Modern Agriculture and Implications for Land Use and Management	1
<i>Joe Morris and Paul J. Burgess</i>	
1 Introduction and Overview	2
2 Agricultural Systems	2
3 Global and Regional Issues	3
3.1 Demand Side Factors	4
3.2 Supply Side Factors	5
4 Agricultural Land and the Role of Science and Technology	7
5 Case Study: UK Agriculture and Land Use	8
5.1 Trends in UK Agriculture	8
5.1.1 Agriculture's Contribution to UK Economy	9
5.1.2 Agricultural Land Use	9
5.1.3 Farm Size	10
5.1.4 Farm Yields	10
5.1.5 Agricultural Commodity Prices	12
5.1.6 UK Farm Incomes	13
5.1.7 Productivity of UK Farms	13
5.1.8 Demand for Food in the UK	15
5.1.9 Food Self-sufficiency and Food Security	15
6 Agriculture and Environment	16
7 Agriculture and Ecosystem Services	17
8 <i>Agriculture and Climate Change</i>	19
9 Agriculture and Energy	20

Issues in Environmental Science and Technology, 34

Environmental Impacts of Modern Agriculture

Edited by R.E. Hester and R.M. Harrison

© The Royal Society of Chemistry 2012

Published by the Royal Society of Chemistry, www.rsc.org

10	Future Prospects for Land Use in the UK	21
10.1	Scope to Release Land from Agricultural Production	22
10.2	Technology Change and Land Use	24
11	Implications for Policy	27
	References	27
	Impacts of Agriculture upon Soil Quality	35
	<i>R. Sakrabani, L. D. Deeks, M. G. Kibblewhite and K. Ritz</i>	
1	Introduction to Soil Quality	36
2	Soil Organic Matter Decline	38
3	Soil Compaction	40
4	Soil Erosion	43
5	Soil Biodiversity	44
6	Soil Contamination	47
6.1	Nutrients	48
6.2	Heavy Metals	49
6.3	Organic Pollutants	49
7	Soil Sealing	50
8	Soil Salinisation	51
9	Conclusions	51
	References	53
	Impacts of Agriculture upon Greenhouse Gas Budgets	57
	<i>J. M. Cloy, R. M. Rees, K. A. Smith, K. W. T. Goulding, P. Smith, A. Waterhouse and D. Chadwick</i>	
1	Introduction	57
2	Current Agricultural Sources of Nitrous Oxide, Methane and Carbon Dioxide	59
2.1	Nitrous Oxide	61
2.2	Methane	62
2.3	Carbon Dioxide	65
3	International Reporting of Greenhouse Gas Emissions	66
3.1	Indirect Emissions – Is there a Gap between Top-down and Bottom-up Global Budgets?	67
4	Future Mitigation Strategies	69
4.1	Nitrous Oxide	69
4.1.1	Optimising Nitrogen Use by Crop Plants	70
4.1.2	Optimising Nitrogen Use by Livestock	71
4.1.3	Inhibitors	71
4.1.4	Soil Management and Tillage	71
4.1.5	Land Use Change	72

<i>Contents</i>	ix
4.2 Methane	72
4.2.1 Methane from Ruminant Livestock	72
4.2.2 Dietary Opportunities	72
4.2.3 Avoiding Inefficiencies	73
4.2.4 Livestock Reduction or Replacements	74
4.2.5 Methane from Wetland Rice	74
4.3 Carbon Dioxide	74
4.4 Greenhouse Gas Mitigation Potential: Combined Effects of all Gases	76
4.5 The Economics of Mitigation	77
5 Conclusions	78
References	78

Impacts of Agriculture on Water-borne Pathogens 83

David Kay, John Crowther, Cheryl Davies, Tony Edwards, Lorna Fewtrell, Carol Francis, Chris Kay, Adrian McDonald, Carl Stapleton, John Watkins and Mark Wyer

1 Introduction	84
2 Policy Developments	86
3 Microbial Dynamics	88
3.1 Pathogens, Indicators and Health Risk	88
3.2 Catchment Microbial Flux	94
3.3 Flux Attenuation and Mitigation of Resource Impacts	101
4 Conclusions	105
References	106

Pesticides in Modern Agriculture 111

Dan Osborn

1 Introduction	111
2 The Traditional Context of the Agricultural Uses of Pesticides	114
3 The Changing Nature of Pesticide Use from Earliest Agricultural Times to the Present Day	116
4 Risks to Human Health from Pesticide Use in Agriculture	120
5 Pesticide Use in Current Agricultural Systems – A Changing and Challenging Context	122
6 Future Pesticide Use and Approaches to their Regulation and Management	123
References	126

Balancing the Environmental Consequences of Agriculture with the Need for Food Security	129
<i>Ian Crute</i>	
1 Preamble	130
1.1 The Need for Food Security	130
1.2 The Importance of Environmental Sustainability and a Role for the UK	130
2 Agriculture's Environmental Impact and a Summary of the Issues	132
2.1 Some Terminology	132
2.2 Man-managed and Natural Ecosystems – Competition for Photosynthate	132
2.3 The Application of Science – Manipulating Genotype and Environment	134
2.4 Impacts from Fossil-fuel Use	135
2.5 Reactive Nitrogen	136
2.6 Water – Excess and Shortage	136
2.7 Contaminants and Pollutants	137
2.8 Avoiding Negative Environmental Consequences of Agricultural Practice – A Summary	138
3 Sustainable Intensification	138
3.1 Global Land Use	138
3.2 Anthromes and Anthropogenic Ecosystem Processes	139
3.3 Examples of Sustainable Intensification	140
3.4 Management of Biodiversity: Land Sharing or Land Sparing?	141
4 Land Use, Resource Management and Deliverables from Land	142
4.1 Understanding Interactions and Trade-offs	142
4.2 Units of Accounting	142
4.3 Some Examples of Trade-offs	144
5 A Systems-based Approach to GHG Balance	145
5.1 Agriculture as Part of the Problem and Part of the Solution	145
5.2 Fossil Fuel Substitution, Carbon Capture and Storage, Food Imports and the Cost of Valued Landscapes	146
6 Conclusions	147
References	148
Positive and Negative Impacts of Agricultural Production of Liquid Biofuels	150
<i>Lucas Reijnders</i>	
1 Introduction	151
2 Agricultural Production as Part of Biofuel Life Cycles and Life Cycle Assessment	152

3	Energy	154
3.1	Solar Energy Conversion Efficiency of Current Agricultural Crop-based Liquid Biofuels	154
3.2	Replacement of Fossil Fuels	155
3.3	Energetic Return on Investment (EROI)	156
4	Water Footprints of Current Agricultural Crop-based Liquid Biofuels	156
5	Life Cycle Greenhouse Gas Emissions and the Carbon Debt of Current Agricultural Crop-based Liquid Biofuels	157
6	Life Cycle Emissions of Pollutants Linked to Current Agricultural Crop-based Liquid Biofuels	159
7	Impact of Agricultural Crop-based Liquid Biofuels on Natural Ecosystems and Biodiversity	160
8	Effect of Current Agricultural Crop-based Liquid Biofuels on Food Prices and Hunger	161
9	Liquid Biofuels from Crop Residues	162
10	Conclusions	163
	References	163
