An invitation to Bayesian nonparametrics <i>Nils Lid Hjort, Chris Holmes, Peter Müller and Stephen G. Walker</i>	1
1 Bayesian nonparametric methods: motivation and ideas <i>Stephen G. Walker</i>	22
1.1 Introduction	22
1.2 Bayesian choices	24
1.3 Decision theory	26
1.4 Asymptotics	27
1.5 General posterior inference	29
1.6 Discussion	33
References	33
2 The Dirichlet process, related priors and posterior asymptotics <i>Subhashis Ghosal</i>	35
2.1 Introduction	35
2.2 The Dirichlet process	36
2.3 Priors related to the Dirichlet process	46
2.4 Posterior consistency	49
2.5 Convergence rates of posterior distributions	60
2.6 Adaptation and model selection	67
2.7 Bernshteĭn–von Mises theorems	71
2.8 Concluding remarks	74
References	76

3	Models beyond the Dirichlet process	
	<i>Antonio Lijoi and Igor Prünster</i>	80
3.1	Introduction	80
3.2	Models for survival analysis	86
3.3	General classes of discrete nonparametric priors	99
3.4	Models for density estimation	114
3.5	Random means	126
3.6	Concluding remarks	129
	References	130
4	Further models and applications	
	<i>Nils Lid Hjort</i>	137
4.1	Beta processes for survival and event history models	137
4.2	Quantile inference	144
4.3	Shape analysis	148
4.4	Time series with nonparametric correlation function	150
4.5	Concluding remarks	152
	References	155
5	Hierarchical Bayesian nonparametric models with applications	
	<i>Yee Whye Teh and Michael I. Jordan</i>	158
5.1	Introduction	158
5.2	Hierarchical Dirichlet processes	160
5.3	Hidden Markov models with infinite state spaces	171
5.4	Hierarchical Pitman–Yor processes	177
5.5	The beta process and the Indian buffet process	184
5.6	Semiparametric models	193
5.7	Inference for hierarchical Bayesian nonparametric models	195
5.8	Discussion	202
	References	203
6	Computational issues arising in Bayesian nonparametric hierarchical models	
	<i>Jim Griffin and Chris Holmes</i>	208
6.1	Introduction	208
6.2	Construction of finite-dimensional measures on observables	209
6.3	Recent advances in computation for Dirichlet process mixture models	211
	References	221

7 Nonparametric Bayes applications to biostatistics	
<i>David B. Dunson</i>	223
7.1 Introduction	223
7.2 Hierarchical modeling with Dirichlet process priors	224
7.3 Nonparametric Bayes functional data analysis	236
7.4 Local borrowing of information and clustering	245
7.5 Borrowing information across studies and centers	248
7.6 Flexible modeling of conditional distributions	250
7.7 Bioinformatics	260
7.8 Nonparametric hypothesis testing	265
7.9 Discussion	267
References	268
8 More nonparametric Bayesian models for biostatistics	
<i>Peter Müller and Fernando Quintana</i>	274
8.1 Introduction	274
8.2 Random partitions	275
8.3 Pólya trees	277
8.4 More DDP models	279
8.5 Other data formats	283
8.6 An R package for nonparametric Bayesian inference	286
8.7 Discussion	289
References	290
Author index	292
Subject index	297
