Introduction by the Editors: Mortensen & Pissarides: Job Creation and Job Destruction in the Theory of Unemployment	1
Introduction: The Flow View of the Labor Market	5
1 The Matching Process as a Noncooperative Bargaining Game	17
1.1. Matching Technologies	20
1.2. Matching Equilibria	25
1.3. Matching Efficiency	33
1.4. A Summary and a Reinterpretation	41
2 Short-Run Equilibrium Dynamics of Unemployment, Vacancies, and Real Wages	44
2.1. Unemployment	47
2.2. Vacancies	49
2.3. Wages	51
2.4. Job Rejection	54
2.5. Equilibrium and Short-Run Dynamics	56
2.6. Response to Output Shocks	58
2.7. Conclusions	65
3 Unemployment and Vacancies in Britain	67
3.1. Some Statistical Facts	71
3.1.1. Unemployment: Stocks and Flows	71
3.1.2. Flows Into Unemployment: Quits and Redundancies	75
3.1.3. Flows Out of Unemployment: Vacancies and Job Search	78
3.2. Theory	79
	xi

Contents

3.2.1. Flows Into Unemployment	79
3.2.2. Flows Out of Unemployment	80
3.2.3. Vacancies and the Demand for Labor	85
3.3. Properties of Equilibrium Unemployment and the Role of Policy	90
3.3.1. Uniqueness of Equilibrium	90
3.3.2. Efficiency of Equilibrium Unemployment	95
3.3.3. Accounting for the Rise in Unemployment	98
3.4. Conclusions	108
Appendix A: A Formal Model	110
Appendix B: Definition of Variables Used in the Regressions	121
4 Job Creation and Job Destruction in the Theory of Unemployment	123
4.1. Concepts and Notation	125
4.2. Steady States	127
4.3. Cyclical Shocks	133
4.4. An Illustrative Simulation	140
4.5. Conclusions	145
Appendix	146
5 Equilibrium Wage Distributions: A Synthesis	150
5.1. The General Model	152
5.2. Properties of an Equilibrium Wage Offer Distribution	156
5.3. The Case of Homogeneous Agents	160
5.4. The General Case	165
5.5. Structural Parameter Estimation	170
Postscript	173
Notes	182
