

Table of contents

1 Introduction	1
1.1 Background of the study	1
1.2 Chemistry and mineralogy of As	1
1.3 History	2
1.4 As contamination in the world	2
1.5 Toxicity	3
1.6 Redox potential	3
1.7 Redox transformation of As in soil	4
1.8 Sorption and bioavailability of As in soil	5
1.9 Risk on As-contaminated floodplain soils	7
2 Objectives	8
3 Speciation of arsenic under dynamic conditions	9
3.1 Abstract	10
3.2 Introduction	10
3.3 Materials and methods	12
3.4 Results	15
3.5 Discussion	18
3.6 Conclusions	22
4 The bioavailability of arsenic in floodplain soils: a simulation of water saturation	23
4.1 Abstract	24
4.2 Introduction	24
4.3 Materials and methods	26
4.4 Results	29
4.5 Discussion	38
4.6 Conclusions	44
5 Minerals controlling arsenic distribution in floodplain soils	45
5.1 Abstract	46
5.2 Introduction	46
5.3 Materials and methods	47
5.4 Results	49
5.5 Discussion	56
5.6 Conclusions	60
6. Final discussion	61
6.1 As-bearing mineral phases in floodplain soils	61
6.2 Processes occurring after water saturation of As-contaminated floodplain soils	61
6.3 Methods to assess the bioavailability of As in contaminated floodplain soils	65

7. Conclusions	67
8. Summary	68
9. Zusammenfassung	70
10. References	73
11. List of abbreviations	83
Danksagung	84
