Contents

1 Understanding Operational Risk **1**

1.1 Introduction 1
1.2 Our Approach to Operational Risk Quantification 2
1.3 Regulatory Framework 3
1.4 The Fundamentals of Calculating Operational Risk Capital 5
1.5 Notation and Definitions 6
1.6 The Calculation of Operational Risk Capital in Practice 8
1.7 Organization of the Book 10
1.8 Further Reading and Bibliographic Notes 11

2 Operational Risk Data and Parametric Models **13**

2.1 Introduction 13
2.2 Internal Data and External Data 14
2.3 Basic Parametric Severity Distributions 16
2.4 The Generalized Champernowne Distribution 19
2.5 Quantile Estimation 24
2.6 Further Reading and Bibliographic Notes 25

3 Semiparametric Models for Operational Risk Severities **29**

3.1 Introduction 29
3.2 Classical Kernel Density Estimation 30
3.3 Transformation Method 33
3.3.1 Asymptotic Theory for the Transformation Kernel Density Estimator 35
3.3.2 Transformation Method with a Cumulative Distribution Function 36
3.4 Bandwidth Selection 38
3.5 Boundary Correction 39
3.6 Transformation with the Generalized Champernowne Distribution 41
3.7 Results for the Operational Risk Data 43
3.8 Further Reading and Bibliographic Notes 44

4 Combining Operational Risk Data Sources **49**
4.1 Why Mixing? 49
4.2 Combining Data Sources with the Transformation Method 50
4.3 The Mixing Transformation Technique 51
4.4 Data Study 52
4.5 Further Reading and Bibliographic Notes 55

5 Underreporting **57**
5.1 Introduction 57
5.2 The Underreporting Function 58
5.3 Publicly Reported Loss Data 60
5.4 A Semiparametric Approach to Correction for Underreporting 62
5.4.1 Setting up a Model for the Sampling of Operational Risk Claims with Underreporting 63
5.4.2 A Transformation Approach to Tail Flattening Accounting for Underreporting 63
5.5 An Application to Evaluate Operational Risk with Correction for Underreporting in Publicly Reported Losses 65
5.6 An Application to Evaluate Internal Operational Risk with Correction for Underreporting 68
5.6.1 Aggregated Analysis Incorporating six Event Risk Categories 70
5.6.2 Results 70
5.7 Further Reading and Bibliographic Notes 72

6 Combining Underreported Internal and External Data for Operational Risk Measurement **73**
6.1 Introduction 73
6.2 Data Availability 74
6.2.1 Minimum Collection Threshold 75
6.2.2 Modeling Each Data Set Separately 76
6.3 Underreporting Losses 77
6.3.1 Correcting for Underreporting and Collection Threshold 79
6.3.2 Including Underreporting in the Estimation Procedure 80
6.4 A Mixing Model in a Truncation Framework 83
6.5 Operational Risk Application 86
6.6 Further Reading and Bibliographic Notes 92

7 A Guided Practical Example **95**
7.1 Introduction 95
7.2 Descriptive Statistics and Basic Procedures in SAS© 95
7.2.1 Fitting the Generalized Champernowne Distribution in SAS© 104

7.2.2 Quantile Estimation for Basic Parametric Distributions 108
7.2.3 Quantile Estimation for the Generalized Champernowne Distribution 112
7.3 Transformation Kernel Estimation 116
7.4 Combining Internal and External Data 123
7.5 Underreporting Implementation 145
7.6 Programming in R 171
7.6.1 Basic Functions 171
7.6.2 Figures in Chapters 2 and 3 177

Bibliography **203**

Index **209**
