PART I COMPARATIVE STUDY OF GENERAL SOCIAL ATTITUDES

1	Scope and Method of the Study of General Social Attitudes ...	3
1.1	Introduction	3
1.2	Assessment of previous studies on general social attitudes	4
1.3	Data analysis	6
1.4	New approach to future comparative survey research	9
	Notes to Chapter 1	13
2	Methods in Comparison	17
2.1	Comparative research for what?	17
2.2	The fundamental standpoint of comparative research	19
2.3	Basic attitudes toward the advancement of comparative research	20
2.4	The practice of comparative research	25
2.4.1	Full grasp of data characteristics	25
2.4.2	Questions	25
2.4.3	Characteristics of the samples	28
2.4.4	Method for obtaining data	29
2.4.5	Method of data analysis	29
2.5	Comparative research by compiling reports	30
	Notes to Chapter 2	33

PART II SURVEY RESEARCH DESIGN

3	On the Content of Questions	39
3.1	Questions which cannot be understood even when properly translated	39
3.2	Backward and forward translations (Japanese to English and back to Japanese)	41
3.2.1	The investigation process	41

3.2.2	Results and illustrations	42
3.3	Backward and forward translations (English to Japanese and back to English)	45
3.4	Comprehension of question content	54
3.5	Investigations of question content with dual language surveys	65
3.5.1	Comparisons among Japanese college students	71
3.5.2	Survey of Japanese-Americans who understand both English and Japanese	87
	Appendix A: On Neutral Responses	107
A.1	Neutral responses to questions on both English and Japanese questionnaires	107
A.2	Further analysis of neutral responses using weighted responses	109
	Notes to Chapter 3 and Appendix A	117
4	On the Nature of the Samples	119
PART III DATA ANALYSIS		
	Introduction	131
5	The Position of Groups	133
5.1	The method of positioning majority groups to be compared	133
5.2	The position of majority social groups in com- parative cultural research and their significance: from macro-level to micro-level analysis	140
	Notes to Chapter 5	152
6	Comparison by Means of the Effects of Attributes	153
	Notes to Chapter 6	164
7	Macro-Analysis by Means of Cohort Analysis	165
7.1	The usefulness of cohort analysis	165
7.1.1	Trend data and the analytic perspective	167
7.1.2	The method of cohort analysis and its problems	169
7.1.3	A new method for cohort analysis	169
7.2	The advancement of cohort analysis by applica- tion to the Japanese National Character Study	171
7.2.1	Investigating the applicability of the method	173
7.2.1.1	Results of analysis of educational background	173

7.2.1.2	Results of analysis of occupational structure (in particular farming and housewifery)	173
7.2.1.3	Cohort analysis results using artificial data	175
7.2.2	Investigation of results for each question	175
7.2.2.1	Analysis of response "just live a life that suits one's own taste" to the question about "way of life" .	175
7.2.2.2	Period effect	176
7.2.2.3	Age effect	180
7.2.2.4	Cohort effect	181
7.2.3	On the age effect and the cohort effect	183
7.2.4	On the period effect and the cohort effect	187
7.2.4.1	The relationship between change over time and the existence or non- existence of period effects and cohort effects	187
7.2.4.2	The magnitude of change over time and the combination based on the different types of period effects and cohort effects	188
7.2.4.3	A combination of each type for period effect and cohort effect	191
7.2.4.4	Investigation of combinations by types of both effects	193
7.2.5	Summary	201
7.2.5.1	Classification of opinions based on combinations of types of both effects and the process of attitudinal change	201
7.2.5.2	Characteristics (trends) in the stream of time which can be obtained by cohort analysis	207
7.2.5.2.1	Characteristics of the period prior to the survey period	207
7.2.5.2.2	Characteristics of the period after the survey period	209
7.2.5.3	Discussion	211
7.3	International comparison of longitudinal survey data with respect to religious belief, by means of cohort analysis	219
7.3.1	Question on attitudinal surveys and comparability with respect to religion	219
7.3.2	Longitudinal survey data and cohort analysis with respect to religion	221
7.3.2.1	The case of Japan	221
7.3.2.2	The case of the United States	223
7.3.2.3	The case of Holland	223

7.3.3	Investigation of cohort analysis results	227
7.3.3.1	The case of Japan	227
7.3.3.2	The cases of the United States and Holland	231
	Notes to Chapter 7	235
8	Comparison by Means of Systems of Thought	237
8.1	The importance of knowing the system of thought	237
8.2	Subject groups and data	241
8.3	Analysis with questions related to duty (<i>giri</i>) and humanity (<i>ninjo</i>)	241
8.3.1	Question and grasp of the overall trend	241
8.3.2	The system of thought regarding <i>giri-ninjo</i>	249
8.3.3	Positions of each group according to disparities in attitude structures	252
8.4	Comparisons of the Japanese-type attitude structure: traditional vs. modern	259
8.4.1	Traditional vs. modern questions	259
8.4.2	Traditional vs. modern as a system of thought	261
8.4.3	Disparities in attitudinal structures by group	263
8.4.4	What divides opinions in each group?	263
	Notes to Chapter 8	271
9	Design and Comparison of Questions: A Comparison of Japanese and American Attitudinal Structures	273
9.1	General analysis	273
9.2	Methods for comparing mutual understanding	277
	Notes to Chapter 9	285
10	Inquiries through Question Design Changes and Transformations of Attitude Structures: Connections between Changes in the Social Environment and the Way of Thinking	287
10.1	General overview	287
10.1.1	Survey data utilized for the analysis	288
10.2	Similarities and disparities in the ways of think- ing of the Japanese and Americans at present	288
10.2.1	"Lifestyle" and "Attitudes toward Work" in everyday life in a highly industrialized society	288
10.2.2	An interpretation of the connection between the basic way of thinking and attitudes toward everyday life	299

10.3 Social changes and changes in the way of thinking in Japan 310

10.3.1 Survey and questions used for the investigation . . . 311

10.3.2 Response pattern analysis 311

10.4 A comparison of Japan and the United States using cultural link analysis of comparative research . 319

10.4.1 Analysis of response patterns 319

10.4.2 Mutual relations in the ways of thinking in Japanese, Hawaiian and mainland U.S. societies . . . 326

10.4.2.1 Survey data and questions utilized 327

10.4.2.2 Results of analysis 329

10.4.2.3 Discussion 331

10.5 A model and an example of the change process in the way of thinking by mutual interference of differing cultures: the process of change in Japan . . 335

Notes to Chapter 10 342

11 Expansion of the Cultural Link Analysis of Comparative Research and Examples of its Application: A Comparison of Japan, France, and the United States (Hawaii) 343

11.1 A reconsideration of "cultural link analysis of comparative research" 343

11.2 Comparisons of Japan, France, and the United States (Hawaii) 345

11.2.1 Data on comparative research 345

11.2.2 The positioning of France as a society for comparative study 351

11.2.3 Correspondence analysis for each society 357

11.2.3.1 Correspondence analysis for combinations of four questions—Y, F, W and R—with respect to "anxiety" and "science and technology" . . 357

11.2.3.2 Correspondence analysis of combinations of questions about "attitudes toward family," "living environments," "evaluations of standard of living" and "attitudes toward science and technology" 358

11.2.3.3 Synthetic comparison 369

Appendix B: On the Translation of a Question 377

Notes to Chapter 11 371

In Conclusion: Parts I, II and III 373

PART IV NEW APPROACHES TO DATA ANALYSIS

12	Total Grasp Based on Dissimilarity of Subjects	377
12.1	Basic idea	377
12.2	Explanation of MDA-OR	377
	Notes to Chapter 12	386
13	Expression of the Effect of each of the Attributes and Methods for Intensifying Information	387
13.1	Explanation of the methods	387
13.2	The method applied to data by breakdown of attributes	393
13.3	Case example—a survey on the "supernatural"	397
	Notes to Chapter 13	406
14	Cohort Analysis Methods	407
14.1	Introduction	407
14.2	Model of cohort analysis	411
14.3	New cohort model (logit cohort model)	413
14.3.1	The condition of a parameter's gradual change	414
14.3.2	Formulation of model	415
14.3.3	The selection of optimal models by the ABIC method	415
14.3.4	Cohort analysis using the hypothetical data from Table 14.1	419
14.3.5	Cautions on the application of this new method ...	420
	Notes to Chapter 14	421
15	A Method for Seeking out the System of Thought	423
15.1	Explanation of the method	425
15.2	Another interpretation of the quantitative method of correspondence analysis ...	439
15.3	A few notes for effective use of this method	451
15.3.1	Partitioning of groups into subgroups	451
15.3.2	Combinations of sample-bond-sample	451
15.3.3	Differing structures and intermediate structures ...	453
15.3.4	To what dimensional level should we take the analysis?	453
15.3.5	Stability of the solution	454
	Notes to Chapter 15	457

PART V SYNTHESIS

16	A Final Word	461
16.1	Overview	461
16.2	The current circumstances of recent international comparative research	464
	Notes to Chapter 16	467
	References	471
	Index	483
