Preface ..................................................................................................................... xv
Valerie F. Reyna

Introduction to The Adolescent Brain: Learning, Reasoning, and Decision Making ................................................. 3
Valerie F. Reyna, Sandra B. Chapman, Michael R. Dougherty, and Jere Confrey

I. Foundations ....................................................................................................... 13

Chapter 1. Anatomic Magnetic Resonance Imaging of the Developing Child and Adolescent Brain.......... 15
Jay N. Giedd, Michael Stockman, Catherine Weddle, Maria Liverpool, Gregory L. Wallace, Nancy Raitano Lee, Francois Lalonde, and Rhoshel K. Lenroot
II. Memory, Meaning, and Representation

Chapter 2. Semantic and Associative Relations in Adolescents and Young Adults: Examining a Tenuous Dichotomy
Ken McRae, Saman Khalkhali, and Mary Hare

Chapter 3. Representation and Transfer of Abstract Mathematical Concepts in Adolescence and Young Adulthood
Jennifer A. Kaminski and Vladimir M. Sloutsky

Chapter 4. A Value of Concrete Learning Materials in Adolescence
Kristen P. Blair and Daniel L. Schwartz

Chapter 5. Higher Order Strategic Gist Reasoning in Adolescence
Sandra B. Chapman, Jacquelyn F. Gamino, and Raksha Anand Mudar

III. Learning, Reasoning, and Problem Solving

Jere Confrey

Chapter 7. Adolescent Reasoning in Mathematical and Nonmathematical Domains: Exploring the Paradox
Eric Knuth, Charles Kalish, Amy Ellis, Caroline Williams, and Mathew D. Felton

Chapter 8. Training the Adolescent Brain: Neural Plasticity and the Acquisition of Cognitive Abilities
Sharona M. Atkins, Michael F. Bunting, Donald J. Bolger, and Michael R. Dougherty
Chapter 9. Higher Cognition is Altered by Noncognitive Factors: How Affect Enhances and Disrupts Mathematics Performance in Adolescence and Young Adulthood .............................................. 243
  Mark H. Ashcraft and Nathan O. Rudig

IV. Judgment and Decision Making .......................................................... 265

Chapter 10. Risky Behavior in Adolescents: The Role of the Developing Brain .............................................. 267
  Adriana Galván

Chapter 11. Affective Motivators and Experience in Adolescents’ Development of Health-Related Behavior Patterns .............................................. 291
  Sandra L. Schneider and Christine M. Caffray

Chapter 12. Judgment and Decision Making in Adolescence: Separating Intelligence From Rationality ...................... 337
  Keith E. Stanovich, Richard F. West, and Maggie E. Toplak

  Christina F. Chick and Valerie F. Reyna

V. Epilogue ..................................................................................................... 429

  Valerie F. Reyna and Michael R. Dougherty

Index ............................................................................................................. 437

About the Editors ......................................................................................... 455
