<b>List of Tables</b>	<b>ix-x</b>
<b>List of Figures</b>	<b>xi-xvii</b>
<b>List of Plates</b>	<b>xviii-xxi</b>
<b>Preface</b> <i>Derek A. Welsby</i>	<b>xxii</b>
<b>Acknowledgements</b>	<b>xxiii</b>
<b>1. Introduction and description of the site</b> <i>Sandro Salvatori and Donatella Usai</i>	<b>1-7</b>
Introduction and description of the site	1
Excavation	2
Location of the archive and of the finds	7
<b>2. Pottery for the death: a survey of grave goods categories</b> <i>Sandro Salvatori</i>	<b>9-19</b>
Introduction	9
The pottery assemblage	9
<b>3. Bright and colourful: the stone jewels of R12 males and females, adults and young</b> <i>Sandro Salvatori and Donatella Usai</i>	<b>21-31</b>
Beads and their dimensions	22
Other stone jewels	27
Comments	30
<b>4. Lunates and micro-lunates, cores and flakes. The lithic industry of R12</b> <i>Donatella Usai</i>	<b>33-52</b>
Introduction	33
The lithic industry of R12	33
General description	33
The Debitage	33
Core technology and typology	34
Debitage and core dimensions	34
Tools	35
The Origins of the R12 lithic industry and its place in the Nubian Sequence	39
General observations	39
The Qadan and the Abkan	42
Testing the new phylogenetic hypothesis	45
R12: toward a definition of the Middle Neolithic Nubian lithic complex and function	49
A glimpse on ritual and social aspects	49
<b>5. The other stone tools: axes, mace-heads, grinding stone, etc.</b> <i>Donatella Usai</i>	<b>53-58</b>
Introduction	53
Axes	53
Mace-heads	55
Stone palettes	56
Grinders and grinding stones, pestles and mortars	57
Pigments	58

<b>6. Tools, ornaments and bucrania. The animals remains</b>	<b>59-77</b>
<i>Nadja Pöllath</i>	
Introduction	59
Description of the finds	59
Mammals	59
Bovids	59
Cattle	59
Small livestock (sheep and goat)	62
Sheep	62
Goat	63
Sheep/goat	63
Gazelles	63
Medium-sized bovids	66
Vervet or Green monkey, <i>Chlorocebus aethiops</i>	66
African Elephant, <i>Loxodonta africana</i>	67
Hippopotamus, <i>Hippopotamus amphibius</i>	68
Dog/fox	68
Unidentified mammals	68
Birds	68
Ostrich, <i>Struthio camelus</i>	68
Helmeted Guinea fowl, <i>Numida meleagris</i>	68
Unidentified birds	70
Molluscs	70
Bivalves	70
Genus <i>Chambardia</i>	70
Nile oyster, <i>Etheria elliptica</i>	70
Gastropods	71
<i>Limicolaria cailliaudi</i>	71
<i>Pila</i> sp	71
Nerite, <i>Nerita</i> cf. <i>polita</i>	72
Cowrie, Cypraeidae indet.	72
The spectrum of identified taxa - environment and animal exploitation	72
The environmental setting	72
Animal exploitation	73
Use and meaning – interpretation of the objects	73
Funeral sacrifices	74
Skull depositions	76
Conclusions	77
Acknowledgements	77
<b>7. Ancient recycling: the animal bone tools</b>	<b>79-81</b>
<i>Luana Cenci</i>	
Introduction	79
The raw material	79
Typology of objects	79
<b>8. The human skeletal analysis</b>	<b>83-104</b>
<i>Margaret Judd</i>	
Introduction	83
Part I: Inventory, Recording and Demographics	83
Inventory and Recording	83
Bone Integrity	83
Condition	83
Inventory	83
Cranial measurements	86
Post-cranial measurements	86
Cranial non-metric traits	87
Post-cranial non-metric traits	88
Demographic assessment	91
Ancestry	91

Biological sex	91
Age-at-death	92
Stature	93
Demographic assessment for children	93
Demographic summary	96
Part II: Palaeopathology	96
Joint disease	96
Trauma	98
Dental disease	98
Dental wear	98
Calculus	99
Caries	99
Abscesses	100
Dental hypoplasia and anomalies	100
Temporomandibular joint disease	100
Metabolic disease	100
Infectious disease	100
Congenital	101
Symphalangism	101
Vertebral anomalies	101
Part III: Discussion	101
Community health	101
Community life	102
Diet	102
Conclusion	104
Acknowledgements	104
<b>9. Dental Morphometric Analyses of the Neolithic Human Skeletal Sample from R12:</b>	<b>105-112</b>
<b>Characterisation and Contrasts</b>	
<i>Joel D. Irish</i>	
Introduction	105
Materials	105
Methods	105
Dental morphology	105
Odontometrics	106
Results	107
Dental morphology	107
Odontometrics	107
Discussion and Conclusions	110
Acknowledgements	111
<b>10. Stable isotopes as dietary indicators of Neolithic Nubian population</b>	<b>113-122</b>
<i>Paola Iacumin</i>	
Introduction	113
Material analysed	113
Carbon	114
Oxygen	115
Analytical methods for apatite purification	116
Results and discussion	116
Carbon isotope composition of carbonate	117
Oxygen isotope composition of apatite	120
Comparison with the Kerma population	120
<b>11. Miscellanea</b>	<b>123-125</b>
<i>Sandro Salvatori</i>	
Introduction	123
Ostrich eggshell	123
Modified and unmodified animal bones	123
Cattle skin	123
Nile and Red sea shells	124

Small pebbles	124
An enigmatic pottery figurine	124
<b>12. Social structure of the R12 population: some hypothesis</b>	<b>127-137</b>
<i>Sandro Salvatori</i>	
Introduction	127
Horizontal dimension: spatial distribution	127
Horizontal dimension: deceased deposition behaviour	129
Vertical dimension	132
Grave goods and a measure of 'wealth' distribution	132
Discussion	134
<b>13. Relative and absolute chronology of the R12 cemetery</b>	<b>139-146</b>
<i>Sandro Salvatori</i>	
Introduction	139
Description of pottery types used for seriation purposes	139
Pottery types used in the analysis	139
Cluster analysis and relative chronology	142
C <sup>14</sup> and the Nubian and Central Sudan Neolithic: an assessment	143
<b>14. R12 and the Neolithic of Sudan. New perspectives</b>	<b>147-156</b>
<i>Sandro Salvatori and Donatella Usai</i>	
Neolithic demographic trends: An illusion? Distribution of Neolithic cemeteries and settlements	147
The Upper Nubia Evidence	147
The Central Sudan Evidence	150
Discussion	151
<b>15. Summary and some Conclusions</b>	<b>157-159</b>
<i>All the authors</i>	
<b>16. Catalogue of the graves</b>	<b>161-283</b>
<i>Sandro Salvatori and Donatella Usai with contributions by Margaret Judd and Nadja Pöllath</i>	
<b>17. The Skeletal Catalogue</b>	<b>285-320</b>
<i>Margaret Judd</i>	
<b>18. Catalogue of the animals remains</b>	<b>321-343</b>
<i>Nadja Pöllath</i>	
<b>Bibliography</b>	<b>345-358</b>
<b>Arabic summary</b>
