introduction.....	158
Bioactivities of Recombinant Protein of FGF23.....	159
Hypophosphatemic Rickets/Osteomalacia Due to Excess Action of FGF23.....	161
Inhibition of Bioactivity of Circulating FGF23.....	162
The Pharmacological Effect of Neutralizing Antibodies to FGF23 in Hypophosphatemic Mice.....	165
The Possible Hormone Replacement Therapy of FGF23 in Tumoral Calcinosis	166
Conclusion	167

11. PHYSIOLOGY OF FGF15/19171

Stacey A. Jones

Abstract.....	171
Introduction.....	171
Discovery of Mouse <i>Fgf15</i> and Human FGF19.....	172
Signaling Mechanisms	173
<i>Fgf19</i> and <i>Fgf15</i> are Orthologs.....	173
Regulation of Bile Acid Biosynthesis	174
Regulation of Gallbladder Filling.....	176
Chronic Diarrhea and Defective Ileal FGF19 Release	177
Metabolic Effects.....	178
Conclusion and Future Directions.....	179

12. FGF19 AND CANCER183

Benjamin C. Lin and Luc R. Desnoyers

Abstract.....	183
Introduction.....	183
FGF19/FGF15	185
FGF19 Binding Specificity: FGFR4 and the βKlotho Coreceptor	185
FGF19 and Cancer.....	186
Conclusion	192

13. UNDERSTANDING THE STRUCTURE-FUNCTION RELATIONSHIP BETWEEN FGF19 AND ITS MITOGENIC AND METABOLIC ACTIVITIES	195
Xinle Wu and Yang Li	
Abstract.....	195
Introduction.....	195
FGF19 and Cancer.....	196
Structural Basis for the Interactions between FGF19 Subfamily Members and Their Receptors.....	198
Role of FGFR4 in Glucose Metabolism and Mitogenesis.....	207
Conclusion	210
14. FGF21 AS A THERAPEUTIC REAGENT	214
Yang Zhao, James D Dunbar and Alexei Kharitonov	
Abstract.....	214
Introduction.....	214
FGF21 In Vitro Findings	217
FGF21 Genetic Models	220
FGF21 Chronic and Acute Administration In Vivo.....	221
FGF21 in Humans	223
Conclusion	224
INDEX.....	229
