

CONTENTS

Series Editor's Introduction 5

1. Analyzing Mobility Tables 7

The Basics 8

Sources of Mobility Data 10

Elementary Operations 11

χ^2 Tests Applied to the Mobility Table 13

Odds Ratios 16

Mobility Ratios 16

2. Independence in Parts of the Table 18

Quasi-Perfect Mobility Defined 19

A Log-Linear Model of Quasi-Perfect Mobility 19

Quasi-Perfect Mobility Results 21

Barriers to Mobility at the Top and Bottom: The Corners
Model 23

Symmetrical Association 25

3. Social Distance Models 27

Constrained Diagonals Models 27

Status Barriers and Crossings Parameters 31

Mobility Models in Logit Form 34

4. Topological Models 37

The Featherman-Hauser Model of Mobility to First
Occupations 38

Issues in Revising Models: Fit and Parsimony 41

Indeterminacy of Topological Models 46

5. Scaled Models of Association 51

Uniform Association 52

Generalizations of Uniform Association 54

Model II 56

Analysis of Association in the U.S. Data 58

Analysis of Association with the Diagonal Deleted 60

Similar Parameters Under Different Models 63

Equivalent Models—Reprise 66

A Comparison of Mobility in Britain and Denmark 66

6. New Developments 68

Latent Structures of Mobility 69

Inferring Class Structure from Mobility Patterns 72

Status, Autonomy, and Training in Occupational Mobility 76

7. Applications of Mobility Tables to Family and Religion 80

Occupations of Husbands and Wives 80

Religious Assortative Marriage 82

Religious Socialization 85

8. Conclusion 87
