<i>Notations Used in the Book</i>	ix
<i>List of Tables</i>	xviii
<i>List of Figures</i>	xx
<i>Preface</i>	xxxiv
<i>Summary</i>	xliv
<b>1 Introduction</b>	<b>1</b>
1.1 Two paradigms	1
1.2 Aspiration	4
1.3 Endeavour	9
1.4 Provenance	11
1.5 Some links with the 'old' Yale school	13
1.6 Links with the post-Keynesian school	16
1.7 A sketch of the book	18
A1.1 Compelling empirical failings of the neo-classical production function	20
A1.2 Stock-flow relations and the post-Keynesians	21
<b>2 Balance Sheets, Transaction Matrices and the Monetary Circuit</b>	<b>23</b>
2.1 Coherent stock-flow accounting	23
2.2 Balance sheets or stock matrices	25
2.3 The conventional income and expenditure matrix	33
2.4 The transactions flow matrix	37
2.5 Full integration of the balance sheet and the transactions flow matrices	43
2.6 Applications of the transactions flow matrix: the monetary circuit	47
<b>3 The Simplest Model with Government Money</b>	<b>57</b>
3.1 Government money versus private money	57
3.2 The service economy with government money and no portfolio choice	58
3.3 Formalizing Model <i>SIM</i>	61
3.4 A numerical example and the standard Keynesian multiplier	68
3.5 Steady-state solutions	71
3.6 The consumption function as a stock-flow norm	74
3.7 Expectations mistakes in a simple stock-flow model	78

3.8	Out of the steady state	83
3.9	A graphical illustration of Model <i>SIM</i>	88
3.10	Preliminary conclusion	91
A3.1	Equation list of Model <i>SIM</i>	91
A3.2	Equation list of Model <i>SIM</i> with expectations ( <i>SIMEX</i> )	92
A3.3	The mean lag theorem	92
A3.4	Government deficits in a growing economy	95
<b>4</b>	<b>Government Money with Portfolio Choice</b>	<b>99</b>
4.1	Introduction	99
4.2	The matrices of Model <i>PC</i>	99
4.3	The equations of Model <i>PC</i>	102
4.4	Expectations in Model <i>PC</i>	107
4.5	The steady-state solutions of the model	111
4.6	Implications of changes in parameter values on temporary and steady-state income	116
4.7	A government target for the debt to income ratio	124
A4.1	Equation list of Model <i>PC</i>	126
A4.2	Equation list of Model <i>PC</i> with expectations ( <i>PCEX</i> )	126
A4.3	Endogenous money	127
A4.4	Alternative mainstream closures	129
<b>5</b>	<b>Long-term Bonds, Capital Gains and Liquidity Preference</b>	<b>131</b>
5.1	New features of Model <i>LP</i>	131
5.2	The value of a perpetuity	131
5.3	The expected rate of return on long-term bonds	132
5.4	Assessing capital gains algebraically and geometrically	134
5.5	Matrices with long-term bonds	136
5.6	Equations of Model <i>LP</i>	137
5.7	The short-run and long-run impact of higher interest rates on real demand	150
5.8	The effect of household liquidity preference on long rates	153
5.9	Making government expenditures endogenous	160
A5.1	Equations of Model <i>LP</i>	165
A5.2	The liquidity trap	167
A5.3	An alternative, more orthodox, depiction of the bond market	168
<b>6</b>	<b>Introducing the Open Economy</b>	<b>170</b>
6.1	A coherent framework	170
6.2	The matrices of a two-region economy	171
6.3	The equations of a two-region economy	173
6.4	The steady-state solutions of Model <i>REG</i>	176
6.5	Experiments with Model <i>REG</i>	180
6.6	The matrices of a two-country economy	187
6.7	The equations of a two-country economy	191

6.8	Rejecting the Mundell–Fleming approach and adopting the <i>compensation</i> approach	194
6.9	Adjustment mechanisms	201
6.10	Concluding thoughts	207
A6.1	Equations of Model <i>REG</i>	209
A6.2	Equations of Model <i>OPEN</i>	211
A6.3	Historical and empirical evidence concerning the compensation principle	213
A6.4	Other institutional frameworks: the currency board	214
A6.5	How to easily build an open model	215
<b>7</b>	<b>A Simple Model with Private Bank Money</b>	<b>217</b>
7.1	Private money and bank loans	217
7.2	The matrices of the simplest model with private money	218
7.3	The equations of Model <i>BMW</i>	222
7.4	The steady state	227
7.5	Out-of-equilibrium values and stability analysis	233
7.6	The role of the rate of interest	240
7.7	A look forward	247
A7.1	The equations of Model <i>BMW</i>	247
<b>8</b>	<b>Time, Inventories, Profits and Pricing</b>	<b>250</b>
8.1	The role of time	250
8.2	The measure of profits	252
8.3	Pricing	263
8.4	Numerical examples of fluctuating inventories	276
A8.1	A Numerical example of inventory accounting	278
<b>9</b>	<b>A Model with Private Bank Money, Inventories and Inflation</b>	<b>284</b>
9.1	Introduction	284
9.2	The equations of Model <i>DIS</i>	285
9.3	Additional properties of the model	293
9.4	Steady-state values of Model <i>DIS</i>	295
9.5	Dealing with inflation in (a slightly modified) Model <i>DIS</i>	300
A9.1	Equation list of Model <i>DIS</i>	308
A9.2	The peculiar role of given expectations	310
A9.3	Equation list of Model <i>DISINF</i>	312
<b>10</b>	<b>A Model with both Inside and Outside Money</b>	<b>314</b>
10.1	A model with active commercial banks	314
10.2	Balance sheet and transaction matrices	315
10.3	Producing firms	318
10.4	Households	322
10.5	The government sector and the central bank	331
10.6	The commercial banking system	333

10.7	Making it all sing with simulations	342
10.8	Conclusion	374
A10.1	Overdraft banking systems	374
A10.2	Arithmetical example of a change in portfolio preference	376
<b>11</b>	<b>A Growth Model Prototype</b>	<b>378</b>
11.1	Prolegomena	378
11.2	Balance sheet, revaluation and transactions-flow matrices	379
11.3	Decisions taken by firms	383
11.4	Decisions taken by households	392
11.5	The public sector	397
11.6	The banking sector	399
11.7	Fiscal and monetary policies	404
11.8	Households in the model as a whole	422
11.9	Financial decisions in the model as a whole	435
11.10	A concluding recap	441
<b>12</b>	<b>A More Advanced Open Economy Model</b>	<b>445</b>
12.1	Introduction	445
12.2	The two matrices	446
12.3	Equations of the generic model	450
12.4	Alternative closures	462
12.5	Experiments with the main fixed exchange rate closure	466
12.6	Experiments with alternative fixed exchange rate closures	472
12.7	Experiments with the flexible exchange rate closure	478
12.8	Lessons to be drawn	487
A12.1	A fundamental and useful open-economy flow-of-funds identity	490
A12.2	An alternative flexible exchange rate closure	492
<b>13</b>	<b>General Conclusion</b>	<b>493</b>
13.1	Unique features of the models presented here	493
13.2	A summary	499
	<i>References</i>	501
	<i>Index</i>	514
