Figures	5
Tables	6
Danksagung	7
1 Introduction.....	9
2 Theory and empirics of regional adjustment.....	17
2.1 Geographical economics.....	18
2.1.1 The core model of geographical economics.....	18
2.1.2 Extensions of the core model.....	27
2.1.3 Economic geography and unemployment (disparities).....	33
2.2 An alternative labour market model of regional adjustment.....	36
2.2.1 Theoretical framework.....	37
2.2.2 Reviewed papers – A technical discussion	39
2.2.3 Reviewed papers – Empirical results.....	42
2.2.3.1 Adjustment in the US	43
2.2.3.2 Adjustment in Europe and its candidate countries.....	44
2.2.3.3 Adjustment in single EU countries.....	45
2.2.3.4 Adjustment in Australasia.....	47
2.3 Conclusions from existing empirical work.....	49
3 Disparities, persistence and dynamics of regional unemployment rates in Germany – an univariate analysis.....	51
3.1 Theories of unemployment disparities.....	53
3.2 Regional data and methodological issues	55
3.3 A measure of relative unemployment.....	57
3.4 Disparities and persistence of unemployment rates.....	60
3.4.1 Disparities	61
3.4.2 Persistence	63
3.5 Unemployment dynamics.....	66
3.5.1 Convergence or divergence?.....	66
3.5.2 Adjustment to shocks	74
3.6 Conclusions of univariate models.....	79

4	Unemployment dynamics in West Germany – a simultaneous approach.....	81
4.1	A framework for regional evolutions	83
4.2	Regional Data.....	85
4.3	Migration and commuting activities in Germany	86
4.4	Empirical framework and district-specific data.....	91
4.5	Regional adjustment dynamics.....	94
4.5.1	Estimation results.....	95
4.6	Conclusions of simultaneous models.....	103
5	Sources for regional unemployment disparities in Germany – a hybrid model.....	105
5.1	The chain reaction theory of unemployment.....	107
5.2	National and regional data	110
5.3	Stationarity of national and regional variables	112
5.4	Results.....	114
5.4.1	Econometric specification and estimation results	114
5.4.2	Labour demand shocks	120
5.4.3	Exogenous shocks	124
5.5	Conclusions from the chain reaction theory.....	132
6	Conclusion.....	134
	References	139
	Appendix.....	145
	Abstract.....	149
	Kurzfassung.....	150

Figures

Figure 1: Development of regional employment offices unemployment rates 1959–2004.....	10
Figure 2: Division of labour in the core model of geographical economics....	20
Figure 3: Manufacturing share and relative real wage in the core model of geographical economics	23
Figure 4: Impact of transportation costs in the core model of geographical economics.....	25
Figure 5: The core model of geographical economics as tomahawk diagram	26
Figure 6: The intermediate goods model with constant returns to scale	30
Figure 7: The intermediate goods model with decreasing returns to scale ..	32
Figure 8: The wage curve model with increasing returns to scale.....	34
Figure 9: Spatial distribution of the cyclical sensitivity parameter.....	59
Figure 10: Development of the German unemployment rate 1980–2004.....	61
