I Introduction: The Conspicuous Absence of Philosophy from Science and Technology Studies	1
II The Sociology of Knowledge: The Philosophical Backdrop to STS	11
1. Philosophical Foundations and Main Sociological Traditions	11
2. Science as a Special Problem for the Sociology of Knowledge	14
3. Kuhn's Checkered Legacy to STS	21
4. The Punch Line: A Sociology of Science that is not a Sociology of Knowledge	28
5. Relativism and the Illusion of Autonomy in Science	30
6. STS's Janus-faced Antirealism: Relativism versus Constructivism	35
7. Conclusion: So is Relativism the Wrong Target?	39
III Philosophy In, Of, and Beyond the Scientific Field Site	45
8. Making Philosophy Safe for STS: The Rise of the Underlaborer	45
9. Philosophy by Sociological Means: STS as Fieldwork	49
10. STS Catches Philosophy by the Achilles' Heel: The Problem of Replication	54
11. What Is Living and Undead in Actor-Network Theory	58
12. STS Fieldwork as a Reflection of the Shifting Material Conditions of Scientific Work	67
13. New Horizons for Laboratory Life: Science as a Site of Generational Conflict and Jurisdictional Ambiguity	72
IV "Postmodern Positivism": STS by Another Name?	79
14. Platonism as Proto-Positivism	79
15. The Dialectical History of Positivism	82

16. Postmodernism as Positivism's Bastard Child	88
17. Motivating the Science Wars: The Politics of Popularizing and Esotericizing Science	93
18. The Elusive "Spontaneous Philosophy of the Scientists" Defended in the Science Wars	98
19. Does Research Fraud Matter? Reflections on the Sokal Hoax as a Social Experiment	102
20. What Should Have Been Done About Sokal? What Can Be Done About Positivism?	108
V Re-enchanting Science: Beyond Puritans and Gnostics	115
21. The Science Wars as Signaling the End of Scientific Puritanism	115
22. The Secularization of Science as a Precondition to its Re-enchantment	122
23. Re-enchanting Science with a Vengeance: Gnostic Scientism	127
24. Prolegomena to the Hidden History of Gnostic Biology	133
25. Distinguishing the Enchanted and Disenchanted Mind: The Mark of Theodicy	141
26. Two Disenchanted Theodicies: Invisible Hand and Natural Selection	145
27. The Cost of Disenchantment: A Failed Scientific Defense of Human Freedom	149
28. Conclusions: Meeting Weber's Challenge and Transcending the Science Wars	152
VI Citizen Science: Cultivating a Life in STS	157
29. Introduction: Beware of Greeks Bearing Historical Precedents	157
30. Expertise and Its Discontents: Some Institutional Alternatives	160
31. Institutionalizing the Public Understanding of Science in Consensus Conferences	164
32. The Prospects for Scientific Citizenship Today	171
33. Conclusion: Toward a Rhetorical Reclamation of Science	174
