# Contents

**Preface** vii

**1 Introduction** 1
- 1.1 Causal Modeling and Observation Plans . . . 4
  - 1.1.1 Cross-Sectional Data . . . 5
  - 1.1.2 Panel Data . . . 13
  - 1.1.3 Event History Data . . . 19
- 1.2 Event History Analysis and Causal Modeling . . . 21

**2 Event History Data Structures** 38
- 2.1 Basic Terminology . . . 38
- 2.2 Event History Data Organization . . . 42

**3 Nonparametric Descriptive Methods** 58
- 3.1 Life Table Method . . . 58
- 3.2 Product-Limit Estimation . . . 72
- 3.3 Comparing Survivor Functions . . . 76

**4 Exponential Transition Rate Models** 87
- 4.1 The Basic Exponential Model . . . 88
  - 4.1.1 Maximum Likelihood Estimation . . . 89
  - 4.1.2 Models without Covariates . . . 91
  - 4.1.3 Time-Constant Covariates . . . 94
- 4.2 Models with Multiple Destinations . . . 101
- 4.3 Models with Multiple Episodes . . . 109

**5 Piecewise Constant Exponential Models** 116
- 5.1 The Basic Model . . . 116
- 5.2 Models without Covariates . . . 118
- 5.3 Models with Proportional Covariate Effects . . . 122
- 5.4 Models with Period-Specific Effects . . . 123

**6 Exponential Models with Time-Dependent Covariates** 128
- 6.1 Parallel and Interdependent Processes . . . 128
- 6.2 Interdependent Processes: The System Approach . . . 131
- 6.3 Interdependent Processes: The Causal Approach . . . 135
- 6.4 Episode Splitting with Qualitative Covariates . . . 137
- 6.5 Episode Splitting with Quantitative Covariates . . . 147
- 6.6 Application Examples . . . 152

**7 Parametric Models of Time-Dependence** **182**
7.1 Interpretation of Time-Dependence . . . . . 183
7.2 Gompertz Models . . . . . 186
7.3 Weibull Models . . . . . 196
7.4 Log-Logistic Models . . . . . 204
7.5 Log-Normal Models . . . . . 210

**8 Methods to Check Parametric Assumptions** **216**
8.1 Simple Graphical Methods . . . . . 216
8.2 Pseudoresiduals . . . . . 218

**9 Semiparametric Transition Rate Models** **223**
9.1 Partial Likelihood Estimation . . . . . 224
9.2 Time-Dependent Covariates . . . . . 228
9.3 The Proportionality Assumption . . . . . 233
9.4 Baseline Rates and Survivor Functions . . . . . 238
9.5 Application Example . . . . . 243

**10 Problems of Model Specification** **247**
10.1 Unobserved Heterogeneity . . . . . 247
10.2 Models with a Mixture Distribution . . . . . 253
10.2.1 Models with a Gamma Mixture . . . . . 256
10.2.2 Exponential Models with a Gamma Mixture . . . . . 259
10.2.3 Weibull Models with a Gamma Mixture . . . . . 261
10.3 Discussion . . . . . 265
