

Contents

1	Algebras, Coalgebras, Homology	1
1.1	Classical Algebras (Associative, Commutative, Lie)	1
1.2	Coassociative Coalgebras	9
1.3	Bialgebra	14
1.4	Pre-Lie Algebras	20
1.5	Differential Graded Algebra	22
1.6	Convolution	32
1.7	Résumé	34
1.8	Exercices	34
2	Twisting Morphisms	37
2.1	Twisting Morphisms	38
2.2	Bar and Cobar Construction	41
2.3	Koszul Morphisms	48
2.4	Cobar Construction and Quasi-isomorphisms	49
2.5	Proof of the Comparison Lemma	51
2.6	Résumé	55
2.7	Exercices	57
3	Koszul Duality for Associative Algebras	61
3.1	Quadratic Data, Quadratic Algebra, Quadratic Coalgebra	62
3.2	Koszul Dual of a Quadratic Algebra	64
3.3	Bar and Cobar Construction on a Quadratic Data	66
3.4	Koszul Algebras	69
3.5	Generating Series	73
3.6	Koszul Duality Theory for Inhomogeneous Quadratic Algebras	75
3.7	Résumé	82
3.8	Exercices	85
4	Methods to Prove Koszulity of an Algebra	89
4.1	Rewriting Method	90
4.2	Reduction by Filtration	92

4.3	Poincaré–Birkhoff–Witt Bases and Gröbner Bases	99
4.4	Koszul Duality Theory and Lattices	109
4.5	Manin Products for Quadratic Algebras	111
4.6	Résumé	114
4.7	Exercises	116
5	Algebraic Operad	119
5.1	\mathcal{S} -Module and Schur Functor	121
5.2	Algebraic Operad and Algebra over an Operad	130
5.3	Classical and Partial Definition of an Operad	142
5.4	Various Constructions Associated to an Operad	149
5.5	Free Operad	154
5.6	Combinatorial Definition of an Operad	159
5.7	Type of Algebras	162
5.8	Cooperad	166
5.9	Nonsymmetric Operad	175
5.10	Résumé	186
5.11	Exercises	188
6	Operadic Homological Algebra	193
6.1	Infinitesimal Composite	194
6.2	Differential Graded \mathcal{S} -Module	197
6.3	Differential Graded Operad	199
6.4	Operadic Twisting Morphism	208
6.5	Operadic Bar and Cobar Construction	214
6.6	Operadic Koszul Morphisms	220
6.7	Proof of the Operadic Comparison Lemmas	222
6.8	Résumé	225
6.9	Exercises	227
7	Koszul Duality of Operads	229
7.1	Operadic Quadratic Data, Quadratic Operad and Cooperad	230
7.2	Koszul Dual (Co)Operad of a Quadratic Operad	233
7.3	Bar and Cobar Construction on an Operadic Quadratic Data	236
7.4	Koszul Operads	237
7.5	Generating Series	241
7.6	Binary Quadratic Operads	243
7.7	Nonsymmetric Binary Quadratic Operad	250
7.8	Koszul Duality for Inhomogeneous Quadratic Operads	252
7.9	Résumé	258
7.10	Exercises	260
8	Methods to Prove Koszulity of an Operad	263
8.1	Rewriting Method for Binary Quadratic NS Operads	264
8.2	Shuffle Operad	266
8.3	Rewriting Method for Operads	274
8.4	Reduction by Filtration	277

8.5	PBW Bases and Gröbner Bases for Operads	283
8.6	Distributive Laws	288
8.7	Partition Poset Method	297
8.8	Manin Products	308
8.9	Résumé	317
8.10	Exercises	320
9	The Operads A_s and A_∞	325
9.1	Associative Algebras and the Operad Ass	326
9.2	Associative Algebras Up to Homotopy	336
9.3	The Bar–Cobar Construction on A_s	343
9.4	Homotopy Transfer Theorem for the Operad A_s	345
9.5	An Example of an A_∞ -Algebra with Nonvanishing m_3	353
9.6	Résumé	355
9.7	Exercises	356
10	Homotopy Operadic Algebras	359
10.1	Homotopy Algebras: Definitions	360
10.2	Homotopy Algebras: Morphisms	369
10.3	Homotopy Transfer Theorem	376
10.4	Inverse of ∞ -Isomorphisms and ∞ -Quasi-isomorphisms	386
10.5	Homotopy Operads	391
10.6	Résumé	399
10.7	Exercises	401
11	Bar and Cobar Construction of an Algebra over an Operad	405
11.1	Twisting Morphism for \mathcal{P} -Algebras	406
11.2	Bar and Cobar Construction for \mathcal{P} -Algebras	408
11.3	Bar–Cobar Adjunction for \mathcal{P} -Algebras	413
11.4	Homotopy Theory of \mathcal{P} -Algebras	417
11.5	Résumé	424
11.6	Exercises	426
12	(Co)Homology of Algebras over an Operad	427
12.1	Homology of Algebras over an Operad	428
12.2	Deformation Theory of Algebra Structures	433
12.3	André–Quillen (Co)Homology of Algebras over an Operad	447
12.4	Operadic Cohomology of Algebras with Coefficients	464
12.5	Résumé	470
12.6	Exercises	473
13	Examples of Algebraic Operads	479
13.1	Commutative Algebras and the Operad Com	480
13.2	Lie Algebras and the Operad Lie	490
13.3	Poisson Algebras, Gerstenhaber Algebras and Their Operad	502
13.4	Pre-Lie Algebras and Perm-Algebras	514
13.5	Leibniz Algebras and Zinbiel Algebras	519

13.6	Dendriform Algebras and Diassociative Algebras	522
13.7	Batalin–Vilkovisky Algebras and the Operad BV	531
13.8	Magmatic Algebras	539
13.9	Parametrized Binary Quadratic Operads	541
13.10	Jordan Algebras, Interchange Algebras	542
13.11	Multi-ary Algebras	544
13.12	Examples of Operads with 1-Ary Operations, 0-Ary Operation	550
13.13	Generalized Bialgebras and Triples of Operads	553
13.14	Types of Operads	559
Appendix A	The Symmetric Group	567
A.1	Action of Groups	567
A.2	Representations of the Symmetric Group S_n	569
Appendix B	Categories	573
B.1	Categories and Functors	573
B.2	Adjoint Functors, Free Objects	577
B.3	Monoidal Category	580
B.4	Monads	583
B.5	Categories over Finite Sets	585
B.6	Model Categories	587
B.7	Derived Functors and Homology Theories	592
Appendix C	Trees	597
C.1	Planar Binary Trees	597
C.2	Planar Trees and Stasheff Polytope	600
C.3	Trees and Reduced Trees	603
C.4	Graphs	605
