Preface	vii
Acknowledgments	ix
Abstract	xi
List of tables	xxi
List of figures	xxv
List of appendices	xxvii
List of abbreviations	xxix
<i>Part One: Introduction and Review</i>	<i>1</i>
Chapter 1: Introduction	1
1.1 Development of the hedge fund business concept	2
1.2 General issues and problems	4
1.2.1 <i>Performance measurement</i>	5
1.2.2 <i>Index determination</i>	7
1.2.3 <i>Performance persistence</i>	8
1.2.4 <i>Data bias and reporting standards</i>	9
1.3 Relevance of performance persistence studies	9
1.4 Research idea	10
1.5 Objectives	12
1.6 Limitations	13
1.7 Research process	14
1.8 Structure of thesis	14

Chapter 2:	Hedge fund market.....	17
2.1	Definition	17
2.2	History.....	19
2.3	Market size	21
2.4	Market participants and business environment	24
2.5	Investment strategies.....	27
2.5.1	<i>Equity long/short hedge fund strategies.....</i>	<i>29</i>
2.6	Fund of hedge funds.....	32
2.7	Risk management.....	34
2.8	Fees	36
2.9	Organization.....	39
2.10	Regulation	39
2.11	Hedge fund versus mutual funds.....	42
2.12	Hedge fund versus private equity funds.....	43
Chapter 3:	Research and literature review	45
3.1	Introduction.....	45
3.2	Research on mutual fund performance and performance persistence	47
3.3	Research on hedge fund performance	51
3.4	Research on hedge fund micro effects	60
3.5	Research on hedge fund performance persistence	61
3.6	Research on hedge fund data biases.....	63

Chapter 4: Performance measurement methods 67

4.1	Introduction.....	67
4.2	Objectives.....	68
4.3	Methods.....	69
4.3.1	<i>Capital asset pricing model (CAPM)</i>	69
4.3.2	<i>Single- and multi-factor models</i>	71
4.3.2.1	Single-factor model.....	71
4.3.2.2	Single-index model.....	72
4.3.2.3	Multi-factor models.....	73
4.3.3	<i>Arbitrage pricing theory model (APT)</i>	77
4.3.4	<i>Style analysis model</i>	79
4.3.5	<i>Hedge fund index-based models</i>	80
4.3.6	<i>Asset-based style factor model</i>	83
4.3.7	<i>Non-linear return-based models</i>	84
4.3.7.1	Option-based pricing model.....	85
4.3.7.2	Buy-and-hold and option-based factor model.....	86
4.3.8	<i>Style-specific option-based factor models</i>	87
4.3.8.1	Option-based model for trend-following strategies.....	88
4.3.8.2	Option-based model for risk arbitrage.....	92
4.3.8.3	Combined model for fixed-income oriented hedge funds.....	95
4.3.9	<i>Conditional models</i>	97
4.3.10	<i>Performance measurement ratio models</i>	97
4.3.10.1	Sharpe ratio.....	98
4.3.10.2	Treynor ratio.....	99
4.3.10.3	Other ratio models.....	99
4.4	Performance measurement models for Equity long/short hedge funds.....	100
4.4.1	<i>Model A: CAPM-derived market model</i>	101

4.4.2	<i>Model B: Linear multi-factor model</i>	102
4.4.3	<i>Model C: Multi-factor model with contingent-claims variables</i>	104
4.4.4	<i>Model D: Automatically fitted best model</i>	107
4.4.5	<i>Model E: Hedge fund style index model</i>	108
4.4.6	<i>Model F: Performance measurement ratio models</i>	109
4.4.6.1	Sharpe ratio model	110
4.4.6.2	Treynor ratio model	110
4.4.6.3	Treynor Black appraisal ratio model	111
4.5	Limitations of models	111

Part Three: Empirical studies 113

Chapter 5: Hedge fund and capital market data 113

5.1	Introduction.....	113
5.2	Databases	114
5.3	Data biases	116
5.3.1	<i>Survivorship bias</i>	116
5.3.2	<i>Selection bias</i>	118
5.3.3	<i>Stale price bias</i>	120
5.4	Data selection.....	120
5.4.1	<i>Database and sample selection</i>	120
5.4.2	<i>Time period</i>	126
5.4.3	<i>Selection criteria</i>	126
5.4.4	<i>Return calculation</i>	128
5.5	Capital market data	129
5.5.1	<i>Currency denomination and return determination</i>	129

5.5.2	<i>Risk-free interest rate</i>	130
5.5.3	<i>Traditional factors</i>	130
5.5.4	<i>Alternative factors</i>	133
5.5.5	<i>Option factors</i>	136
5.5.6	<i>Hedge fund industry data</i>	144

Chapter 6: Performance measurement..... 147

6.1	Economic expectations of Equity long/short hedge fund investments	147
6.2	Unadjusted performance of Equity long/short hedge fund sample	149
6.2.1	<i>Unadjusted performance (“fund series approach”)</i>	150
6.2.2	<i>Unadjusted performance (“time series approach”)</i>	154
6.2.3	<i>Time-varying unadjusted performance</i>	159
6.2.3.1	Time-varying mean return	160
6.2.3.2	Time-varying standard deviation	163
6.2.3.3	Time-varying skewness.....	166
6.2.3.4	Time-varying kurtosis.....	167
6.2.4	<i>Interim summary (1)</i>	170
6.3	Performance of passive investment strategies.....	171
6.4	Correlation properties.....	175
6.4.1	<i>Correlation among potential explanatory variables</i>	176
6.4.2	<i>Correlation between potential explanatory variables</i>	177
6.5	Test assumptions for statistical significance	178
6.6	Risk-adjusted performance Equity long/short hedge fund sample	179
6.6.1	<i>Model A: CAPM-derived market model</i>	180
6.6.2	<i>Model B: Linear multi-factor model</i>	183

6.6.3	<i>Model C: Multi-factor model with contingent-claims variables</i>	186
6.6.4	<i>Model D: Automatically fitted best model</i>	189
6.6.5	<i>Models E: Hedge fund style index models</i>	194
6.6.6	<i>Interim summary (2)</i>	196
6.7	Risk-adjusted performance of Equity long/short hedge funds individual level.....	199
6.7.1	<i>Regression models A, D, E1 and E2</i>	200
6.7.2	<i>Ratio models</i>	217
6.7.3	<i>Relative risk-adjusted performance</i>	222
6.8	Summary	224
Chapter 7:	Performance persistence measurement	227
7.1	Performance persistence periods.....	231
7.2	Performance-ranked single hedge fund approach.....	232
7.2.1	<i>Performance in formation period</i>	233
7.2.2	<i>Performance in test period</i>	236
7.2.3	<i>Appraisal ratio persistence test</i>	241
7.2.4	<i>Contingency table-based tests</i>	243
7.2.5	<i>Empirical results</i>	248
7.2.5.1	Performance persistence based on unadjusted excess returns	249
7.2.5.2	Performance persistence based on risk-adjusted excess returns (constant parameters)	256
7.2.5.3	Performance persistence based on risk-adjusted excess returns (time-varying parameters).....	262
7.2.5.4	Performance persistence based on appraisal ratios	268
7.2.6	<i>Interim summary (1)</i>	275
7.3	Performance-ranked hedge fund portfolio approach.....	278
7.3.1	<i>Hedge fund portfolio formation and testing procedures</i>	279

7.3.2	<i>Empirical results</i>	282
7.3.2.1	Performance persistence unadjusted excess returns	282
7.3.2.2	Performance persistence risk-adjusted excess returns.....	289
7.3.3	<i>Interim summary (2)</i>	297
7.4	Comparative analysis	298
7.5	Summary	303

***Part Four: Conclusion*.....307**

Chapter 8: Summary and conclusion..... 307

8.1	Summary performance	308
8.2	Summary performance persistence	309
8.3	Practical implications	312
8.4	Areas for future research.....	314

Appendices 315
