

Contents

Preface.....	vii
Editors.....	xi
Contributors.....	xiii

SECTION I Experimental Techniques to Determine Three-Dimensional Structures

Chapter 1	Crystallography and Small-Angle Scattering of Carbohydrate–Protein Complexes and Glycoproteins.....	3
	<i>Cy M. Jeffries, William Farrugia, and Paul A. Ramsland</i>	
Chapter 2	Nuclear Magnetic Resonance Studies of Carbohydrate–Protein Interactions.....	29
	<i>Leonardus M. I. Koharudin and Angela M. Gronenborn</i>	
Chapter 3	Electron Cryomicroscopy of Large Glycoprotein Assemblies.....	47
	<i>Tzviya Zeev-Ben-Mordehai and Kay Gr̄unewald</i>	

SECTION II Theoretical/Modeling Techniques to Predict Three-Dimensional Structures

Chapter 4	Protein–Carbohydrate Interactions: Computational Aspects.....	71
	<i>Anita Sarkar and Serge P�rez</i>	
Chapter 5	Docking of Carbohydrates into Protein Binding Sites.....	111
	<i>Mark Agostino, Paul A. Ramsland, and Elizabeth Yuriev</i>	

SECTION III *Alternative Approaches for Yielding Detailed Structural Information*

- Chapter 6** Mass Spectrometry for Glycomics Analysis of *N*- and *O*-Linked Glycoproteins..... 141
Daniel Kolarich and Nicolle H. Packer
- Chapter 7** Glycan-Based Arrays for Determining Specificity of Carbohydrate-Binding Proteins..... 163
Xuezheng Song, David F. Smith, and Richard D. Cummings

SECTION IV *Carbohydrates in Medicine*

- Chapter 8** Structural Glycobiology: Applications in Cancer Research 177
Inka Brockhausen and Yin Gao
- Chapter 9** Structural Glycobiology: Applications in Organ Transplantation..... 215
Dale Christiansen, Mark Agostino, Elizabeth Yuriev, Paul A. Ramsland, and Mauro S. Sandrin
- Chapter 10** Structural Glycobiology: Applications in Viral Infection..... 235
Rui Xu and Ian A. Wilson
- Chapter 11** Developing Drugs from Sugars: Current State of Glycosaminoglycan-Derived Therapeutics 259
Neha S. Gandhi and Ricardo L. Mancera
- Index**..... 297
