Preface	ix
Acknowledgments	xi
CHAPTER 1	
Some Basic Math	1
Logarithms	1
Log Returns	3
Compounding	4
Limited Liability	5
Graphing Log Returns	5
Continuously Compounded Returns	7
Combinatorics	9
Discount Factors	10
Geometric Series	11
Problems	16
CHAPTER 2	
Probabilities	19
Discrete Random Variables	19
Continuous Random Variables	20
Mutually Exclusive Events	26
Independent Events	27
Probability Matrices	28
Conditional Probability	30
Bayes' Theorem	31
Problems	36
CHAPTER 3	
Basic Statistics	39
Averages	39
Expectations	46
Variance and Standard Deviation	51
Standardized Variables	54

Covariance	54
Correlation	56
Application: Portfolio Variance and Hedging	57
Moments	60
Skewness	60
Kurtosis	64
Coskewness and Cokurtosis	67
Best Linear Unbiased Estimator (BLUE)	71
Problems	72
CHAPTER 4	
Distributions	75
Parametric Distributions	75
Uniform Distribution	75
Bernoulli Distribution	78
Binomial Distribution	79
Poisson Distribution	83
Normal Distribution	84
Lognormal Distribution	88
Central Limit Theorem	90
Application: Monte Carlo Simulations Part I: Creating Normal Random Variables	92
Chi-Squared Distribution	94
Student's t Distribution	95
F -Distribution	97
Mixture Distributions	99
Problems	102
CHAPTER 5	
Hypothesis Testing & Confidence Intervals	105
The Sample Mean Revisited	105
Sample Variance Revisited	107
Confidence Intervals	108
Hypothesis Testing	109
Chebyshev's Inequality	113
Application: VaR	114
Problems	124
CHAPTER 6	
Matrix Algebra	127
Matrix Notation	127
Matrix Operations	129

Application: Transition Matrices	136
Application: Monte Carlo Simulations Part II: Cholesky Decomposition	138
Problems	141
CHAPTER 7	
Vector Spaces	143
Vectors Revisited	143
Orthogonality	146
Rotation	152
Principal Component Analysis	157
Application: The Dynamic Term Structure of Interest Rates	162
Application: The Structure of Global Equity Markets	167
Problems	171
CHAPTER 8	
Linear Regression Analysis	173
Linear Regression (One Regressor)	173
Linear Regression (Multivariate)	183
Application: Factor Analysis	188
Application: Stress Testing	192
Problems	194
CHAPTER 9	
Time Series Models	197
Random Walks	197
Drift-Diffusion	199
Autoregression	200
Variance and Autocorrelation	205
Stationarity	206
Moving Average	212
Continuous Models	212
Application: GARCH	215
Application: Jump-Diffusion	217
Application: Interest Rate Models	218
Problems	220
CHAPTER 10	
Decay Factors	223
Mean	223
Variance	230
Weighted Least Squares	231

Other Possibilities	232
Application: Hybrid VaR	233
Problems	234
APPENDIX A	
Binary Numbers	237
APPENDIX B	
Taylor Expansions	239
APPENDIX C	
Vector Spaces	241
APPENDIX D	
Greek Alphabet	242
APPENDIX E	
Common Abbreviations	243
Answers	245
References	283
About the Author	285
Index	287
