VII Preface

IX Foreword

XII Contributors

Carbohydrate

1 Carbohydrate Ingestion during Exercise: Effects on Performance, Training Adaptations and Trainability of the Gut

Jeukendrup, A.E.; McLaughlin, J. (UK)

19 Altering Endogenous Carbohydrate Availability to Support Training Adaptations

Philp, A. (USA); Burke, L.M. (Australia); Baar, K. (USA)

Fat

39 Metabolic Regulation of Fat Use during Exercise and in Recovery

Spriet, L.L. (Canada)

59 Fat Adaptation Science: Low-Carbohydrate, High-Fat Diets to Alter Fuel Utilization and Promote Training Adaptation

Hawley, J.A. (Australia)

Protein

79 Dietary Protein to Support Muscle Hypertrophy

van Loon, L.J.C. (The Netherlands); Gibala, M.J. (Canada)

97 Effect of Protein, Dairy Components and Energy Balance in Optimizing Body Composition

Phillips, S.M. (Canada); Zemel, M.B. (USA)

Water

115 Effect of Cell Hydration on Metabolism

Lang, F. (Germany)

Concluding Comments

131 Practical Nutritional Recommendations for the Athlete

Maughan, R.J. (UK); Burke, L.M. (Australia)

151 Subject Index
