Contents

Preface			**ix**
1	**Introduction**		**1**
	1.1	Scope	4
	1.2	Lessons	5
	1.3	Structure	9
	References		11
2	**The Ramsey Approach and Its Problems**		**13**
	2.1	A Simple Model of Government Finance	14
	2.2	The Dynamic Ramsey Taxation Problem: Setup	16
	2.3	The Dynamic Ramsey Taxation Problem: Solution	19
	2.4	Problems with the Ramsey Approach	24
	2.5	Summary	28
	2.6	Technical Notes	28
	References		33
3	**Basics of Dynamic Social Contracting**		**34**
	3.1	Class of Environments	35
	3.2	Incentive-Compatibility	39

Kocherlakota, Narayana R.
The new dynamic public finance
2010

3.3 Remarks on Incentive-Compatibility 42
3.4 Pareto Optimal Allocations 45
3.5 The Reciprocal Euler Equation 47
3.6 Dynamics of Pareto Optimal Consumption 58
3.7 Long-Run Properties of Pareto Optima 61
3.8 Summary 69
3.9 Technical Notes 71
References 79

4 Dynamic Optimal Taxation: Lessons for Macroeconomists 81
4.1 A Nonlinear Tax Problem 82
4.2 Any Tax Equilibrium Is Incentive-Compatible 87
4.3 Building an Optimal Tax System 89
4.4 Properties of the Optimal Tax System 112
4.5 Remarks about the Optimal System 125
4.6 Summary 130
4.7 Technical Notes 131
References 137

5 Optimal Intergenerational Taxation 140
5.1 An Intergenerational Tax Problem 141
5.2 Another Reciprocal Euler Equation 150
5.3 Properties of Socially Optimal Allocations 154
5.4 Optimal Bequest Taxation 159
5.5 Summary 164
5.6 Technical Notes 165
References 167

6 Quantitative Analysis: Methods and Results 168
6.1 Immortal Agents in an Open Economy 169
6.2 A Closed Overlapping Generations Economy 184
6.3 Summary 198
References 199

7 The Way Forward **201**
7.1 More Widely Applicable Tax Systems 201
7.2 New Solution Methods 204
7.3 Inputs from the Data 208
7.4 Summary 210
7.5 Technical Notes 211
References 213

Index **215**
