Contents

Preface ................................................................. p
Contributors ................................................................. ix

1 Biochemical Methods for Quantifying Sphingolipids: Ceramide, Sphingosine, Sphingosine Kinase-1 Activity, and Sphingosine-1-Phosphate ..................... 1
   Leyre Brizuela and Olivier Cuvillier

2 Isoform-Selective Assays for Sphingosine Kinase Activity ..................... 21
   Melissa R. Pitman, Duyen H. Pham, and Stuart M. Pitson

3 Quantification of Sphingosine-1-Phosphate and Related Sphingolipids by Liquid Chromatography Coupled to Tandem Mass Spectrometry ............. 33
   Constantin Bode and Markus H. Gräler

4 A Cleanup Method for Mass Spectrometry of Sphingosine-1-Phosphate in Blood and Solid Tissues Using a Phosphate Capture Molecule ............. 45
   Jun-ichi Morishige, Tamotsu Tanaka, and Kiyoshi Satouchi

5 Immunohistochemical Detection of Sphingosine-1-Phosphate and Sphingosine Kinase-1 in Human Tissue Samples ..................... 55
   Barbara Visentin, Gary Reynolds, and Roger Sabbadini

6 Assessment of Sphingosine-1-Phosphate Activity in Biological Samples by Receptor Internalization and Adherens Junction Formation ............. 69
   Hideru Obinata and Timothy Hla

7 High-Throughput Assays to Measure Intracellular Ca²⁺ Mobilization in Cells that Express Recombinant 1P Raptor Receptor Subtypes ............. 77
   William J. Valentine and Gabor Tigyi

8 Quantifying Sphingosine-1-Phosphate-Dependent Activation of the RhoGTPases .................................................. 89
   Matt D. Medlin, Joan M. Taylor, and Christopher P. Mack

9 Optimized Protocols to Analyze Sphingosine-1-Phosphate Signal Transduction Pathways During Acrosomal Exocytosis in Human Sperm ............. 99
   Silvia A. Belmonte and Laila Subaiman

10 Use of Intravital Microscopy and In Vitro Chemotaxis Assays to Study the Roles of Sphingosine-1-Phosphate in Bone Homeostasis ..................... 129
    Taeko Ishii, Shunsuke Kawamura, Issei Nishiyama, Junichi Kikuta, and Masaru Ishii

11 Assessment of Sphingosine-1-Phosphate Receptor Expression and Associated Intracellular Signaling Cascades in Primary Cells of the Human Central Nervous System ............. 141
    Veronique E. Miron, Bryce A. Durafourt, Jack P. Antel, and Timothy E. Kennedy
12 Sphingosine-1-Phosphate Signaling in Skeletal Muscle Cells .................. 155
    Elisabetta Meacci, Francesca Bini, and Chiara Battistini
13 Maintenance of Human Embryonic Stem Cells by Sphingosine-1-Phosphate
    and Platelet-Derived Growth Factor ........................................ 167
    Raymond C.B. Wong, Martin F. Pera, and Alice Pébay
14 Ceramide and Sphingosine-1-Phosphate Signaling in Embryonic Stem Cell
    Differentiation ................................................................. 177
    Erhard Bieberich
15 Sphingosine-1-Phosphate Signaling in Neural Progenitors .................... 193
    Phillip Callihan and Shelley B. Hooks
16 Utilizing Sphingosine-1-Phosphate to Stimulate Sprouting Angiogenesis ...... 201
    Shih-Chi Su and Kayla J. Bayless

Index ....................................................................................... 215
