List of Boxes	xi
1. Coral Reefs – Biodiverse and Productive Tropical Ecosystems	1
1.1 Introduction	1
1.2 Areas and distributions of reefs	10
1.3 Biodiversity on coral reefs	13
1.4 Coral communities and reef growth	17
1.5 Types of reefs	20
1.6 Profiles and zones of reefs	24
1.7 Biodiversity on reef slopes	30
1.8 Values of reefs to people	32
2. The Main Reef Builders and Space Occupiers	33
2.1 Corals	36
2.2 Soft corals and sea fans	47
2.3 Sponges	50
2.4 Other animal species	55
2.5 Macroalgae	57
2.6 Seagrasses and mangroves	59
2.7 Rates of coral growth, rates of reef growth	62
2.8 Soft substrates	65
3. The Abiotic Environment	66
3.1 Controls on coral distribution	66
3.2 Salinity	66
3.3 Temperature	71
3.4 Light	76
3.5 Nutrients	79
3.6 Exposure and other hydrodynamic factors	84
3.7 Sediment	87
3.8 Seawater carbonate chemistry	91

4.	Symbiotic Interactions	98
4.1	What is symbiosis?	98
4.2	Algal–invertebrate symbioses in corals and soft corals	98
4.3	Diversity of zooxanthellae	101
4.4	Physiology of coral calcification	104
4.5	Photosynthesis and carbon fluxes	106
4.6	Nitrogen acquisition and fluxes	113
4.7	Phosphorus	116
4.8	Symbiosis establishment and stability	117
4.9	Coral–microbial associations	122
4.10	Sponge symbioses with non-photosynthetic bacteria, cyanobacteria, and algae	125
4.11	'Macro' or iconic symbioses e.g. fish and sea anemones, shrimps, and fish	127
5.	Microbial, Microalgal, and Planktonic Reef Life	130
5.1	Microbial reef life	130
5.2	Trophic links	146
5.3	Zooplankton behaviour and ecology	154
6.	Reef Fishes: Diversity, Feeding, and Food Chains	161
6.1	Geographical influences on diversity	162
6.2	Reef fish: colourful for a reason	164
6.3	Trophic ecology of coral reef fish	168
6.4	The coral reef food chain	182
6.5	Impacts on the food chain	184
7.	Reef Fisheries and Reef Aquaculture	192
7.1	Fisheries resources on reefs	193
7.2	Practical issues with reef fishes	203
7.3	Live reef fish trade	206
7.4	Aquaculture on reefs	210
7.5	Impacts of fishing	211
7.6	Approaches to managing coral reef fisheries	215
7.7	Controlling coral reef fisheries	218
7.8	Future for reef fisheries	220

8.	Coral Reefs in the Modern World	223
	8.1 Damaging impacts on reefs	224
	8.2 Other physical impacts	231
	8.3 Coral diseases	234
	8.4 Diseases of other reef organisms	237
	8.5 Climate change	239
	8.6 Acidification	247
	8.7 Sea level rise	249
	8.8 Cyclones, hurricanes, typhoons	250
	8.9 Synergies, stasis, and feedbacks	253
9.	Consequences to Reefs of Changing Environmental Stress	255
	9.1 Ecological consequences of environmental impacts	255
	9.2 Changes to the main architectural species	259
	9.3 Changes on Indo-Pacific reefs	265
	9.4 Sizes of the coral 'reservoir'	274
	9.5 Changing food chains and trophic balances	275
10.	The Future, Human Population, and Management	278
	10.1 The time scale available	279
	10.2 The elephant in the room	282
	10.3 Protected areas and coral reefs	285
	10.4 Environmental assessments	288
	10.5 Costs, prices, and values	290
	10.6 The 'slippery slope to slime'	293
	10.7 The future for reefs	293
	Bibliography	301
	Index	333
