# Contents

|   |      |
|---|------|
| Foreword                                      | ix   |
| Acknowledgments                               | xiii |
| Lecture 1. The Brachistochrone                | 1    |
| Lecture 2. The Fundamental Problem. Extremals | 7    |
| Appendix 2: The Fundamental Lemma             | 15   |
| Lecture 3. The Insufficiency of Extremality   | 19   |
| Appendix 3: The Principle of Least Action     | 26   |
| Lecture 4. Important First Integrals          | 29   |
| Lecture 5. The du Bois-Reymond Equation       | 35   |
| Appendix 5: Another Fundamental Lemma         | 40   |
| Lecture 6. The Corner Conditions              | 41   |
| Lecture 7. Legendre's Necessary Condition     | 51   |
| Appendix 7: Yet Another Lemma                 | 55   |
| Lecture 8. Jacobi's Necessary Condition       | 57   |
| Appendix 8: On Solving Jacobi's Equation      | 65   |

---

---

|   |     |
|---|-----|
| Lecture 9. Weak Versus Strong Variations          | 67  |
| Lecture 10. Weierstrass's Necessary Condition     | 73  |
| Lecture 11. The Transversality Conditions         | 81  |
| Lecture 12. Hilbert's Invariant Integral          | 91  |
| Lecture 13. The Fundamental Sufficient Condition  | 101 |
| Appendix 13: The Equations of an Envelope         | 108 |
| Lecture 14. Jacobi's Condition Revisited          | 111 |
| Lecture 15. Isoperimetrical Problems              | 119 |
| Appendix 15: Constrained Optimization             | 124 |
| Lecture 16. Optimal Control Problems              | 127 |
| Lecture 17. Necessary Conditions for Optimality   | 135 |
| Appendix 17: The Calculus of Variations Revisited | 146 |
| Lecture 18. Time-Optimal Control                  | 149 |
| Lecture 19. A Singular Control Problem            | 159 |
| Lecture 20. A Biological Control Problem          | 163 |
| Lecture 21. Optimal Control to a General Target   | 167 |
| Appendix 21: The Invariance of the Hamiltonian    | 180 |
| Lecture 22. Navigational Control Problems         | 183 |
| Lecture 23. State Variable Restrictions           | 195 |
| Lecture 24. Optimal Harvesting                    | 203 |
| Afterword   | 219 |
| Solutions or Hints for Selected Exercises         | 221 |
| Bibliography                                      | 245 |
| Index   | 249 |
