Introduction *xv*

## Section 1 **Attention is limited in time**

- 1 Attending to emerging representations: the importance of task context and time of response 3  
*Amelia R. Hunt, Wieske van Zoest, and Alan Kingstone*
- 2 Inhibition of return 17  
*Juan Lupiáñez*
- 3 The attentional blink: temporal constraints on consciousness 35  
*Kimron L. Shapiro and Jane E. Raymond*
- 4 The attentional boost and the attentional blink 49  
*Christian N. L. Olivers*
- 5 A stream of thought: temporal organization of mental operations 63  
*Mariano Sigman*
- 6 Vigilant attention 79  
*Ian H. Robertson and Redmond O'Connell*
- 7 Prior entry: attention and temporal perception 89  
*Charles Spence*

## Section 2 **Time perception is modulated by attention, perception, and action**

- 8 Timing, resources, and interference: attentional modulation of time perception 107  
*Scott W. Brown*
- 9 Mental timing and the central attentional bottleneck 123  
*Eric Ruthruff and Harold Pashler*
- 10 Attention underlies subjective temporal expansion 137  
*Peter Ulric Tse*
- 11 Duration illusions and predictability 151  
*David M. Eagleman*
- 12 Temporal dilation: the chronostasis illusion and spatial attention 163  
*Kielan Yarrow*
- 13 Space-time in the brain 177  
*Concetta Morrone and David Burr*

- 14 Modulation of time perception by visual adaptation 187  
*Alan Johnston*
- 15 Temporal binding 201  
*Marc J. Buehner*

### Section 3 **Directing attention in time enhances perception and action**

#### Section 3a **Temporal predictions inherent in the temporal structure of events**

- 16 Behavioural adaptation to redundant frequency distributions in time 217  
*Annika Wagener and Joachim Hoffmann*
- 17 On the locus of temporal preparation: enhancement of premotor processes? 227  
*Bettina Rolke and Rolf Ulrich*
- 18 Excitatory and inhibitory motor mechanisms of temporal preparation 243  
*Boris Burle, Christophe Tandonnet, and Thierry Hasbroucq*
- 19 Timing structures' neuronal activity during preparation for action 257  
*Björg Elisabeth Kilavik and Alexa Riehle*
- 20 The neural basis of temporal prediction and the role of dopamine 273  
*Christopher D. Fiorillo*
- 21 Foreperiod and sequential effects: theory and data 289  
*Sander A. Los*
- 22 Neuroanatomical substrates of foreperiod effects 303  
*Antonino Vallesi*
- 23 Attending to sound patterns and the role of entrainment 317  
*Mari Riess Jones*
- 24 Electrophysiological markers of foreperiod effects 331  
*Peter Praamstra*
- 25 Neural bases of rhythm prediction 345  
*Ricarda I. Schubotz*

#### Section 3b **Temporal predictions guided by endogenous cues**

- 26 Enhancing behavioural performance by visual temporal orienting 359  
*Ángel Correa*
- 27 How can temporal expectations bias perception and action? 371  
*Anna C. Nobre*
- 28 Temporal orienting in audition, touch, and across modalities 393  
*Kathrin Lange and Brigitte Röder*

- 29** Neurophysiology of temporal orienting in ventral visual stream 407  
*Britt Anderson and David L. Sheinberg*
- 30** Temporal prediction during duration perception 419  
*Viviane Pouthas and Micha Pfeuty*
- 31** Neural substrates of temporal attentional orienting 429  
*Jennifer T. Coull*
- Index 443
