

Contents

Series Preface	ix
Preface	xi
List of Contributors	xiii
1 Biofuels in Perspective	1
<i>Wim Soetaert and Erick J. Vandamme</i>	
1.1 Fossil versus Renewable Energy Resources	1
1.2 Economic Impact	2
1.3 Comparison of Bio-energy Sources	4
1.4 Conclusion	7
References	7
2 Sustainable Production of Cellulosic Feedstock for Biorefineries in the USA	9
<i>Matthew T. Carr and James R. Hettenhaus</i>	
2.1 Introduction	9
2.2 Availability of Cellulosic Feedstocks	11
2.3 Feedstock Options	13
2.4 Sustainable Removal	16
2.5 Erosion Control	18
2.6 Tilling Practice	19
2.7 Transitioning to No-till	21
2.8 Realizing Removal	22
2.9 Removal Economics	25
2.10 Climate Change Mitigation	27
2.11 Pretreatment	29
2.12 Farmer in Value Chain	32
2.13 The Start: Preprocessing Pentose Sugars and Lignin	32
2.14 Continuing Downstream: Fungible Fermentation Sugars	32
2.15 Looking Upstream	33

2.16	Logistics	33
2.17	Conclusions	33
2.18	Policy Recommendations	34
	References	35
3	Bio-Ethanol Development in the USA	39
	<i>Brent Erickson and Matthew T. Carr</i>	
3.1	Introduction	39
3.2	Federal Policy	40
3.3	The US Ethanol Market	41
3.4	Corn Ethanol Technology	46
3.5	Cellulosic Ethanol	49
3.6	The Future	52
	References	53
4	Bio-Ethanol Development(s) in Brazil	55
	<i>Arnaldo Walter</i>	
4.1	Overview	55
4.2	Introduction	56
4.3	The Brazilian Experience with Ethanol	56
4.4	Policy and Regulatory Instruments Applied to Deploy Large-Scale Ethanol Production	59
4.5	Cost Reductions	61
4.6	Technological Development	62
4.7	Is the Ethanol Production in Brazil Sustainable?	65
4.8	Is the Brazilian Experience Replicable?	72
4.9	Conclusions	73
	References	74
5	Process Technologies for Biodiesel Production	77
	<i>Martin Mittelbach</i>	
5.1	Introduction	77
5.2	Biodiesel Production Worldwide	77
5.3	Feedstocks for Biodiesel Production	79
5.4	Chemical Principles of Biodiesel Production	80
5.5	Catalysts for Transesterification and Esterification Reactions	81
5.6	Transesterification in Supercritical Alcohols	86
5.7	Alternative Approaches	87
5.8	Overview of Process Technologies	87
	References	91
6	Bio-based Fischer–Tropsch Diesel Production Technologies	95
	<i>Robin Zwart and René van Ree</i>	
6.1	Introduction	95
6.2	Theoretical Background Catalytic FT-Diesel Synthesis Process	96

6.3	Biomass Gasification-Based FT-Diesel Production Concepts	100
6.4	Economics of Biomass-Based FT-Diesel Production Concepts	110
6.5	Conclusions	113
	References	114
7	Plant Oil Biofuel: Rationale, Production and Application	117
	<i>Barnim Jeschke</i>	
7.1	Introduction	117
7.2	Plant Oil Biofuels: the Underlying Idea	118
7.3	Perspectives of the Plant Oil Fuel Market	119
7.4	System Requirements	122
7.5	Plant Oil Conversion Technology	124
7.6	The User Perspective	125
	References	127
8	Enzymatic Production of Biodiesel	129
	<i>Hideki Fukuda</i>	
8.1	Introduction	129
8.2	Enzymatic Transesterification by Lipase	130
8.3	Use of Extracellular Lipases	131
8.4	Use of Intracellular Lipase as Whole-Cell Biocatalyst	136
8.5	Use of Cell-Surface Displaying Cells as Whole-Cell Biocatalyst	143
8.6	Conclusions and Future Prospects	147
	References	147
9	Production of Biodiesel from Waste Lipids	153
	<i>Roland Verhé and Christian V. Stevens</i>	
9.1	Introduction	153
9.2	Alternative Resources for Biodiesel Production	155
9.3	Conversion of Waste Frying and Cooking Oils into Biodiesel	155
9.4	Conclusion	168
	References	169
10	Biomass Digestion to Methane in Agriculture: A Successful Pathway for the Energy Production and Waste Treatment Worldwide	171
	<i>Peter Weiland, Willy Verstraete and Adrianus Van Haandel</i>	
10.1	Overview	171
10.2	Introduction	172
10.3	Biogas Production Potential	174
10.4	Biogas Production Configurations	183
10.5	Outlook	191
10.6	Conclusions	193
	References	194

11	Biological Hydrogen Production by Anaerobic Microorganisms	197
	<i>Servé W.M. Kengen, Heleen P. Goorissen, Marcel Verhaart, Alfons J.M. Stams, Ed W.J. van Niel and Pieterneel A.M. Claassen</i>	
	Abbreviations	197
11.1	Introduction	198
11.2	Hydrogen Formation in Natural Ecosystems	198
11.3	Thermodynamics of Hydrogen Formation	199
11.4	Enzymology	204
11.5	Enterobacteria	206
11.6	The Genus <i>Clostridium</i>	207
11.7	The Genus <i>Caldicellulosiruptor</i>	208
11.8	The Genus <i>Thermoanaerobacter</i>	210
11.9	The Genus <i>Thermotoga</i>	211
11.10	The Genus <i>Pyrococcus/Thermococcus</i>	212
11.11	Approaches for Improving Hydrogen Production	213
11.12	Concluding Remarks	214
	References	215
12	Improving Sustainability of the Corn–Ethanol Industry	223
	<i>Paul W. Gallagher and Hosein Shapouri</i>	
12.1	Introduction	223
12.2	Energy Balance	224
12.3	Crop Production and Greenhouse Gas Emissions	226
12.4	CO ₂ Adjustment in a Changing Ethanol Industry	228
12.5	Conclusions	232
	References	233
	Index	235
