Contents

Preface v

1. The Limits of Physics 1
   - 1.1 Our Scientific Legacy . . . 1
   - 1.2 The Advanced and Retarded Fields . . . 6
   - 1.3 Quantum Mechanical Considerations . . . 11
   - 1.4 The Limits of Special Relativity . . . 14
   - 1.5 Discussion . . . 14
   - 1.6 The Quantum Universe . . . 17
   - 1.7 The Strong and Weak Interactions . . . 19
   - 1.8 Gauge Fields . . . 22
   - 1.9 Standard Cosmology . . . 27
   - 1.10 Bosonic Strings . . . 30
   - 1.11 End of the Road? . . . 34

2. Law Without Law 45
   - 2.1 A "Lawless" Universe? . . . 45
   - 2.2 The Emergence of Spacetime . . . 48
   - 2.3 Spacetime . . . 60
   - 2.4 Further Considerations . . . 61
   - 2.5 The Path Integral Formulation . . . 66
   - 2.6 Remarks . . . 68

3. The Universe of Fluctuations 73
   - 3.1 The New Cosmos . . . 73
   - 3.2 The Mysterious Dark Energy . . . 76

Sidharth, B.G.
The thermodynamic universe

3.3 Issues and Ramifications 84
3.4 Tests 85
3.5 Other Consequences 88
3.6 The Anomalous Acceleration of the Pioneer Spacecrafts . 91
3.7 The Binary Pulsar 91
3.8 Change in Orbital Parameters 93
3.9 Remarks 95
3.10 Further Considerations 109

4. The Thermodynamic Universe 121

4.1 Introduction 121
4.2 The Planck and Compton Scales 124
4.3 The Transition 130
4.4 Photon Mass 134
4.5 Further Theoretical Support 136
4.6 Remarks 138
4.7 The Mass Spectrum 144
4.8 Further Remarks 146

5. Spacetime Models and Tests 157

5.1 The Nature of Spacetime 157
5.2 Other Formulations 172
5.3 Multiply Connected Space and Spin 176
5.4 Lorentz Symmetry Violation Tests 179
5.5 The Finsler Spacetime Approach 182
5.6 Remarks 183
5.7 A Test for Non Commutative Spacetime 184

6. The Origin of Mass, Spin and Interaction 185

6.1 The Unification Mantra 185
6.2 Compton Scale Considerations 190
6.3 Remarks 196
6.4 Fuzzy Spacetime and Fermions 197
6.5 Branes 200
6.6 Dirac's Membrane and p-branes 201
6.7 A Modified Klein-Gordan Equation 202
6.8 A Modified Dirac Equation 204

7. The Enigma of Gravitation 207

7.1 Gravitation in a New Light 207
7.2 Remarks 213
7.3 Gravitation and Black Hole Thermodynamics Again . . . 215
7.4 Further Remarks 218
7.5 Gravitation From Fluctuations 220

8. An Adventurer's Miscellany 223

8.1 "Scaled" Quantum Mechanics 223
8.2 Quantum Geometry I 230
8.3 Quantum Geometry II 233
8.4 Large Scale Structures 235
8.5 The Puzzle of Gravitation 237
8.6 A New Short Range Force 240
8.7 Gravitational Effects 242
8.8 Bosons as Bound States of Fermions: The Neutrino Universe 243
8.9 Quantum Mechanics, General Relativity and The Landscape of Multiply Connected Universes 247
8.10 The Monopole 253
8.11 Fermions and Bosons 256

Bibliography 271

Index 289
