Prologue 1

The Structure of This Book 4

Six Paradigms 8

1 Introduction 12

Some Premises 14

Some History 17

Evolution and Modification of Behavior 19

Evolution of Ontogeny in the Human Animal 26

Levels of Causation in the Explanation of Behavior 27

Part I. Evolution: *The Phylogenetic Origins of Childhood*

wherein we learn how the laws of evolution produced the
shape of human social and emotional development

2 Paradigms in the Evolution of Development 33

Neo-Darwinian Theory—The Adaptationist Paradigm 38

Life History Theory 45

Evolutionary Allometries 54

Heterochrony in the Phylogeny of Development 58

The Evolution of Developmental Genes (Evo-Devo) 65

Phyletic Reorganization in Brain Evolution 69

Developmental Ethology 70

Evolutionary Developmental Psychology 72

Interlude 1: Thinking about Birdsong 75

3 Brains Evolving 78

Expansion and Organization in Brain Evolution 78

Vertebrate Body Plans and Behavioral Advances 83

The Emergence of Mammalian Brain and Behavior 86

Developmental Keys to Psychosocial Evolution 92

4 Ape Foundations, Human Revolution 100

Ape Evolution and Behavior 100

Hominin Evolution and Behavior 107

Hominin Brain Evolution 112

Evolving Human Life Histories 116

Hominin Behavior, Social Organization, and Culture 117

5 The Evolution of Human Brain Growth 124

Neonatal Status and Early Brain Growth 124

Humanizing Anthropoid Brain Growth 126

Hominin Ontogeny 128

Heterochrony in Hominin Evolution 136

Transition 1: Neurological Models of

Psychosocial Function 145

The Limbic System Model 145

The Orbitofrontal Cortex and the Somatic Marker

Hypothesis 147

The Polyvagal Model 149

The Mirror-Neuron System 151

Lateralized Higher Functions 153

Imperfect Models 156

Part II. Maturation: *Anatomical Bases of Psychosocial Growth*

wherein we see how neural and endocrine systems guide
the paths of development called for by natural selection

6 Paradigms in the Study of Psychosocial Growth 159

The Neurogenetics of Animal Models and Human Disease 162

Neuroembryology 172

Developmental Neuroendocrinology 178

Postnatal Brain Development 181
Developmental Behavior Genetics 190
Neurological Individuality 198

Interlude 2: Thinking about Bipedal Walking 202

7 The Growth of Sociality 206

The “Fourth Trimester” and the Presocial Baseline 207
The Rise and Fall of Early Crying 214
Smiling and Mutual Gaze 219

8 The Growth of Attachment and the Social Fears 227

Universals of Human Attachment and Social Fear 228
Animal Studies 230
Biological Mechanisms 233

9 The Growth of Language 241

A Language Acquisition Device 244
Cross-Cultural and Other Evidence 246
Biological Foundations 250
Early Anatomical Preparedness 253
The Role of Learning 255

10 The Growth of Sex and Gender Differences 260

Gender Identity 260
Sex Differences in Aggression 262
Cross-Cultural Studies 264
Neuroendocrine Foundations 267

11 The Transition to Middle Childhood 277

An Evolutionary Approach 281
Cognition in Middle Childhood 282
A Biological Model 291

12 Reproductive Behavior and the Onset of Parenting 296

Biological Changes in Puberty and Adolescence 297
Is Individual Age at Puberty a Facultative Adaptation? 298
Control of the Onset of Puberty 301

Growth and Change in the Adolescent Brain 303
The Psychological Impact of Body Changes 309
Adolescent Hormones in Sexuality and Aggression 310
Cross-Cultural Regularities 315
A Role for Romantic Love? 318
Ideals and Abstractions 320
The Onset of Parenting—Maternal Care 321
Paternal Care and the Pair Bond 325

Interlude 3: Thinking about Growing Up Gay 329

Transition 2: Plasticity Evolving 335

Selection for Plasticity and Resilience 343

Part III. Socialization: *The Evolving Social Context of Ontogeny*

wherein we discern the contributions of social life
to developing relationships and emotions

13 Paradigms in the Study of Socialization 349

Laws of Learning 350

Early Experience Effects and the Sensitive Period Question 353

Ethology, Field Primatology, and Sociobiology 355

Ethnology and Quantitative Cross-Cultural Comparison 358

Historiography and Historical Demography 359

14 Early Social Experience 363

Early Handling, Stress, and Stimulation 363

Postweaning Isolation and Crowding 365

Social Deprivation in Monkeys 368

The Neurobiology of Social Perturbation in Monkeys 369

Experience in the Etiology of Psychopathology 371

Early Deprivation in Human Childhood 374

15 The Evolution of the Mother-Infant Bond 381

Maternal Care in Mammals 382

Mother and Infant Primates, Including Humans 382

Mother-Infant Relations among !Kung Hunter-Gatherers 385

Mother-Infant Relations in Other Hunter-Gatherers 388

Reconstructing Maternal Care: Phylogeny and History 398
Attachment Theory and the Mother-Infant Bond 409

Interlude 4: Thinking about Maternal Sentiment 412

16 Cooperative Breeding in the Extended Family 426

Helpers at the Nest 427

Allocare in Nonhuman Primates 430

Nonmaternal Care among !Kung Hunter-Gatherers 435

Nonmaternal Care in Other Hunter-Gatherers 437

Cooperative Breeding in the Human Species 441

Normative Adoption and Fosterage in Human Societies 445

The Physiology of Alloparental Care 447

Social Context and Mother-Infant Interactions 448

Cooperative Breeding beyond Hunters and Gatherers 449

17 Male Parental Care 452

Male Parental Investment and Reproductive Success 453

Paternal Investment, Social Organization, and Ecology in
Nonhuman Species 456

The Paternal Role among !Kung Hunter-Gatherers 462

Paternal Roles in Other Hunter-Gatherers 463

Paternal Roles in Non-Hunter-Gatherers 466

Observable Patterns and Their Possible Significance 468

Subsistence Adaptation and Family Organization 471

The United States and Other Industrial Cultures 475

Dads and Cads 475

Plasticity and Its Physiological Limits 476

Interlude 5: Thinking about "Oedipal" Conflicts 479

18 Relations among Juveniles 484

Theoretical Considerations 484

Juvenile Social Relations in Selected Mammals 485

Relations among Juveniles in !Kung Hunter-Gatherers 489

Relations among Juveniles in Other Hunter-Gatherers 492

Relations among Juveniles since the Hunting-Gathering Era 495

Functional Considerations 496

Developmental Mechanisms 497

19 Play, Social Learning, and Teaching 500

- The Evolution of Play 501
- The Development of Human Play 504
- The Evolutionary Neurobiology of Play 509
- Intelligent Players 510
- Play, Learning, and Culture 511
- Social Learning, Imitation, and Teaching 512
- Toward a Neurobiology of Social Learning 515
- Teaching: Uniquely Human? 516

20 The Contexts of Emerging Reproductive Behavior 518

- The Development of Sexual Behavior in Monkeys and Apes 519
- Adolescence among the !Kung Hunter-Gatherers 520
- Adolescence in Other Hunter-Gatherers 522
- Broader Cross-Cultural Patterns of Premarital Sex 524
- Parent-Offspring Conflict over Arranged Marriage 525
- Adolescent Sexuality in the Industrial World 526
- Secular Trends in Growth and Maturation 528
- Secular Trends and Adolescent Behavior 530

Interlude 6: Thinking about Incest Avoidance and Taboos 532

21 Stress and Resilience in the Changing Family 537

- Basic Stress Physiology 537
- Stress in Infancy and Childhood 538
- Stress in Early Life as a Signal for Facultative Adaptation 540
- Stress and Resilience on the Island of Dominica 542
- Mortality, Attachment, and Loss 544
- Stress and Resilience in Exceptional Situations 547
- Child Abuse and Neglect in Western Industrial States 550
- Evolutionary Considerations in Abuse and Neglect 552
- Changing Family Structure in Western Industrial States 556
- Abuse, Neglect, and Adolescent Aggression 559
- Stress and Coping in Human Development 560

22 Hunter-Gatherer Childhood—The Cultural Baseline 564

- Generalizations and Challenges 565
- The Hunter-Gatherer Childhood Model 566

Hunter-Gatherer Childhood in Evolutionary Context	568
Evaluating the Divergences	570
Conclusion: Facultative Adaptation, Discordance, or Both?	577

Transition 3: Does Nonhuman Culture Exist? 579

Defining the Extremes	580
The Approach from Material Culture	582
The Approach from Socially Learned Local Variation	584
The Approach from Teaching and Cultural Learning	586
The Approach from Language and Symbol	587
The Approach from History	589

Part IV. Enculturation: *The Transmission and Evolution of Culture*

wherein we come to understand what culture changes

23 Paradigms in the Study of Enculturation	595
Laws of Learning, Expanded	596
Culture and Personality	598
The Whiting Model	605
Broader Cross-Cultural Analyses	606
Extensions and Modifications of the Model	608
Challenges to the Role of Early Experience	610
Culture and Mind	612
 Interlude 7: Thinking about the Question "How?"	 619
 24 The Culture of Infancy and Early Childhood	 624
Culture in Utero?	624
Cross-Cultural Variation in Infant Care	628
Possible Mechanisms of Influence	630
Language Acquisition and Language Learning	632
 25 The Culture of Subsistence	 636
Work, Play, and Cultural Transmission	637
Children's Work in Farming Cultures	647

- 26 The Culture of Middle Childhood 651**
Enculturation among the Gusii of Kenya 652
Enculturation Processes beyond Conventional Learning 654
Enculturation by Children 661
Inculcating Morality? 665
Children and Religion 669
- 27 The Culture of Gender in Childhood and Adolescence 675**
Culture Stretches Biology 675
Cultural Tradition in Adolescent Development 681
- 28 Evolutionary Culture Theory 687**
Cultural Macroevolution 687
The Meme Model and the Question of Coherence 688
Cavalli-Sforza and Feldman 691
Lumsden and Wilson 693
Boyd and Richerson 697
The Durham Model 698
Defining Culture 701
Applying the Model 702
Some Models Compared 707
- Interlude 8: Thinking about Boys at War 708
- 29 Universals, Adaptation, Enculturation, and Culture 713**
Universals of Human Behavior and Culture 713
A Culture Acquisition Device 719
A Model of Culture in Biological Context 725

Part V. Conclusion

wherein we see, as through a glass darkly, how human relationships and emotions may actually emerge

- 30 The Ultimate Epigenetic Enterprise 731**
A General Theory? 732
Chaos, Self-Organization, and Complexity 733

A Theory of Generative Variation 735
Selection, Epigenetics, and Development 740

Reprise 741

Epilogue 750

References 757

Acknowledgments 917

Index 921
